*Neuroscience of Decision Making* Oshin Vartanian,David R. Mandel,2011-04-14 The intersection between the fields of behavioral decision research and neuroscience has proved to be fertile ground for interdisciplinary research Whereas the former is rich in formalized models of choice the latter is rife with techniques for testing behavioral models at the brain level As a result there has been the rapid emergence of progressively more sophisticated biological models of choice geared toward the development of ever more complete mechanistic models of behavior This volume provides a coherent framework for distilling some of the key themes that have emerged as a function of this research program and highlights what we have learned about judgment and decision making as a result Although topics that are theoretically relevant to judgment and decision making researchers are addressed the book also ventures somewhat beyond the traditional boundaries of this area to tackle themes that would of interest to a greater community of scholars Neuroscience of Decision Making provides contemporary and essential reading for researchers and students of cognitive psychology neuroscience philosophy and economics Management in the Human Service Organization United States. Office of Family Assistance,1980 **Creative Action in Organizations** Cameron M. Ford,Dennis A. Gioia,1995-07-18 A strong point in this book is its opening extensive review of creativity in organizations and professions including helpful tabulations of articles that identify the motives expectations emotions means and opportunities that lead to creative acts it can provide valuable insights and encouragement to scholars and practitioners who are concerned with developing and tapping creativity in organizations Management professors and graduate students will find the book helpful G David Hughes in Journal of Product Innovation Management This book definitely will be appropriate for class use in any setting focused on creativity in organizations Presumably these would be specialized upper division MBA or Ph D electives If you are interested in the topic of creativity in organizations this is the book you must read It is on the frontiers and it provides a beacon for future scholarly progress on this topic because of its emphasis on how the organizational setting affects the creative process in the world of work Lyman Porter University of California Irvine The book is itself a creative approach to creativity The editors have attracted a talented and well respected group of academic contributors The message that we should abandon the romantic but flawed notion that creativity is

principally the product of extraordinary individual acts is delivered forcefully as is the companion notion that organizational contexts are the real seedbeds of creative behavior John R Kimberly Henry Bower Professor The Wharton School University of Pennsylvania This is one of the better collections of information about creativity because it is data based and it provides a useful comparison and contrast of conceptual and practical aspects By clearly describing the benefits and problems associated with the topics Creative Action in Organizations obviously practices what it preaches I would recommend that it be used as a textbook for a graduate level business course particularly for an MBA program In addition I also recommend that it be used as a text reference for industrial training development programs targeted at teaching employees how to develop new businesses improve existing processes or become better leaders viz corporate leadership development programs Tom Wojcik Manager Office of Innovation Hoechst Celanese Corporation

Between the trade deficit mergers and the recession the topic of creativity in organizations has become one of increasing importance How does a company retool or refine its product with foreign and often less costly competition How does human resources find creative solutions to budgeting product development marketing and training With pithy and engaging chapters from leading researchers and figures in business government and academia Creative Action in Organizations explores the factors that are critical to the development and promotion of creativity to develop a revised view that is grounded in experience This volume begins with a literature review written as a mystery to be solved followed by essays from researchers Part II and practitioners Part III Using the chapters as data the editors conclude with a content analysis that presents a look at the most significant themes and offers a framework for conceptualizing creativity in organizations This profound and fascinating volume is essential for students professionals and researchers in management and organization studies public administration public policy evaluation and psychology as well as libraries in the above areas

The basic issue is the question of how to determine the most effective type of support for a given marketing decision maker in a particular decision situation. The book takes a demand-oriented approach. Decision aids for marketing managers can only be effective if they match with the thinking and reasoning process of the decision makers who use them. Consequently, the important questions addressed in this book are: how do marketing managers make decisions? how can marketing management support systems help to overcome several cognitive limitations of human decision makers? and what is the most appropriate type of management support system for assisting the problem-solving methods employed by a marketing decision maker.
