Blue Universe Peter Noever, Gerald Zugmann, 2003-02 Artwork by COOP HIMMELB L AU Photographs by Gerald Zugmann Edited by Peter Noever Text by Christian Reder *Blue universe* Gerald Zugmann, 2002 *Machine Hallucinations* Matias del Campo, Neil Leach, 2022-07-05 AI is already part of our lives even though we might not realise it It is in our phones filtering spam identifying Facebook friends and classifying our images on Instagram It is in our homes in the form of Siri Alexa and other AI assistants It is in our cars and our planes AI is literally everywhere Artworks generated by AI have won international prizes and have been sold at auction But what does AI mean for the world of design This issue of AD explores the nature of AI and considers its potential for architecture But this is no idle speculation Architects have already started using AI for architectural design and fabrication Yet astonishingly there has been almost no debate about AI within the discipline of architecture so far Surely nothing can be more important for the profession of architecture right now The issue looks at all aspects of AI its potential to assist architects in designing buildings so that it becomes a form of augmented intelligence its capacity to design buildings on its own and whether AI might open up an extraordinary new chapter in architectural design Contributors Refik Anadol Daniel Bolojan Alexa Carlson Sofia Crespo and Feileacan McCormick Gabriel Esquivel Jean Jaminet and Shane Bugni Behnaz Farahi Theodoros Galanos and Angelos Chronis Eduard Haiman Wanyu He Damjan Jovanovic and Lidija Kljakovic Immanuel Koh Maria Kuptsova Sandra Manninger Lev Manovich Achim Menges and Thomas Wortmann Wolf dPrix Karolin Schmidbaur and Efilena Baseta M Casey Rehm and Hao Zheng and Masoud Akbarzadeh Featured architects Alisa Andrasek Coop Himmelb l au Lifeforms io Nonstandardstudio SPAN Kyle Steinfeld Studio Kinch and Xkool Technology The Aesthetics of Atmospheres Gernot Böhme, 2016-09-13 Interest in sensory atmospheres and architectural and urban ambiances has been growing for over 30 years A key figure in this field is acclaimed German philosopher Gernot B hme whose influential conception of what atmospheres are and how they function has been only partially available to the English speaking public This translation of key essays along with an original introduction charts the development of Gernot B hme s philosophy of atmospheres and how it can be applied in various contexts such as scenography commodity aesthetics advertising architecture design and art The phenomenological analysis of atmospheres has proved very fruitful and its most important and successful application has been within aesthetics The material background of this success may be seen in the ubiquitous aestheticization of our lifeworld or from another perspective of the staging of everything every event and performance The theory of atmospheres becoming an aesthetic theory thus reveals the theatrical not to say manipulative character of politics commerce of the event society But taken as a positive theory of certain phenomena it offers new perspectives on architecture design and art It made the spatial and the experience of space and places a central subject and hence rehabilitated the ephemeral in the arts Taking its numerous impacts in many fields together it initiated a new humanism the individual as a living person and his or her perspective are

taken seriously and this fosters the ongoing democratization of culture in particular the possibility for everybody to participate in art and its works *Blue Universe* Coop Himmelblau, 2002-02-02 Artwork by COOP HIMMELB L AU Photographs by Gerald Zugmann Edited by Peter Noever Text by Christian Reder **Architectural Record**, 2002

German Americana Christoph Strupp, Kai Dreisbach, 2007 A comprehensive bibliography of books and scholarship on the United States produced in German speaking countries from 1956 2005 Dwell, 2002-10 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines **The Architecture of Paul Rudolph** Timothy M. Rohan, 2014-07-10 Equally admired and maligned for his remarkable Brutalist buildings Paul Rudolph 1918 1997 shaped both late modernist architecture and a generation of architects while chairing Yale s department of architecture from 1958 to 1965 Based on extensive archival research and unpublished materials *The Architecture of Paul Rudolph* is the first in depth study of the architect neglected since his postwar zenith Author Timothy M Rohan unearths the ideas that informed Rudolph s architecture from his Florida beach houses of the 1940s to his concrete buildings of the 1960s to his lesser known East Asian skyscrapers of the 1990s Situating Rudolph within the architectural discourse of his day Rohan shows how Rudolph countered the perceived monotony of mid century modernism with a dramatically expressive architecture for postwar America exemplified by his Yale Art and Architecture Building of 1963 famously clad in corrugated concrete The fascinating story of Rudolph s spectacular rise and fall considerably deepens longstanding conceptions about postwar architecture Rudolph emerges as a pivotal figure who anticipated new directions for architecture ranging from postmodernism to sustainability **Art and Architecture** Neil Spiller, 2023-08-28 The link between architecture and art and the sublimity it can create has a history that stretches back millennia From cave paintings to the stained glass and saintly icons in churches and cathedrals to the geometric and calligraphic treatments of mosques and contemporary artists channelling architecture and vice versa and so much else This AD is about the contemporary interactions between living artists and architects and the artistic practices such as poetry and abstractions that architects adopt to develop ideas for their projects The issue features artists architects curators musicians poets and designer craftspeople illustrating the current rich mix of architectonic constructions interventions and set pieces that range from musical performance to exhibition designs glass works and digital 3D scanning It lays out the wide spectrum and beauty of these sublime correspondences with contributions from architects about their own artistic practices and creative works viewed through the eyes of architectural commentators An explosion of colour form and creative tactics for making multifaceted work that above all is architectural it offers a cornucopia of possibilities Contributors Peter Baldwin Kathy Battista Nic Clear Mathew Emmett Paul Finch Paul Greenhalgh Hamed Khosravi Eva Menuhin Felix Robbins and Simon

Munch, 2021-04-16 The history of modern design and architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture These attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art mostly associated with but certainly not limited to Richard Wagner's theoretical writings and musical dramas This utopian dream of the Gesamtkunstwerk or Total Work of Art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories cities and even modern media As a result the experiments ranged from music poetry and drama to architecture design visual communication and city planning These ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today but their complex and often problematic roots are mostly ignored Design and architecture have delivered some of the broadest and most influential experiments with the Gesamtkunstwerk from garden cities for workers and corporate identity design to the German AEG corporation **Multispace** Owen Hopkins, 2023-10-30 Guest edited by Owen Hopkins Multispace exists at the intersection of the physical and digital and in the blurring of their previously clear dividing lines Multispace is not a single space but a hybrid space where in effect we occupy multiple spaces simultaneously We enter it on a Zoom call when we are in our office and in a meeting with 20 people when we are cycling down a country lane whilst racing against thousands of others who also use the Strava app when we are watching a TV show while live tweeting or perhaps most literally when wandering around the local park looking for creatures that only appear on a smartphone screen A fundamental question of this AD is why the phenomena that multispace describes are of concern to architects The answer is that multispace points to a situation that is at root an architectural one Offering both a collective and highly personalised experience static and dynamically customisable and above all at the same time public and private multispace lies at the centre of a set of tensions concerns and preoccupations at the core of our conception of architecture as theory and practice It is the messy space between with rough and uneven edges that are constantly shifting Contributors Aleksandra Belitskaja Alice Bucknell Jesse Damiani Wendy Fok Andrew Kovacs Lara Lesmes and Fredrik Hellberg Micaela Mantegna Holly Nielsen Giacomo Pala Paula Strunden Lucia Tahan and Francesca Torello and Joshua Bard Featured architects and artists iheartblob Ibiye Campis Office Kovacs Space Popular and Liam Young Space Architecture Neil Leach, 2015-01-12 Forty years on from the first moon landing architecture in Space is entering a new era Over the last decade there has been a fundamental shift in the Space industry from short term pioneering expeditions to long term planning for colonisation and new ventures such as Space

tourism Architects are now involved in designing the interiors of long term habitable structures in Space such as the International Space Station researching advanced robotic fabrication technologies for building structures on the Moon and Mars envisioning new space yachts for the super rich and building new facilities such as the Virgin Galactic Spaceport America in New Mexico designed by Foster Partners Meanwhile the mystique of Space remains as alluring as ever as high profile designers and educators such as Greg Lynn are running design studios drawing upon ever more inventive computational design techniques This issue of AD features the most significant current projects underway and highlights key areas of research in Space such as energy materials manufacture and robotics It also looks at how this research and investment in new technologies might transfer to terrestrial design and construction Space architects Constance Adams Marc Cohen Ondrej Doule Sandra Huplik Meusburger Scott Howe Brent Sherwood Madhu Thangavelu Andreas Vogler Robert Zubrin Architects Bevk Perovic Arhitekti Dekleva Gregoric Arhitekti Foster Partners Neil Leach Greg Lynn OFIS architects SADAR VUGA *Design through Dialogue* Karen A. Franck, Teresa von Sommaruga Howard, 2010-02-15 Completed projects receive more public attention than the process of their creation and so the myth that architects design buildings alone lives on In fact architects work with a great many others and the relationships that develop particularly with clients have a significant impact on design *Design through Dialogue* explores the relationship between client and architect through the lens of four overlapping activities that occur during any project relating talking exploring and transforming Cases of design and collaboration range from smaller scale retail residential and educational projects in the US Sweden the UK and the Pacific Rim to large institutions including Seattle's Central Library the National Museum of the American Indian in Washington DC the Supreme Court in Jerusalem and the Museum of New Zealand Material is taken from interviews with clients and architects and research in psychotherapy group dynamics and design studies Throughout the book aspects of process are linked to design outcomes to illustrate how architects and clients collaborate creatively *Hierophantic Landscapes* Richard Leviton, 2011-09-26 The Earth is poised to make a great disclosure Its a hierophant But what's a hierophant A person who reveals the holy light But it can also be a landscape or a planet And what's the holy light It is the structure of reality and consciousness a map of the heavenly realms the engineering blueprint of Creation Some people call this imminent disclosure the Apocalypse and run for cover But that is mistaken Apocalypse means the revelation of the divine revelation It means the end of our picture of the world as we know it The world itself will be fine even better than fine Splendid Illumined The Architect of reality lays down His cards face up and you see the whole deck Here is the truth of yourself and the Earth How will this disclosure work What we call sacred sites and holy landscapes will start revealing themselves in full to us in all their geomantic and visionary richness That's the inner patterning of their design their arrays of Light temples and subtle palaces primed for our visionary adventures and edification The Earth needs us to have these adventures and visions because that's how we keep the planet healthy *Hierophantic Landscapes* visits five landscapes from

Norway and England to California and Mexico providing firsthand reports on the visions and adventures of a small band of geomancers as they seek to unravel the mysteries of the Earth Maybe not such a small band because along the way we encounter angels landscape devas Nature Spirits and otherworldly mentors and revel in vistas of the ancient past of the Earth when that revelation was as fresh as a sunrise as it will soon be again **Res: Anthropology and Aesthetics, 61/62: Spring/Autumn 2012** Hung Wu, Jaś Elsner, 2013-02-04 Res 61 62 includes Chinese coffins from the first millennium b c and early images of the afterworld by Alain Thote Art and personhood by Björn Ewald Western Han sarcophagi and the transformation of Chinese funerary art by Zheng Yan Reading identity on Roman strigillated sarcophagi by Janet Huskinson and other papers *Design Thinking and Storytelling in Architecture* Peter G. Rowe, Yoeun Chung, 2023-12-18 This book offers a systematic account of the process of designing in architecture Design thinking can be regarded as a fundamentally different way of knowing the world and a particular form of addressing creative problems In this publication the authors undertake to explore multiple and often controversial theoretical stances on the topic Underlying principles of inquiry are present in all designing and a process takes place involving empathy or listening carefully before storytelling Prototyping and testing of solutions are illustrated in the book with many examples seen from different vantage points In short design thinking is a way of knowing and enabling being in the world and leads to a better understanding of architecture Brilliant tour de force through several centuries of design thinking Peter G Rowe is the internationally renowned author of some thirty books Lavishly illustrated volume with attractive graphic design Readings in Latin American Modern Art Patrick Frank, 2008-10-01 This important and welcome volume is the first English language anthology of writings on Latin American modern art of the twentieth century The book includes some fifty seminal essays and documents including statements interviews and manifestoes by artists that encompass the broad diversity of this emerging field Many of these materials are difficult to access and some are translated here for the first time Together the selections explore the breadth and depth of Latin American modern art as well as its distinctive evolution apart from American and European art history Included in this collection are fascinating ideas and insights on the impact of the avant garde in the 1920s the Mexican mural movement Surrealism and other fantasy based styles modern architecture geometric and optical art concrete and neo concrete art and political conceptualism For students and scholars of Latin American art the volume offers an invaluable collection of primary and secondary sources
