Decade Of Concurrency:

A Decade of Concurrency: Reflections and Perspectives J. W. de Bakker, W.-P. de Roever, G. Rozenberg, 1994 The REX School Symposium A Decade of Concurrency Reflections and Perspectives was the final event of a ten year period of cooperation between three Dutch research groups working on the foundations of concurrency Ever since its inception in 1983 the goal of the project has been to contribute to the cross fertilization between formal methods from the fields of syntax semantics and proof theory aimed at an improved understanding of the nature of parallel computing The material presented in this volume was prepared by the lecturers and their coauthors after the meeting took place In total the volume constitutes a thorough state of the art report of the research activities in concurrency **A Decade of Concurrency** J.W. de Bakker, W.-P. de Roever, G. Smolka, 2001-03-16 Process Algebra is a formal description technique for complex computer systems especially those involving communicating concurrently executing components It is a subject that concurrently touches many topic areas of computer science and discrete math including system design notations logic concurrency theory specification and verification operational semantics algorithms complexity theory and of course algebra This Handbook documents the fate of process algebra since its inception in the late 1970 s to the present It is intended to serve as a reference source for researchers students and system designers and engineers interested in either the theory of process algebra or in learning what process algebra brings to the table as a formal system description and verification technique The Handbook is divided into six parts spanning a total of 19 self contained Chapters The organization is as follows

Part 1 consisting of four chapters covers a broad swath of the basic theory of process algebra Part 2 contains two chapters devoted to the sub specialization of process algebra known as finite state processes while the three chapters of Part 3 look at infinite state processes value passing processes and mobile processes in particular Part 4 also three chapters in length explores several extensions to process algebra including real time probability and priority The four chapters of Part 5 examine non interleaving process algebras while Part 6 s three chapters address process algebra tools and applications

A 25-Year Perspective on Logic Programming Agostino Dovier, Enrico Pontelli, 2010-06-26 This book celebrates the 25th anniversary of GULP the Italian Association for Logic Programming Authored by Italian researchers at the leading edge of their fields it presents an up to date survey of a broad collection of topics in logic programming making it a useful reference for both researchers and students During its 25 year existence GULP has organised a wide range of national and international activities including both conferences and summer schools It has been especially active in supporting and encouraging young researchers by providing scholarships for GULP events and awarding distinguished dissertations

We in the international logic programming community look upon GULP with a combination of envy admiration and gratitude We are pleased to attend its conferences and summer schools where we can learn about scientific advances catch up with old friends and meet young students It is an honour for me to acknowledge our appreciation to GULP for its outstanding contributions to our field and to express our best wishes for its continuing prosperity in the future

March 2010 Robert Kowalski Imperial College London

Preface On June 18 1985 a group of pioneering researchers including representatives from industry national research labs and academia attended the constituent assembly of the Group of researchers and Users of Logic Programming GULP association That was the starting point of a long adventure in science that 1 we are still experiencing 25 years later This volume celebrates this important event

Concurrent Powers in Federal Systems Nico Steytler, 2017-01-09

Concurrency of powers the exercise of jurisdiction by federal governments and constituent units in the same policy areas is a key if not the central mode of governance in most federal systems today Moreover the experience has been that federal governments dominate the concurrent space giving rise to contestation This volume *Concurrent Powers in Federal Systems Meaning Making and Managing* edited by Professor Nico Steytler is the first to examine from a comparative perspective this crucial issue confronting both established and emerging federations

Case

studies of 16 countries on five continents dissect the various manifestations of concurrency analyse what drives this modern governance mode and review management strategies that seek to guard against central dominance of concurrent areas

Bonsangue,2013-08-23 This book constitutes revised lectures from the 11th Symposium on Formal Methods for Components and Object FMCO 2012 held in Bertinoro Italy in September 2012 The 8 lectures featured in this volume are by world renowned experts within the area of formal models for objects and components The book provides a unique combination of ideas on software engineering and formal methods which reflect the expanding body of knowledge on modern software systems *The Political Economy of HIV in Africa* Deborah

Johnston,Kevin Deane,Matteo Rizzo,2018-10-18 Biomedical revolutions seem to have radically altered the environment for HIV transmission anti retrovirals ARVs and drugs to reduce mother to child transmission promise to cut HIV transmission rates as does male medical circumcision However the hopeful messages of UNAIDS are tempered with warning about expenditure shortfalls and calls for funding Contributions to this book remind us that along with the external financial constraints there have been new fractures in state power and in the organisation of health systems More than this the book fundamentally calls into question whether biomedical interventions can change the social roots of this disease As well as considering new policy approaches the book reasserts a long standing political economy approach to HIV and to adapt it to reflect new competing theoretical approaches The chapters attempt to connect the debates about HIV AIDS to larger discussions about globalisation class differentiation inequity and uneven development in African countries This book was originally published as a special issue of Review of African Political Economy **Advances in Computer Systems**
