Decline And Fall Of Hemispheric Specialization:

The Decline and Fall of Hemispheric Specialization Robert Efron, 2013-06-17 Providing a personal overview of hemispheric differences in human cognitive activity Professor Efron is selective in his presentation of significant issues To ensure a balanced overview references are made to many books review articles and research reports that present opposing positions Although additional material has been included in this book the informal style of the oral presentation has not been altered This volume may be perceived as a report of one man s opinion however the conclusions may reflect the views of a silent majority of cognitive neuroscientists *The Decline and Fall of Hemispheric Specialization* Robert Efron, 2013 Providing a personal overview of hemispheric differences in human cognitive activity Professor Efron is selective in his presentation of significant issues To ensure a balanced overview references are made to many books review articles and research reports that present opposing positions Although additional material has been included in this book the informal style of the oral presentation has not been altered This volume may be perceived as a report of one man s opinion however the conclusions may reflect the views of a silent majority of cognitive neuroscientists *Brain Asymmetry* Richard J. Davidson, Kenneth Hugdahl, 1995 The twenty three contributions in *Brain Asymmetry* provide a comprehensive survey of modern research on laterality and brain asymmetry showcasing new approaches and novel domains in which knowledge of the asymmetrical functioning of the brain is a key issue for the complete understanding of the phenomenon Of particular note is the inclusion of material on laterality learning attention and emotion and their relation to subcortical and peripheral structures and processes In addition the clinical relevance of brain asymmetry for neuropsychological and psychopathological practice is surveyed Following a preface and historical overview chapters are divided into eight parts that cover Phylogenetic Antecedents and Anatomical Bases Perceptual Cognitive and Motor Lateralization Attention and Learning Central Autonomic Integration Emotional Lateralization Interhemispheric Interaction Ontogeny and Developmental Disabilities and Psychopathology Contributors Marie T Banich Brenda E Berge Carol A Boliek Halle D Brown Gerard E Bruder Richard J Davidson Marian Cleeves Diamond Jack E Downhill Jane E Edmonds Albert M Galaburda Josh Hall Anne Harrington Kenneth M Heilman Joseph B Hellige Kenneth Hugdahl George W Hynd J Richard Jennings Stephen M Kosslyn Richard D Laine David Warren Lewis Jacqueline Liederman Mario Liotti Richard Marshall John E Obrzut Michael Peters Robert G Robinson Sidney J Segalowitz Justine Sergent Don M Tucker Werner Wittling Eran Zaidel A Bradford Book The Asymmetrical Brain Kenneth Hugdahl, Richard J. TenHouten, 2015-05-11 Time consciousness long a shared objective of philosophy and social thought is key to understanding different cultures and their cognitive adaptation to one another Warren D TenHouten s remarkable book achieves this goal by providing a bold and original three level theory of time consciousness its neurocognitive basis and social organization Using classical and

contemporary ethnographies of Australian Aborigines and Euro Australians to support his theory TenHouten shows how involvement in hedonic sociality emphasizing equality and community leads to time that is cyclical present oriented and more generally natural whereas agonistic sociality based on inequality and agency leads to time that is linear future oriented and more generally rational

EBOOK: DYSLEXIA T.R Miles, Elaine Miles, 1999-06-16 What are the distinctive characteristics of dyslexia How much progress has been made in discovering the causes of dyslexia What are the latest ideas on ways in which dyslexics can be helped It is just over a hundred years since Dr Pringle Morgan published his famous account of Percy a boy of 14 who could only with difficulty spell out words of one syllable who wrote his name as Precy and did not notice the mistake until his attention was called to it more than once Yet the schoolmaster who taught him for some years says that he would be the smartest lad in the school if the instruction were entirely oral Dyslexia A Hundred Years On is an overview of the field It traces the historical influences and examines the contributions of various disciplines The new edition 1998 is a complete re write of the original book and brings accounts of research fully up to date There are also new chapters which report on new areas of research and raise questions about the different forms which dyslexia can take in different languages The book also looks afresh at assessment teaching approaches and counselling This book is an invaluable resource for trainee and practising teachers including special needs teachers professionals and lay persons interested in dyslexia psychologists doctors health visitors and college students particularly those in the field of psychology education and linguistics Origins Karl H. Pribram, 1994 First Published in 1994 Routledge is an imprint of Taylor Francis an informa company **Darwin's Shadow** Manfred Velden, 2012 Biologism's dehumanizing effect on our view of the human condition *Formulaic Language* Alison Wray, 2013-12-02 Presents a framework for examining the existence and function of formulaic language and tests it extensively against language data within a wide variety of language samples Formulaic language is a fast growing area of applied linguistic research and the author is a key figure in this field **The Study of Language** George Yule, 1996-06-13 This new edition of The Study of Language incorporates many changes that reflect developments in language study over the past decade *Web-Based Learning through Educational Informatics: Information Science Meets Educational Computing* Ford, Nigel, 2008-04-30 Educational informatics represents the convergence of key aspects of information science computing and education while exploiting Web based techniques and standards This book provides a rigorous definition of and theoretical framework for educational informatics while relating to the human aspects of educational information systems Web Based Learning Through Educational Informatics Information Science Meets Educational Computing explores the role of information seeking and retrieval in the development of information systems to support personalized and autonomous learning by introducing key concepts from information science *Principles of Neuropsychological Assessment with Hispanics* Antolin M. Llorente, 2008 Here is the first volume of a new series that explores diversity culture and ethnicity and their impact on neurological function This volume features research based evidence on the impact of Hispanic culture on

brain behavior relationships Articles explore factors such as acculturation assimilation cultural identity and migration patterns Clinical issues such as competence and minimal standards and novel approaches for appropriate assessments of Hispanic populations are examined You ll discover important new findings and gain fascinating perspectives from disciplines in both the life and social sciences The Symbolic Foundations of Conditioned Behavior Charles R. Gallistel, John Gibbon, 2002-03-01 The goal of this book is to persuade students of animal learning that cognitive theorizing is essential for an understanding of the phenomena revealed by conditioning experiments The authors also hope to persuade the cognitive psychology community that conditioning phenomena offer such a strong empirical foundation for a rigorous brand of cognitive psychology that the study of animal learning should reclaim a more central place in the field of psychology

Synthesizing Nature-nurture Gilbert Gottlieb, 2014-09-19 This volume provides a primarily nontechnical summary of experimental and theoretical work conducted over the course of 35 years which resulted in a developmental framework capable of integrating causal influences at the genetic neural behavioral and ecological levels of analysis It describes novel solutions to the nature nurture problem at both the empirical and theoretical levels Following field observations laboratory experiments led to the discovery of the nonobvious prenatal experiential basis of instinctive behavior in two species ground nesting mallard ducklings and hole nesting wood ducklings This work also describes the experiences that lead to the rigid canalization of behavioral development as well as the social and sensory experiences that favor the continuance of flexibility The author also describes in detail a developmental psychobiological systems view that supports a behaviorally and psychologically mediated pathway to evolutionary change in humans and other species Written in a way that is readable to even the nonspecialist the text is accompanied by numerous photographs that illuminate and add personal meaning to the written words Readers will be engaged by the emphasis on the human aspect of the scientific enterprise **Biologism -**

The Consequence of an Illusion Manfred Velden, 2009-11-18 Biologism describes the idea that the science of biology supplies the means to exhaustively explain psychological processes It has become vastly popular in recent decades Manfred Velden shows that this idea is illusory on fundamental and a priori grounds Several fields of inquiry are described where the biologicistic project has demonstrably failed like for example heritability estimates for mental traits like intelligence It is argued as well that biologism is just a further instance of an older more comprehensive and equally illusory concept psychology as a natural science a science that produces generally accepted basic facts for example the creation of a psychological risk factor for coronary disease It is shown that psychology masquerading as a natural science as it largely does may create serious societal problems like for example its misuse for racist purposes The peculiar use of methodology in psychology is also documented Space, Objects, Minds and Brains Lynn C. Robertson, 2004-06-02 Lynn Robertson has been studying how brain lesions affect spatial abilities for over 20 years and her work has revealed some surprising facts about space and its role in visual perception In this book she combines evidence collected in her laboratory with findings

from others to explore the cognitive and neural basis of spatial representations and their contributions to spatial awareness object formation attention and binding

The Neurological Side of Neuropsychology Richard E. Cytowic, 1996 Neurologists neuropsychologists and cognitive scientists work with many of the same problems and patients and yet know little about the literature and approaches of the other disciplines *The Neurological Side of Neuropsychology* is a primer for neurology residents graduate students and established professionals from other fields who wish to enter behavioral neurology It provides a clear and coherent introduction to contemporary neurological ideas carefully contrasting the conventional hierarchical model of brain organization to the newer multiplex model that scientists from biological backgrounds currently use Instead of presenting laundry lists of arcane maladies along with a key of where in the brain the responsible lesion is or a compendium of tests for a given situation the received wisdom that students are required to memorize Cytowic gives students the historical and conceptual tools they need not only to get up to speed regarding present knowledge but to go forward

Mind and Brain Sciences in the 21st Century Robert L. Solso, 1999 A collection of essays on possible futures of the science of the mind

Lives in Spirit Harry T. Hunt, 2012-02-01 *Lives in Spirit* explores the dynamic conflicts that both energized and distorted the spiritual development of key precursor figures of a contemporary secular or this worldly mysticism With its historical roots in the early Gnostics and Plotinus this characteristically Western spirituality re emerges with the secularization and loss of traditional religious belief of modernity The lives works and direct experiences of Nietzsche Emerson Thoreau Jung Heidegger Gurdjieff Crowley and contemporary feminist mysticism are considered in terms of transpersonal psychology Almaas the sociology of mysticism Weber and Troeltsch and contemporary psychoanalysis Winnicott Bion Kohut Spiritual or essential experience is seen as an inherent form of human intelligence which while potentially and even increasingly impacted by personal dynamics and social crisis is not reducible to them

Rethinking Language and Gender Research Victoria Bergvall, 2014-06-11 *Rethinking Language and Gender Research* is the first book focusing on language and gender to explicitly challenge the dichotomy of female and male use of language It represents a turning point in language and gender studies addressing the political and social consequences of popular beliefs about women s language and men s language and proposing new ways of looking at language and gender The essays take a fresh approach to the study of subjects such as language and sex and the use of language to produce and maintain power and prestige Topics explored in this text include sex and the brain the language of a rape hearing teenage language radio talk show exchanges discourse strategies of African American women political implications for language and gender studies the relationship between sex and gender and the construction of identity through language A useful introductory chapter sets the articles in context explaining the relationships that exist between them and full cross referencing between articles and an extensive index allow for easy access to information The interdisciplinary approach of the text the wide range of methodologies presented and the comprehensive review of the current literature will make this book invaluable reading for

all upper level undergraduate students postgraduate students and researchers in the fields of linguistics sociolinguistics
