

DE BONO'S THINKING COURSE

Edward de Bono

Edward de Bono is considered by many to be the leading authority in the world on the direct teaching of thinking as a skill. For over 25 years he has pioneered 'thinking about thinking'. He has written 45 books with translations into 27 languages including Chinese, Hebrew, Arabic, Bahasa, Korean and Slovene. His thinking lessons are widely used, with millions of pupils ranging from those in remote South African villages to those in such leading schools as Norfolk Academy in Virginia, USA.

His instruction in thinking has been sought by many of the leading business corporations in the world and also by governments. He founded the International Creative Forum which has as members the leading corporations in each field (IBM, Du Pont, Nestlé, British Airways, etc.). He has also set up the International Creativity Office in New York to work with the UN and other international bodies. He has been invited to lecture in 51 different countries.

Dr de Bono was a Rhodes Scholar to Oxford and has held appointments at the universities of Oxford, Cambridge, London and Harvard. His background is in medicine and in psychology. He is the originator of the term 'lateral thinking', which is now in the Oxford English Dictionary. He is also the inventor of the classic L-Game, which is said to be the simplest real game ever invented. This game was invented as the result of a challenge by the late Professor Littlewood at Cambridge, one of the greatest British mathematicians.

Design Studies Audrey Bennett,2006-08-31 In an age of globalization and connectivity the idea of mainstream culture has become quaint Websites magazines books and television have all honed in on ever diversifying subcultures hoping to carve out niche audiences that grow savvier and more narrowly sliced by the day Consequently the discipline of graphic design has undergone a sea change Where visual communication was once informed by a designer s creative intuition the proliferation of specialized audiences now calls for more research based design processes Designers who ignore research run the risk of becoming mere tools for communication rather than bold voices Design Studies a collection of 27 essays from an international cast of top design researchers sets out to mend this schism between research and practice The texts presented here make a strong argument for performing rigorous experimentation and analysis Each author outlines

methods in which research has aided their design whether by investigating how senior citizens react to design aesthetics how hip hop culture can influence design or how design for Third World nations is affected by cultural differences Contributors also outline inspired ways in which design educators can teach research methods to their students Finally Design Studies is rounded out by five annotated bibliographies to further aid designers in their research This comprehensive reader is the definitive reference for this new direction in graphic design and an essential resource for both students and practitioners

Discussion-Based Online Teaching To Enhance Student Learning Tisha Bender, 2023-07-03 The new edition of what is now considered a classic on online learning has been expanded by about a third to reflect new opportunities offered by social media new insights and ideas derived from the author's teaching in the eight years since she wrote the first edition as well as from extensive research in the latest literature In particular Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed not so much because of the advent of the Internet but because of the potential divide between the expectations and practices of students who are digital natives of the digital revolution and those of their teachers who are mostly digital immigrants She addresses the question do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning This is a book for all educators and administrators in higher education in any discipline engaged in or contemplating offering online classes that involve discussion or collaborative learning It is relevant both to faculty teaching a hybrid and face to face classes and courses conducted entirely online
