through miles of pipeline to provide clean water dredged the ocean to deepen the harbor filled tidal flats and covered the peninsula with houses shops and factories and created a metropolitan system of parks and greenways facilitating the conversion of fields into suburbs The book shows how in Boston different class and ethnic groups brought rival ideas of nature and competing visions of a city upon a hill to the process of urbanization and were forced to conform their goals to the realities of Boston s distinctive natural setting The outcomes of their battles for control over the city s development were ultimately recorded in the very fabric of Boston itself In Boston s history we find the seeds of the environmental relationships that for better or worse have defined urban America to this day
