Debunking The Genocide Myth:

Debunking the Genocide Myth Paul Rassinier, 1978 **Genocide Denials and the Law** Ludovic Hennebel, Thomas Hochmann, 2011 In *Genocide Denials and the Law* Ludovic Hennebel and Thomas Hochmann offer a thorough study of the relationship between law and genocide denial from the perspectives of specialists from six countries This controversial topic provokes strong international reactions involving emotion caused by denial along with concerns about freedom of speech The authors offer an in depth study of the various legal issues raised by the denial of crimes against humanity presenting arguments both in favor of and in opposition to prohibition of this expression They do not adopt a pro or contra position but include chapters written by proponents and opponents of a legal prohibition on genocide denial Hennebel and Hochmann fill a void in academic publications by comparatively examining this issue with a collection of original essays They tackle this diverse topic comprehensively addressing not only the theoretical and philosophical aspects of denial but also the specific problems faced by judges who implement anti denial laws *Genocide Denials and the Law* will provoke discussion of many theoretical questions regarding free speech including the relationship between freedom of expression and truth hate memory and history **Denying History** Michael Shermer, Alex Grobman, 2023-11-15 *Denying History* takes a bold and in depth look at those who say the Holocaust never happened and explores the motivations behind such claims While most commentators have dismissed the Holocaust deniers as antisemitic neo Nazi thugs who do not deserve a response historians Michael Shermer and Alex Grobman have immersed themselves in the minds and culture of these Holocaust revisionists In the process they show how we can be certain that the Holocaust happened and for that matter how we can confirm any historical event This edition is expanded with a new chapter and epilogue examining current shockingly mainstream revisionism *Denying History* takes a bold and in depth look at those who say the Holocaust never happened and explores the motivations behind such claims While most commentators have dismissed the Holocaust deniers as antisemitic neo Nazi thugs who do not dese **Antisemitism in North America** Steven K. Baum, Neil J. Kressel, Florette Cohen, Steven Leonard Jacobs, 2016-01-27 In *Antisemitism in North America* the editors have brought together an impressive array of scholars from diverse disciplines and political orientations to assess the condition of the Jews in the United States Canada Mexico and the Caribbean The contributors do not always agree with each other but they offer perspectives of why the Jewish experience in North America has neither been free from antisemitism nor ever so unwelcoming and dangerous as the countries from which they came Contributors examine antisemitism in culture politics religion law and higher education **Histories and Fallacies** Carl R. Trueman, 2010 *Histories and Fallacies* is a primer on the conceptual and methodological problems in the discipline of history from publisher description **Why People Believe Weird Things** Michael Shermer, 2011-02-01 A survey of a range of irrationalisms with explanations of their empirical and logical flaws this book describes the differences between science and pseudo science and goes on to describe and critique popular contemporary irrationalisms Why do smart people believe weird

things Why do so many people believe in mind reading past life regression therapy extra terrestrial abduction and ghosts What is behind the rise of scientific creationism and Holocaust denial In an age of supposed scientific enlightenment why do we appear more impressionable than ever Scientific historian and director of the Skeptics Society Michael Shermer debunks these extraordinary claims in a no holds barred assault on the popular superstitions and confused prejudices of our time Exploring the very human reasons behind otherworldly phenomena conspiracy theories and cults Shermer explains why are they are so appealing to so many Skepticism is the agent of reason against organized irrationalism and is therefore one of the keys to human social and civic decency Stephen Jay Gould from his foreword Shermer reveals the darker side of wishful thinking through the recovered memory movement satanic rituals and other modern witch hunts and ideologies of racial superiority Confronting those who take advantage of the gullibility of other people to advance their own self serving agendas Why People Believe Weird Things is compelling and often disturbing It is a perceptive portrait of the human capacity for self delusion and a celebration of the scientific spirit **Mother Jones Magazine** ,1981-07 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues Denying the Holocaust Deborah E. Lipstadt,2012-12-18 The denial of the Holocaust has no more credibility than the assertion that the earth is flat Yet there are those who insist that the death of six million Jews in Nazi concentration camps is nothing but a hoax perpetrated by a powerful Zionist conspiracy Sixty years ago such notions were the province of pseudohistorians who argued that Hitler never meant to kill the Jews and that only a few hundred thousand died in the camps from disease they also argued that the Allied bombings of Dresden and other cities were worse than any Nazi offense and that the Germans were the true victims of World War II For years those who made such claims were dismissed as harmless cranks operating on the lunatic fringe But as time goes on they have begun to gain a hearing in respectable arenas and now in the first full scale history of Holocaust denial Deborah Lipstadt shows how despite tens of thousands of living witnesses and vast amounts of documentary evidence this irrational idea not only has continued to gain adherents but has become an international movement with organized chapters independent research centers and official publications that promote a revisionist view of recent history Lipstadt shows how Holocaust denial thrives in the current atmosphere of value relativism and argues that this chilling attack on the factual record not only threatens Jews but undermines the very tenets of objective scholarship that support our faith in historical knowledge Thus the movement has an unsuspected power to dramatically alter the way that truth and meaning are transmitted from one generation to another

Post-Zionism, Post-Holocaust Elhanan Yakira,2010 This book contains three essays that examine three forms of anti Zionism and their use of the Holocaust to delegitimize Israel Holocaust Denial Robert S. Wistrich,2012-10-01 Holocaust Denial The Politics of Perfidy provides a graphic and compelling global panorama of past and present variations on this toxic phenomenon The volume examines right and left wing French negationism post Communist Holocaust deniers in Eastern

Europe the spread of denial to Australia Canada South Africa and even to Japan Leading scholarly experts also explore the close connection between Holocaust denial global conspiracy theories antisemitism and radical anti Zionism especially in Iran and the Arab world

Revisionist Histories Marnie Hughes-Warrington,2013-07-18 Revision and revisionism are generally seen as standard parts of historical practice yet they are underexplored within the growing literature on historiography In this accessibly written volume Marnie Hughes Warrington discusses this paucity of work on revision in history theory and raises ethical questions about linear models and spatial metaphors that have been used to explain it Revisionist Histories emphasises the role of the authors and audiences of histories alike as the writers and rewriters of history Through study of digital environments graphic novels and reader annotated texts this book shows that the sides of history cannot be disentangled from one another and that they are subject to flux and even destruction over time Incorporating diverse and controversial case studies including the French Revolution Holocaust Denial and European settlers contact with Native Americans and Indigenous Australians Revisionist Histories offers both a detailed account of the development of revisionism and a new more spatial vision of historiography An essential text for students of historiography

Beyond the Fascist Century Constantin Iordachi,Aristotle Kallis,2020-11-11 This book evaluates the current and future state of fascism studies reflecting on the first hundred years of fascism and looking ahead to a new era in which fascism studies increasingly faces fresh questions concerning its relevance and the potential reappearance of fascism This wide ranging work celebrates Roger Griffin s contributions to fascism studies in conceptual and definitional terms but also in advancing our understanding of fascism which have informed related research in a number of fields and directions since the 1990s Bringing together three generations of fascism scholars the book offers a combination of broad conceptual essays and contributions focusing on particular themes and facets of fascism The book features chapters which although diverse in their approaches explore Griffin s work while also engaging critically with other schools of thought As such it identifies new avenues of research in fascism studies placing Griffin s work within the context of new and emerging voices in the field

Desire, Violence & Divinity in Modern Southern Fiction Gary M. Ciuba,2007 In this study Gary M Ciuba examines how four of the South s most probing writers of twentieth century fiction Katherine Anne Porter Flannery O Connor Cormac

McCarthy and Walker Percy expose the roots of violence in southern culture Ciuba draws on the paradigm of mimetic

violence developed by cultural and literary critic Rene Girard who maintains that individual human nature is shaped by the desire to imitate a model

BOOK JACKET **How Was It Possible?** Peter Hayes,2015 As the Holocaust passes out of living memory future generations will no longer come face to face with Holocaust survivors But the lessons of that terrible period in history are too important to let slip past How Was It Possible edited and introduced by Peter Hayes provides teachers and students with a comprehensive resource about the Nazi persecution of Jews Deliberately resisting the reflexive urge to dismiss the topic as too horrible to be understood intellectually or emotionally the anthology sets out to provide answers to

questions that may otherwise defy comprehension This anthology is organized around key issues of the Holocaust from the historical context for antisemitism to the impediments to escaping Nazi Germany and from the logistics of the death camps and the carrying out of genocide to the subsequent struggles of the displaced survivors in the aftermath Prepared in cooperation with the Jewish Foundation for the Righteous this anthology includes contributions from such luminaries as Jean Ansel Saul Friedlander Tony Judt Alan Kraut Primo Levi Robert Proctor Richard Rhodes Timothy Snyder and Susan Zuccotti Taken together the selections make the ineffable fathomable and demystify the barbarism underlying the tragedy inviting readers to learn precisely how the Holocaust was in fact possible *The Dispossessed Majority* Wilmot Robertson,1981

The Past And Future Of Law E.O. Blunsom,2013-04 We live in our nations but what other nations do may affect us and sometimes immensely We are all members of the world community of people living in our dangerous world The purpose of the following book is to consider the laws and practices that govern our nations and through them our world It builds on the premise that unless we change and improve our laws the human race may not survive in the future It is not about any particular nation but about all nations Many citizens believe their nations are ideal providing freedom and justice and with governments representative of the people This may be true in their minds and according to their beliefs but the dangers and sufferings of the world continue They are the concern of us all because they affect all people The world has changed vastly from the past It is technically more advanced but also more dangerous because of nuclear and other deadly weapons and widespread poverty and diseases in overgrown populations The past in spite of its myriad wars and premature deaths has survived Can our present world using the same instruments power nations positive laws strictly enforced retaliations and harsh punishments also survive The answer may be an unequivocal no reverberating through future power wars We need a fresh outlook different laws and a new phase of global society to replace the past Legal philosophers have proclaimed many varieties of laws including eternal laws provided by God and natural laws according to human nature Most are nonenforced laws that they say Ought to be Positive laws are those that exist made and enforced by nations **Redefining Reparations**

Lorena De Vita,Constantin Goshler,2025-03-24 This edited volume offers a new interpretation of the historically momentous 1952 Wassenaar negotiations between representatives of the Federal Republic of Germany Israel and the Jewish Claims Conference to negotiate reparations compensation and restitution in the aftermath of the Holocaust Wassenaar 1952 marked the first time that reparations were the subject of negotiations between representatives of victims and perpetrators following mass human rights violations and genocide The reparations program that Germany established after the Holocaust eventually became a point of reference for many calling for reparations to deal with the aftermath of other atrocities from colonialism to slavery in contexts as diverse as Namibia the United States and beyond Combining perspectives from history anthropology international relations and transitional justice this volume reassesses the course and global legacy of these negotiations The book s holistic and nuanced intervention in the study of the politics of repair makes it essential reading for

students of history law transitional justice and political science interested in the complex topic of reparations **Speaking the Unspeakable in Postwar Germany** Sonja Boos, 2015-03-10 In this an interdisciplinary study of a diverse set of public speeches given by major literary and cultural figures in the 1950s and 1960s Sonja Boos demonstrates that these speakers both facilitated and subverted the construction of a public discourse about the Holocaust in postwar West Germany

Writing War in the Twentieth Century Margot Norris, 2000 The twentieth century will be remembered for great innovation in two particular areas art and culture and technological advancement Much of its prodigious technical inventiveness however was pressed into service in the conduct of warfare Why asks Margot Norris did violence and suffering on such an immense scale fail to arouse artistic and cultural expressions powerful enough to prevent the recurrence of these horrors Why was art not more successful through its use of dramatic emotionally charged material its ability to stir imagination and arouse empathy and outrage in producing an alternative to the military logic that legitimates war Military argument in the twentieth century has been fortified by the authority of the rationalism that we attribute to science Norris argues Warfare is therefore legitimized by powerful discourses that art's own arsenal of styles and genres has limited power to counter Art's difficulty in representing the violent death of entire generations or populations has been particularly acute Choosing works that have become representative of their historically violent moment Norris explores not only their aesthetic strategies and perspectives but also the nature of the power they wield and the ethical engagements they enable or impede She begins by mapping the altered ethical terrain of modern technological warfare with its increasing targeting of civilian populations for destruction She then proceeds historically with chapters on the trench poetry and modernist poetry of World War I Hemingway's A Farewell to Arms and Erich Maria Remarque's All Quiet on the Western Front both the book and the film of Schindler's List the conflicting historical stories of the Manhattan Project a comparison of American and Japanese accounts of Hiroshima Francis Ford Coppola's film Apocalypse Now and the effects of press censorship in the Persian Gulf War By looking at the whole span of the century's writing on war Norris provides a fascinating critique of art's ethical power and limitations along with its participation in as well as protest against the suffering that human beings have brought upon themselves The Holocaust Linda S Katz, 2014-02-04 Comprised of a wide breadth of scholarly materials and diverse articulations The Holocaust Memories Research Reference will help you guide others in Holocaust research and show you how you can avoid contributing to the popularization and trivialization of the Holocaust You'll find in it poems by the prolific American poet Lyn Lifshin an essay by Arnost Lustig work by Roselle Chartock commentary by Howard Israel on the controversial Pernkopf Atlas writing on the historian's role by Michael Marrus a top Holocaust scholar and views on linguistic distortions by Sanford Berman the well known cataloger In addition you'll read about the U S Memorial Holocaust Museum preparing a Holocaust unit for high school students incorporating contemporary Holocaust articles into Holocaust study Holocaust webliographies comparative genocide studies and the future of Holocaust research Holocaust denial

literatureHolocaust reference work in its preferred form doesn't substitute method empiricism and quantification for substance emotion and qualitative discussion This form is captured and preserved for the benefit of future survivors and scholars in The Holocaust Memories Research Reference Informed by years of experience and suffering it will take you and your library visitors to the heart of research and allow you to re search the human heart
