Beyond the Science/Religion Debate Guido O. Perez, Guido O. Perez MD, 2008 This book summarizes the author's personal philosophy and conception of reality based on the latest scientific evidence It explains the strengths and the weaknesses of the religious and scientific worldviews and comes up with an alternative view based on Naturalism For Naturalists the world is a unitary causally interconnected system without supernatural entities or systemic purpose Knowledge about the world comes from the study of Natural Sciences especially physics and molecular biology Evolutionary Psychology is used to explain human behavior including our irrationality and tendency for self destruction which are the causes of the current world crises Solving the problems of inequality violence and environmental destruction may permit us to survive the 21st century and enjoy a bright future This worldview can be a source of meaning and spirituality similar to that of liberal religion

Religion Versus Spirituality: Can Spirituality Flourish Apart from Organized Religion? (Debates in Dialogues) Joseph Schrock, 2019-03-20 This is a book that is devoted to helping inquiring spiritual thinkers find a path of genuine spirituality that leads them into spiritual growth and true harmony with the Divine Three imaginary characters intensely and passionately debate questions concerning the reliability of Judeo Christian scriptures questions about whether the concept of original sin in the Garden of Eden is a viable concept for the twenty first century etc Intense debates flare over questions about sexual morality whether Pauline theology can be regarded as credible in our age of scientific knowledge whether Heaven and Hell are real and numerous other issues that are of vital concern to spiritual seekers The three debaters in these dialogues are 1 An independent spiritual seeker 2 A Christian apologist devoted to a defense of mainstream Christianity and 3 A devoted skeptic who questions all things religious or spiritual If you are a spiritual seeker one who finds that the materialist secularist scientific paradigm for all reality leaves you cold this book can engagingly point you in the direction of ever deepening spiritual insights that will enable you to progressively advance toward genuine harmony with Ultimate Reality the Creator and Ruler of our wondrous universe This book can show you that you need never to abandon intelligence logic science or clear and rational thinking in order to attain a profound spirituality True spirituality need not be imprisoned in the straitjackets of dogmatic or narrow thinking about reality The Divine whom you can learn to serve faithfully and devotedly does not demand of you a repudiation of your God given intellect and God is never scared of humble and earnest questions It was not stated flippantly nor erroneously that in regard to true spirituality Seek and you shall find knock and the door will be opened to you Many of the claims made in this book incorporate the conviction that one must not necessarily buy into the theology of any extant organized religion but can have a direct line to the Creator receiving thereby

inspiration encouragement empowerment inner peace and growth toward spiritual perfection For many in our scientifically enlightened age religion is pushed into the backwaters and passionate devotion to spirituality is regarded as passe This need not be so because the Divine permeates every atom in this universe and the energy that sustains the universe is also highly willing to inspire direct and guide your life We need not settle for science as the new god because powerful though it is as a wonderful instrument it is nevertheless constrained by the limitations of human powers and our relatively puny intellects Your life can transcend what science has to offer because science is bereft of powers to master the mind and the spirit of humanity By availing yourself of the hints and guidelines offered in this book you can discover a glorious path of growing inner peace and joys that transcend the powers of human understanding Freedom of your will opens for you the door to genuine choice a choice that could potentially have the significance of Heaven versus Hell

Science and Religion in a Post Colonial World Zainal Abidin Bagir, 2005 This book addresses selected issues in the emerging field of science and religion and at the same time acknowledges the situation of Indonesia or more generally a Third World country as the locus for this discussion The book is concerned with how various world religions in particular Islam and Christianity respond to shared challenges posed by science as new theories in cosmology physics and the life sciences have brought challenges to many traditional religious ideas There are also more generally epistemological challenges that reflect the recent success of natural science as a mode of inquiry These are felt as problems in both the Western and non Western worlds but with an important difference While the Western world is considered the legitimate owner of modern science some in the Muslim world and the Third World more generally see modern science as a cultural alien imposed on them due to its initial introduction in the colonial period

Theology, Evolution and the Mind Neil Spurway, 2009-05-05 In pre scientific thought mind itself and its religious perceptions particularly were considered gifts from God injected into a previously created world of matter By contrast all the contributors to this book accept an evolutionary account of life mind and its religious dispositions However they hold more divergent views on the relation of mind to body and brain on the validity of those religious dispositions and on how far even Christ and his predicted Second Coming may be seen as aspectc of the evolutionary process The seventeen contributions are rewritten and extended versions of papers first delivered at the annual conference of the UK s Science and Religion Forum held at Canterbury Christ Church College in Sept 2007 Though most speakers were British representatives from The Netherlands Jordan Zimbabwe and USA also contributed Invited individual chapters consider the general pattern of evolutionary thought arguing that it can make a major contribution to the maturation of theology archeological evidence for the emergence of religion and the proposal that it was an inevitable phase in human evolution the contribution of religious concepts to the development of our species and the question whether that provides any ground for accepting them as true the unresolved debate whether mind is a separate entity from brain or a consequence of its activity and the melding of paleo anthropology with theology to provide an integrated account of humanity and its culmination in Christ Each of these papers

is the subject of an individual expert response and they are all drawn together in an overview essay which concludes the first part of the book The second shorter part contains a selection from the papers contributed by registrants for the meeting Their topics are whether mathematics consists of truths discovered or thought forms developed by human minds ecological awareness as an evolutionary development the neurobiology of freewill and sin an evolutionary perspective on holistic medicine and the impressive fruitfulness of juxtaposing neurophysiological and biblical concepts of the human body mind

your expectations if you can only generate it yourself and if you are the first to do so But can you Because if you cannot control your reasoning and therefore the generation of your own thoughts at will then can you actually reason Or who exactly does the reasoning for you if you cannot even control it Can you identify it Can you model it Do you know where thoughts come from No we do not know it yet or this is what psychology states but can you understand your thoughts and entire cognition even without the help of psychology Do you know what thoughts are and how the human thinking generates them along with all needs ideas feelings impressions memories and decisions Some thoughts are conscious and some unconscious and many times it seems that even the conscious cognitive activity remains uncontrolled not through human limitations but through human lack of understanding of the human mind and of the entire human cognitive activity There is more to know about thoughts reasoning intelligence and behavior and we will see it throughout the book along with everything necessary to manage thoughts and thinking in all circumstances Because you cannot understand anything in life at a higher cognitive level if you do not understand the human thoughts for the simple reason that you use thoughts throughout your reasoning in order to understand everything in life including yourself the world and your place and meaning in life and in the world Even more thoughts in general and your thoughts in particular define your reasoning and intelligences since intelligences count for the world through their reasoning thoughts and interconnectivity just the way living beings count for the world through their acts behavior and interconnectivity Thoughts construct your cognitive system and they develop you wholly throughout life through the gradual improvement of your cognitive system This is why you are who you are because you think the way you do because you have the thoughts that you do and certainly because you think exactly the thoughts that you do Throughout this book we integrate thoughts within the body brain mind and intelligences studying them in all details and from all perspectives We study how thoughts originate develop and are controlled at the cognitive and social levels If you want to know more about thoughts ideas feelings learning and reasoning in general this book is for you
