CHEE DIN,HASBOLLAH BIN MAT SAAD,MOHD AZIZIE BIN ABDUL AZIZ,2020-05-07 Why should the university or college student study political science What good will it do him or her in later life Will it help the student in getting a job in getting ahead First of all it should be made clear that the primary objective of this political study is citizenship training Its aim is to better the condition of human beings by helping them to realise their rights and obligations However the good citizen who behaves and votes regularly is no longer good enough Mere innocence virtue and good intentions will not help societies develop and move in the right direction Students must also be citizens who are knowledgeable They must know how their governments operate what interests and forces are behind particular policies what the results of such policies are likely to be who their elected representatives are and what they stand for The governance and political study enables students to understand the processes and institutions of societal decision making Such an understanding often includes knowing who makes the decision for what reason and in whose interest as well as how decisions can be encouraged modified or prevented by citizens as a member of any social systems The purpose of governance and political study is not limited to the provision of relevant information Students can follow a career as a professional politician Even though the said knowledge is not required to enter the political field but it is considered an asset if one has adequate grounding in this area This book has been blended

by three authors in order to make it more effective and relevant to the current issues so that it can be understood by the readers efficiently Finally they can work within government bureaucracies such as ministry or a state department especially those dealing with public planning national integration political development national unity policy making and diplomatic services *Weekly Compilation of Presidential Documents* ,2002-12-23 **Coaching Ministry Teams** Kenneth O. Gangel,2006-10-18 In competitive sports we prize teamwork We know that a mature team will usually beat an astounding collection of individual players The burden of creating such esprit de corps falls to the coach and the team of leaders he has assembled After all a team without a coach cannot win But what happens when the coach himself does not understand the dynamics of teamwork In a similar manner every leader of every church is a coach of sorts with a ministry team responsible for the life of the church The question put to you as a pastor is this Are you a team player Even more to the point Whose team are you building Too many church leaders writes author Kenn Gangel have fallen into the trap of personal kingdom building a focused concern on one s own and present ministry without a wider recognition of kingdom participation The net effect of this condition has led to narrow vision stunted church growth and frustrated relationships within the body of Christ In contrast Gangel explores broad and penetrating support throughout the Word of God for team based inclusive cooperative leadership From Jethro s advice to Moses all the way to Jesus s approach to discipleship biblical leadership is viewed as a tool to be shared a model of servanthood mentoring and the mutual interdependence of gifts Along the way Gangel explores the character attributes of successful biblical leadership common things like humility patience and quiet dignity From there he reveals how these qualities open an authentic leader up to the wide and thrilling possibilities of working hand in hand with others in the Lord s work together *The Ethical Challenges of Academic Administration* Elaine E. Englehardt,Michael S. Pritchard,Kerry D. Romesburg,Brian Schrag,2009-09-18 This book is an invitation to academic administrators at every level to engage in reflection on the ethical dimensions of their working lives Academics are very good at reflecting on the ethical issues in other professions but not so interested in reflecting on those in their own including those faced by faculty and administrators Yet it is a topic of great importance Academic institutions are value driven hence virtually every decision made by an academic administrator has an ethical component with implications for students faculty the institution and the broader community Despite this they receive little systematic preparation for this aspect of their professional lives when they take up administrative posts especially when compared to say medical or legal training Surprisingly little has been written about the ethical challenges that academic administrators are likely to face Most of the literature relating to academic administration focuses on leadership and draws heavily on management and social science theory The importance of focusing on ethical deliberation and decision making often goes unrecognized **How To Hire a Champion (EasyRead Super Large 20pt Edition) ,** **How to Hire a Champion** David Snyder,2009-01-22 How to Hire a Champion draws on author David Snyder s interviews with the best performance and hiring experts nationwide This book will help all leaders to build A
