The debt boomerang, 1992 Handbook of Globalization, Governance, and Public Administration Ali Farazmand, Jack Pinkowski, 2006-07-25 Globalization transcends borders and cultures as it develops both from the natural flow of information and communication technologies and as a directed and driven quest for global hegemony by self serving corporations and world political heavyweights It bears a multifaceted web of influence that manifests in inequalities in growth prosperity and

Transnational Conflicts William I. Robinson, 2020-05-05 In this timely and provocative study William I Robinson challenges received wisdom on Central America He starts with an exposition on the new global capitalism Then drawing on a wide range of historical documentation interviews and social science research he proceeds to show how capitalist globalization has thoroughly transformed the region disrupting the conventional pattern of revolutionary upheaval civil wars and pacification and ushering in instead a new transnational model of economy and society Beyond his focus on Central America Robinson provides a critical framework for understanding development and social change in other regions of the world in the age of globalization Demonstrating how the very forces of capitalism have brought into being new social agents and political actors unlikely to acquiesce in the face of the emerging order *Transnational Conflicts* shows why the Isthmus along with other regions is likely to return to the headlines in the near future Quantifying Sustainable Development

Messer, Marc J. Cohen, Jashinta D'Costa, 1998 Includes statistics **Trade and Sustainable Development** DIANE Publishing Company, 1994-07 **The Cancer Stage of Capitalism** John McMurtry, 2013-07-20 The Cancer Stage of Capitalism is a modern classic of critical philosophy and political economy renowned for its depth and comprehensive research It provides a step by step diagnosis of the continuing economic collapse in the US and Europe and has had an enormous influence on new visions of economic alternatives John McMurtry argues that our world disorder of unending crises is the predictable result of a cancerous economic system multiplying out of all control and destroying ecological social and organic life a process he describes as global ecogenocide In this updated edition he explains the social immune response required to fight this cancer prescribing developments akin to the Occupy movement and the Pink Tide democratic social transformation occurring in Latin America In a global cultural orthodoxy that is increasingly hostile to life this book shows the necessity and possibility of building a sustainable society based on a universal commitment to nature and humanity

Development for Peace Cage Banseka, 2005 This book offers not only a comprehensive analysis of the conflicts in Africa but also a milestone suggestion of what could be a breakthrough in attempts at resolving them It suggests that underdevelopment lies at the genesis of most of the conflicts The herein enunciated Developmental Peace Theory offers a more tenacious solution to the conflicts than the traditional Democratic Peace Theory Conflicts would be avoided if Africans could concentrate on developing those aspects that protect them from preventable morbidity and sporadic hunger This book is an interesting expose of the often neglected development approach to African conflicts It contrasts the African democratisation process and development while providing case study analysis to illustrate the real effects the phenomena have had on political transition and nation building on the ground *Cosmopolitanism and the Evils of the World* Michael H. DeArmey, 2020-05-28 This book analyses five forms of transnational evils and offers cosmopolitan recommendations for reducing their occurrence With civilisation in crisis it is crucial now more than ever to attempt to mitigate the catastrophes that face us in the decades to come In a compelling and frightening account of transnational evil DeArmey identifies and explores in depth the dark side of human behaviour from genocide slavery torture and terrorism to the greatest disaster of our time the worldwide destruction of the earth's biosphere Building on Kant's theory of a new world organisation designed to eliminate the evil of war and strengthen the world community DeArmey develops a biotic and value based theory of dignity reconstructing a cosmopolitan world order that supports the Kantian theories of respect care and hospitality Cosmopolitan changes to the United Nations are proposed including a bicameral assembly and crucially an environmental council with legal powers In each chapter cosmopolitan recommendations are made that will reduce the occurrence of the transnational evil in question it is through these recommendations that the dignity and world citizenship of humanity can be protected and strengthened Without them we are headed towards the collapse of civilisation and mass extinction in the biosphere

men In many cases women's activities are not even acknowledged as work Not only do women encounter more obstacles than men in education and training but they are over represented amongst the lowest paid part time workforce enjoying few employment rights Recognition of this has led to adoption of measures over the past two decades to eliminate gender discrimination and to promote equality of opportunity and treatment for women workers This book is a contribution to the efforts being made mainly by women themselves to ensure that these initiatives are implemented The author draws together research on gender work and development and emphasises that the concept of work should include not only paid labour but all of those activities which contribute to production and development Human Insecurity David Roberts, 2013-07-04

Human Insecurity is concerned with our refusal to confront the millions of avoidable deaths of women and children each year Those missing millions are rarely the subject of conventional security studies yet such avoidable deaths are a vital part of the notion of security more broadly understood The book argues that such deaths are caused by the man made structures of neoliberalism and andrarchy and argues that the debate on human security can be reinvigorated by looking at the unarmed civilian role in causing the deaths of millions of innocent people from child deaths from preventable disease to honour killings David Roberts claims that by facing up to this relationship between social structures and massive avoidable human suffering we can create another system less prone to global violence This book is a powerful intervention in the debate on human security and an urgent call to face up to our responsibilities to the millions killed needlessly each year **A Critical**

Introduction to Law Wade Mansell, Belinda Meteyard, Alan Thomson, 2015-06-26 Challenging the usual introductions to the study of law A Critical Introduction to Law argues that law is inherently political and reflects the interests of the few even while presenting itself as neutral This fully revised and updated fourth edition provides contemporary examples to demonstrate the relevance of these arguments in the twenty first century The book includes an analysis of the common sense of law the use of anthropological examples to gain external perspectives of our use and understanding of law a consideration of central legal concepts such as order rules property dispute resolution legitimation and the rule of law an examination of the role of law in women's subordination and finally a critique of the effect of our understanding of law upon the wider world Clearly written and admirably suited to provoking discussions on the role of law in our contemporary world this book is ideal for undergraduate and postgraduate students reading law and will be of interest to those studying legal systems and skills courses jurisprudence courses and law and society
