## **Decisive Campaigns Of The Second World War:**

Decisive Campaigns of the Second World War John Gooch, 2012-11-12 Success or defeat in the Second World War turned less on winning or losing battles than on winning or losing campaigns This volume reassesses the importance of seven major campaigns for the outcome of the war The authors examine a wide range of factors which influence success or failure including strategic planning logistics combat performance command and military intelligence This book represents a novel contribution to the study of the Second World War      **Special issue: Decisive campaigns of the Second World War** John Gooch, 1990      **British Army Communications in the Second World War** Simon Godfrey, 2013-05-09 Command Control Communications and Intelligence form the backbone of the Army's operating system But while much attention has been given in the literature to the other three elements Communications in the British Army during World War II have been widely ignored This book rectifies the omission It shows that failures in front line communications contributed to several of the setbacks suffered by the Army but also that ultimate victory was only achieved after a successful communications system was in place It explains how the outcome of the main campaigns in Europe and North Africa depended on communications how the system operated and how it evolved from a relatively primitive and inadequately supplied state at Dunkirk to a generally effective system at the time of the Rhine crossings Problems still occurred however for example at infantry platoon level and famously with paratrooper communications at Arnhem often simply due to the shortcomings of existing technology The book concludes that it is only very recently that advances in technology have allowed those problems to be solved      Science, Technology, Imperialism, and War Jyoti Bhusan Das Gupta, 2007 The Volume Science Technology Imperialism And War Interlinks The Concerned Themes To Present A Coherent Analysis Of The Development Of Related Ideas And Institutions In The Subcontinent The Chapters On Science Therefore Look At The Cognitive And Socio Historical Aspects Of Science Relating The Same With The Establishment And Spread Of Imperialism In India With Its Application To Develop Technologies And With The Use Of Such Technologies To Fund The Major Preoccupation Of Imperialism War Likewise The Section On Technology Leads The Reader To A Search For Its Very Probable Links With Imperialism And War The Section On Imperialism Offers Four Themes In The Edited Volume The First One Deals With Its Theories The Second With Its Link With Colonialism And The Third And The Fourth Follow Its Manifestation In The Russian And British Adventures Chiefly In Central Asia And India The Dependence Of Imperialism On War Looms Large War The Concluding Theme Of This Exercise Is The Saturation Point Of Human Efforts To Subjugate And Dominate Others The Scholars Writing In This Section Critically Survey The Various Kinds Of War Conventional Limited And Nuclear And A Detailed And Insightful Analysis Of The Cold War By The Editor Completes The Picture This Volume Will Prove Invaluable To Scholars And Students Of South Asian Studies History Political Science And International Relations And Defence Studies Alike      **The Pursuit of Victory** Brian Bond, 1998 In Western Europe and North America the idea that war can deliberately be used as an instrument of policy has become

unfashionable not least because of the carnage of two World Wars and the Americans humiliating experience in Vietnam But wars are still fought Those who start wars clearly believe they are worthwhile Why In this original and provocative study Brian Bond discusses the successes and failures of military and political leaders in their pursuit of victory over the last two centuries Professor Bond argues that in order to be counted victorious a leader has to progress beyond military triumph to preserve the political control needed to secure an advantageous and enduring peace settlement Napoleon was a brilliant general but failed as a statesman Bismarck on the other hand was a success in skilfully exploiting Moltke's victories on the battlefield to create a unified Germany In the First World War Germany and her allies were defeated but at such great cost that confidence in the idea that war could be controlled and the pursuit of victory made rational received a terrible shock Germany and Japan exploited their military opportunities between 1939 and 1942 but lack of political control and moderation brought them catastrophic defeat After 1945 nuclear weapons and the increased complexity of international relations blurred the identity of victors and losers and seemed to make the idea of a decisive victory almost unthinkable But this study warns against the assumption that war as an instrument of policy has now been completely discarded The Falklands and Gulf conflicts show that aggressors are still prepared to risk war for tangible goals and that their opponents are quite capable of responding successfully to such challenges
