Dechronization Of Sam Magruder A Novel:

The Dechronization of Sam Magruder George Gaylord Simpson, 1997-04-15 Introduction by Arthur C Clarke Afterword by Stephen Jay Gould This recently uncovered novella by the century's most renowned paleontologist has been called the greatest time travel story in more than 100 years The best time travel story since H G Wells's *The Time Machine* Brian Aldiss

Starring T. Rex! José Luis Sanz, 2002 The intersection of science myth and popular culture is explored through the story of T Rex from the nineteenth century discovery of his fossil remains to his glorification in popular culture *Visual Rhetoric and the Eloquence of Design* Leslie Atzmon, 2011-03-11 The essays in VISUAL RHETORIC AND THE ELOQUENCE OF DESIGN foreground the rhetorical functions of design artifacts Rhetoric normally understood as verbal or visual messages that have a tactical persuasive objective a speech that wants to convince us to vote for someone or an ad that tries to persuade us to buy a particular product becomes in Visual Rhetoric and the Eloquence of Design the persuasive use of a broad set of meta beliefs Designed objects are particularly effective at this second level of persuasion because they offer audiences communicative data that reflect and also orchestrate a potentially broad array of cultural concerns Persuasion entails both the aesthetic form and material composition of any object [The Handbook of Historical Linguistics](#) Brian Joseph, Richard Janda, 2008-04-15 The Handbook of Historical Linguistics provides a detailed account of the numerous issues methods and results that characterize current work in historical linguistics the area of linguistics most directly concerned with language change as well as past language states Contains an extensive introduction that places the study of historical linguistics in its proper context within linguistics and the historical sciences in general Covers the methodology of historical linguistics and presents sophisticated overviews of the principles governing phonological morphological syntactic and semantic change Includes contributions from the leading specialists in the field *The Paleobiological Revolution* David Sepkoski, Michael Ruse, 2009-10-15 The Paleobiological Revolution chronicles the incredible ascendance of the once maligned science of paleontology to the vanguard of a field With the establishment of the modern synthesis in the 1940s and the pioneering work of George Gaylord Simpson Ernst Mayr and Theodosius Dobzhansky as well as the subsequent efforts of Stephen Jay Gould David Raup and James Valentine paleontology became embedded in biology and emerged as paleobiology a first rate discipline central to evolutionary studies Pairing contributions from some of the leading actors of the transformation with overviews from historians and philosophers of science the essays here capture the excitement of the seismic changes in the discipline In so doing David Sepkoski and Michael Ruse harness the energy of the past to call for further study of the conceptual development of modern paleobiology **Dark Shamans** Neil L. Whitehead, 2002-10-07 On the little known and darker side of shamanism there exists an ancient form of sorcery called kanaim a practice still observed among the Amerindians of the highlands of Guyana Venezuela and Brazil that involves the ritual stalking mutilation lingering death and consumption of human victims At once a memoir of cultural encounter and an ethnographic and historical

investigation this book offers a sustained intimate look at kanaim its practitioners their victims and the reasons they give for their actions Neil L Whitehead tells of his own involvement with kanaim including an attempt to kill him with poison and relates the personal testimonies of kanaim shamans their potential victims and the victims families He then goes on to discuss the historical emergence of kanaim describing how in the face of successive modern colonizing forces missionaries rubber gatherers miners and development agencies the practice has become an assertion of native autonomy His analysis explores the ways in which kanaim mediates both national and international impacts on native peoples in the region and considers the significance of kanaim for current accounts of shamanism and religious belief and for theories of war and violence Kanaim appears here as part of the wider lexicon of rebellious terror and exotic horror alongside the cannibal vampire and zombie that haunts the western imagination Dark Shamans broadens discussions of violence and of the representation of primitive savagery by recasting both in the light of current debates on modernity and globalization

Palaeontology in Public Chris Manias, 2025-01-21 Since the establishment of concepts of deep time in the late eighteenth and early nineteenth centuries palaeontology has been one of the most high profile sciences Dinosaurs mammoths human ancestors and other lost creatures from Earth's history are some of the most prominent icons of science and are essential for our understanding of nature and time Palaeontology and its practitioners have had a huge impact on public understandings of science despite their often precarious and unsteady position within scientific institutions and networks Palaeontology in Public considers the connections between palaeontology and public culture across the past two centuries In so doing it explores how these public dimensions have been crucial to the development of palaeontology and indeed how they conditioned wider views of science nature the environment time and the world The book provides a history of vertebrate palaeontology through a series of compelling case studies Dinosaurs feature of course including Spinosaurus Winsor McCay's Gertie the Dinosaur and the creatures of Jurassic Park and The Lost World But there are also the small mammals of the Mesozoic South American Glyptodons and human ancestors like Neanderthals and Australopithecines This book shows how palaeontology is defined by its relationship with public audiences and how this connection is central to our vision of the past and future of the Earth and its inhabitants Praise for Palaeontology in Public Surely there is a one way traffic from science to the media In this remarkable collection of papers Chris Manias and the authors explore palaeontological themes from the origin of life to interpretations of human culture through dinosaurs of course and many other fossil taxa Michael J Benton OBE FRS FRSE University of Bristol Palaeontology is a strange science at times arcane yet so accessible that many children dream of hunting for dinosaurs among sun beaten badlands Palaeontology in Public digs into the overlap of these two realms and offers a much needed exploration of how prehistoric beings emerge from stone and enter our collective imagination Riley Black author of Last Days of the Dinosaurs and When the Earth Was Green In this sweeping multi authored compilation reviews consider how ancient animals have been presented to the public for good or for ill From Lucy the australopithecine

to Gertie the dinosaur and Jurassic Park never before has so much scholarly content on palaeontology's popularisation been amassed in a single volume Darren Naish vertebrate palaeontologist and author **Dinosaurs in Fantastic Fiction** Allen A. Debus, 2006 This literary survey examines how paleoliterature originated developed and matured from its inception to the present day It follows trends on the crafting of classic dinosaurs investigating the figurative and metaphoric meaning of fictional dinosaurs and related prehistoria An appendix provides brief summaries of deserving dinosaur texts organized alphabetically by author Provided by publisher **Prehistoric Monsters** Allen A. Debus, 2014-11-21 Over centuries discoveries of fossil bones spawned legends of monsters such as giants and dragons As the field of earth sciences matured during the 19th century early fossilists gained understanding of prehistoric creatures such as Tyrannosaurus Triceratops and Stegosaurus This historical study examines how these genuine beasts morphed in the public imagination into mythical powerful engines of destruction and harbingers of cataclysm taking their place in popular culture film and literature as symbols of lost worlds where time stands still *A to Z of Biologists* Lisa Yount, 2014-05-14 Profiles more than 150 scientists from around the world who made important contributions to the field of biology including Claude Bernard Alexander Fleming Mary Claire King Ronald Ross and Tetsuko Takabe **George Gaylord Simpson** Léo F. Laporte, 2000-09-26 In 1978 the distinguished paleontologist George Gaylord Simpson published his autobiography *Concession to the Improbable* which gave the basic facts of his life but left more questions than it answered Now L o F Laporte presents this absorbing intellectual study of Simpson's major areas of work Focusing on Simpson's scientific contributions Laporte provides chapters on Simpson's earliest paleontological research through his distinguished Alexander Agassiz professorship at Harvard and his extensive fieldwork for the American Museum of Natural History where he developed the core themes set forth in his most prestigious work *Tempo and Mode in Evolution* Columbia University Press 1944 Simpson was arguably the first evolutionary paleontologist to combine descriptive taxonomy with the modern approaches of genetics and statistical analysis Despite his brilliance Simpson was a difficult person to know Laporte addresses the nature of Simpson's interpersonal problems with colleagues during his life An introductory overview provides the biographical context of Simpson's career and provides the framework for his major paleontological and evolutionary contributions [Dinosaur Blackout](#) Judith Silverthorne, 2015-01-22 Daniel breaks a promise not to travel back to dinosaur times any more because his friends are missing **The Scientifiction Novels of C.S. Lewis** Jared Lobdell, 2014-09-17 Used by C S Lewis himself the term scientifiction is revived here as it once encompassed not only what we call science fiction but also that indeterminate field of the 1940s and 1950s sometimes referred to as science fantasy leading up to Ray Bradbury along with a portion of that great realm that has come since the advent of *The Lord of the Rings* to be called fantasy Rather as an eighteenth century novel may pre date the divide between novel and romance so C S Lewis's interplanetary novels may be considered to pre date the modern divide between fantasy and science fiction and thus be thought of as scientifictional in nature The stories dealt with are those in which Elwin

Ransom is a character the three usually called the space trilogy Out of the Silent Planet Perelandra and That Hideous Strength and the time fragment entitled The Dark Tower Lengthy chapters are devoted to each of the four Ransom stories The book presents a study of Lewis the nature of science fiction the nature of Lewis's Arcadian science fiction and his and its place in English literary history

Anatomy of Science Fiction Donald E. Morse, 2009-03-26 This wide ranging collection of essays re opens the connection between science fiction and the increasingly science fictional world Kevin Alexander Boon reminds us of the degree to which the epistemology of science fiction infects modern political discourse K roly Pint r explores the narrative structures of utopian estrangement and Tam s B nyei and Brian Attebery take us deeper into the cultural exchanges between science fiction and the literary and political worlds In the second half Donald Morse Nicholas Ruddick and va Federmayer look at the way in which science fiction has tackled major ethical issues while Amy Novak and K lm n Matolcsy consider memory and evolution as cultural batteries The book ends with important discussions of East German and Hungarian science fiction by Usch Kiausch and Donald Morse respectively I envisage that the book will find a market both among academics and as a recommended text to undergraduates as it offers interesting essays on important readers The tendency for science fiction to be offered as a literature class to science majors is not usually considered but this book would be particularly appropriate for such a market Dr Farah Mendelsohn Middlesex University

Science Fact and Science Fiction Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

Fossil Legends of the First Americans Adrienne Mayor, 2023-04-11 This book examines the discoveries of enormous bones and uses of fossils for medicine hunting magic and spells Well before Columbus Native Americans observed the mysterious petrified remains of extinct creatures and sought to understand their transformation to stone In perceptive creation stories they visualized the remains of extinct mammoths dinosaurs pterosaurs and marine creatures as Monster Bears Giant Lizards Thunder Birds and Water Monsters Their insights some so sophisticated that they anticipate modern

scientific theories were passed down in oral histories over many centuries Drawing on historical sources archaeology traditional accounts and extensive personal interviews Adrienne Mayor takes us from Aztec and Inca fossil tales to the traditions of the Iroquois Navajos Apaches Cheyennes and Pawnees *Dinosaur Breakout* Judith Silverthorne,2004-04

Dinosaurs time travel and dealing with local bullies are all intertwined in this suspenseful story *Dinosaur Memories* Allen Debus,2002 Dinosaur memories are hard to forget Most who revel in the current renaissance in dinosaur science art fiction and movies or who enjoy the other appealing prehistoric animals so well popularized by the media have fond recollections of what it was like growing up dinosaur Together with wife Diane and his father Allen G Debus Allen A Debus unveils treasured dinosaur memories and stories about prehistoric animals and paleo people spanning from the cold blooded dinosaur era to the modern wave dinosaur renaissance Beginning with fondly recalled roadtrips to prehistoric places where T rex still reigns *Dinosaur Memories* ventures into the realm of thunder beasts and explores the rich pop cultural appeal of prehistoric animals If you ve ever collected dinosaurs enjoyed fossil hunting or visits to see the old bones in museums *Dinosaur Memories* is a book you ll still recall years from now Thirty five chapters are grouped into seven sections titled Roads Into Prehistory Thunder Beasts Dinosaur Worlds Fantasy Dinosaurs Fossil Trickery Paleo people and Rustlin up Dinos **Relatively and Philosophically Earnest** Bharath Sriraman,Simon Goodchild,2009-10-01 Paul Ernest s name is synonymous with social constructivism as a philosophy of mathematics His contributions to mathematics education have occurred at a very fundamental level and to a extent shaped theory development in this field His research addresses fundamental questions about the nature of mathematics and how it relates to teaching learning and society For the last three decades Paul has been a prolific scholar who has published in a wide array of topics such as the relationship between the philosophy of mathematics and mathematics education and more generally the philosophy of mathematics education ethics and values in mathematics education and the philosophy of research methodology The title of this Festschrift is meant to be a pun to convey the sometimes relativistic dimension to mathematical certainty that Paul argued for in developing his philosophy and also a play on words for the fact that absolute earnestness may perhaps be a Platonic construct and not possible in the realm of language and human discourse Paul Ernest s scholarly evolution and life can best be summarized in the words of Walt Whitman Do I contradict myself Very well then I contradict myself I am large I contain multitudes Indeed his presence has been large and multitudinous and this Festschrift celebrates his 65th Birthday with numerous contributions coming from the mathematics philosophy and mathematics education communities around the world **Stephen Jay Gould** Warren D. Allmon,Patricia Kelley,Robert Ross,2009 Considered by many during his lifetime as the most well known scientist in the world Stephen Jay Gould left an enormous and influential body of work A Harvard professor of paleontology evolutionary biology and the history of science Gould provided major insights into our understanding of the history of life He helped to reinvigorate paleontology launch macroevolution on a new course and provide a context in which the biological

developmental stages of an organism's embryonic growth could be integrated into an understanding of evolution. This book is a set of reflections on the many areas of Gould's intellectual life by the people who knew and understood him best: former students and prominent close collaborators. Mostly a critical assessment of his legacy, the chapters are not technical contributions but rather offer a combination of intellectual bibliography, personal memoir, and reflection on Gould's diverse scientific achievements. The work includes the most complete bibliography of his writings to date and offers a multi-dimensional view of Gould's life work not to be found in any other volume.
