Deciphering Motivation in Psychotherapy David Mark Allen, 2012-12-06 I have often stated to students that I felt that one of the most important characteristics of a psychotherapist is the ability to tolerate ambiguity As Allen so aptly points out in this creative and valuable book my observation contains an implicit assumption that requires a clear statement in order for it to be understood Before ambiguity can be tolerated it must be recognized The psychotherapist who accepts the presentations of the patient at face value is never faced with the difficult problem of tolerating the ambiguity that is so intrinsic to the circumstances that bring many people to treatment In this volume Allen has undertaken the task of helping the reader to recognize ambiguity in all of its manifestations to understand it better and having understood it to help the patient to grow beyond it Ambiguity in Allen's view arises from a dialectical conflict whether it is between the self and the system intrapsychic and wholly within the self or social when the individual is torn between competing reference groups Psychotherapy is a process by which the dialectic can be brought to consciousness so that a synthesis can be achieved The dialectic that engages the individual and often is played out between the individual and the system parallels the struggle between attachment and individuation *Deciphering Motivation in Psychotherapy* David Mark Allen, 1991-03-31

Motivating Clients in Therapy Richard L. Rappaport, 1997-04-03 Clients who come to psychotherapy unmotivated or who become discouraged as treatment progresses pose a singular challenge to practitioners Despite the central importance of motivation for the therapeutic healing process little has been written that addresses this issue *Motivating Clients in Therapy* questions the widely accepted assumption of the adequately motivated client Richard Rappaport presents a four phased model of motivation that emphasizes the fear of loss of what is known and familiar as the central inhibitor to personal growth The motivation to love oneself and others must be catalyzed by an active psychotherapy relationship Rappaport offers therapists a practical and theoretical guide to increase treatment effectiveness with a wide variety of clients

Cognitive Dissonance Theory: A Guide to Festingerian Psychology Dan Biscayne, 2025-10-01 Why do we sometimes cling to beliefs even when evidence proves them wrong? Why do we justify choices we regret or rationalize behaviors that contradict our values? These questions lie at the heart of cognitive dissonance, a psychological phenomenon that reveals the mind's remarkable and often unconscious efforts to maintain internal harmony. First introduced by Leon Festinger in 1957, the theory of cognitive dissonance marked a turning point in our understanding of human behavior. It proposed that inconsistency between our thoughts, beliefs, or actions creates psychological discomfort and that we are driven, often irrationally, to resolve this discomfort. The implications of this simple idea are vast. From politics to relationships, advertising to religion, cognitive dissonance shapes the way we interpret reality and construct our sense of self. This book explores the theory of cognitive dissonance in depth, not only through its historical development and experimental foundations but also through its relevance to everyday life. It draws on classic studies and contemporary research, connecting psychological theory to the real-world dilemmas we face daily: moral conflicts, identity shifts, group dynamics, and the justifications we use to bridge the gap between who we are and who we think we should be. You do not need an extensive background in psychology to engage with this book. What you do need is curiosity about the human mind, about why we think the way we do, and about the subtle forces that shape our choices. My hope is that this exploration of cognitive dissonance will challenge your assumptions, sharpen your self-awareness, and offer a deeper understanding of what it means to be human in a world full of contradictions. Let's begin.
