Salmon,2006-06-15 As Aristotle stated scientific explanation is based on deductive argument yet Wesley C Salmon points out not all deductive arguments are qualified explanations The validity of the explanation must itself be examined *Four Decades of Scientific Explanation* provides a comprehensive account of the developments in scientific explanation that transpired in the last four decades of the twentieth century It continues to stand as the most comprehensive treatment of the writings on the subject during these years Building on the historic 1948 essay by Carl G Hempel and Paul Oppenheim *Studies in the Logic of Explanation* which introduced the deductive nomological D N model on which most work on scientific explanation was based for the following four decades Salmon goes beyond this model s inherent basis of describing empirical knowledge to tells us not only what but also why Salmon examines the predominant models in chronological order and describes their development refinement and criticism or rejection *Four Decades of Scientific Explanation* underscores the need for a consensus of approach and ongoing evaluations of methodology in scientific explanation with the goal of providing a better understanding of natural phenomena *Contemporary Drift* Theodore Martin,2017-05-30 What does it mean to call something contemporary More than simply denoting what s new it speaks to how we come to know the present we re living in and how we develop a shared story about it The story of trying to understand the present is an integral yet often unnoticed part of the literature and film of our moment In *Contemporary Drift* Theodore Martin argues that the contemporary is not just a historical period but also a conceptual problem and he claims that contemporary genre fiction offers a much needed resource for resolving that problem *Contemporary Drift* combines a theoretical focus on the challenge of conceptualizing the present with a historical account of contemporary literature and film Emphasizing both the difficulty and the necessity of historicizing the contemporary the book explores how recent works of fiction depict life in an age of global capitalism postindustrialism and climate change Through new histories of the novel of manners film noir the Western detective fiction and the postapocalyptic novel Martin shows how the problem of the contemporary preoccupies a wide range of novelists and filmmakers including Zadie Smith Colson Whitehead Vikram Chandra China Mi ville Kelly Reichardt and the Coen brothers Martin argues that genre provides these artists with a formal strategy for understanding both the content and the concept of the contemporary Genre writing with its mix of old and new brings to light the complicated process by which we make sense of our present and determine what belongs to our time

Perinatal Medicine J. Clinch,T.G. Matthews,2012-12-06 Perinatal Medicine is a relatively new specialty sited between the mechanistic approach of traditional obstetrics and the anticipatory and preventative out look expressed in the study of fetal growth which extends into monitoring neo natal progress and development It is of primary importance that obstetricians and neonatologists should think alike and should not allow their interests to develop along separate lines Frequent clinical consultations with neonat ologists cooperating in prenatal care and obstetricians visiting the special nur sery on a regular basis are essential if every fetus is to reach its full potential Such aims have been advanced by previous European Congresses and it was our privilege in Dublin to host the IXth Congress held at the Royal Dublin Society from September 3rd to 5th 1984 Over nine hundred delegates rep resenting thirty nine countries attended the scientific and social programme The theme of the congress was the mature baby The organizers felt that while major advances had been made in the management of prematurity there were still far too many mature fetuses dying and too many deaths in the nor mally formed appropriate weight for gestational age neonate Hence antenatal fetal assessment the management of labour including electronic monitoring in normal women and asphyxial brain damage were major topics Pregnancy hy pertension caesarean section breech presentation diabetes and unexplained mature stillbirth were workshop topics *Sex, Drugs, and Body Counts* Peter Andreas,Kelly M. Greenhill,2011-01-15 At least 200 000 250 000 people died in the war in Bosnia There are three million child soldiers in Africa More than 650 000 civilians have been killed as a result of the U S occupation of Iraq Between 600 000 and 800 000 women are trafficked across borders every year Money laundering represents as much as 10 percent of global GDP Internet child porn is a 20 billion a year industry These are big attention grabbing numbers frequently used in policy debates and media reporting Peter Andreas and Kelly M Greenhill see only one problem these numbers are probably false Their continued use and abuse reflect a much larger and troubling pattern policymakers and the media naively or deliberately accept highly politicized and questionable statistical claims about activities that are extremely difficult to measure As a result we too often become trapped by these mythical numbers with perverse and counterproductive consequences This problem exists in myriad policy realms But it is particularly pronounced in statistics related to the

politically charged realms of global crime and conflict numbers of people killed in massacres and during genocides the size of refugee flows the magnitude of the illicit global trade in drugs and human beings and so on In Sex Drugs and Body Counts political scientists anthropologists sociologists and policy analysts critically examine the murky origins of some of these statistics and trace their remarkable proliferation They also assess the standard metrics used to evaluate policy effectiveness in combating problems such as terrorist financing sex trafficking and the drug trade
