W. Bernard,1992 *Towns in Decline, AD100-1600* Terry Slater,2017-07-05 Many European towns have experienced loss of population degradation of physical structure and profound economic change at least once since the height of the Roman Empire This volume is an examination of the various causes of these changes the results which flowed

from them and the reasons why some urban centres survived revived and eventually flourished again while others failed and died The contributors bring to bear the techniques of history and archaeology the perspectives of economics agronomy medicine architecture and planning geography and law to the study The result is a synthesis which connects the Decline of the Roman Empire to the effects of the Black Death and the economic transformation of Renaissance Florence

The Idea of the Castle in Medieval England Abigail Wheatley,2004 Medieval castles have traditionally been explained as feats of military engineering and tools of feudal control but Abigail Wheatley takes a different approach looking at a range of sources usually neglected in castle studies Evidence from contemporary literature and art reveals the castle s place at the heart of medieval culture as an architecture of ideas every bit as sophisticated as the church architecture of the period This study offers a genuinely fresh perspective Most castle scholars confine themselves to historical documents but Wheatley examines literary and artistic evidence for its influence on and response to contemporary castle architecture Sermons seals and ivory caskets local legends and Roman ruins all have their part to play What emerges is a fascinating web of cultural resonances the castle is implicated in every aspect of medieval consciousness from private religious contemplation to the creation of national mythologies This book makes a compelling case for a new interdisciplinary approach to castle studies ABIGAIL WHEATLEY studied for her PhD at York University s Centre for Medieval Studies

Castles Razed Amelia Khatri,AI,2025-02-12 Castles Razed examines the deliberate destruction of castles in Western Europe from the late medieval period through the early modern era revealing how razing these structures served as a vital tool for political control and state formation The book argues that castle ruins are not simply remnants of time but active symbols of shifting power dynamics and challenges the romanticized view of castles by demonstrating how their destruction was a calculated effort to consolidate power and suppress dissent One intriguing fact explored is how the rise of gunpowder warfare rendered these once impregnable fortresses strategically obsolete leading to their intentional dismantling The book also investigates how these deliberate acts of castle destruction reshaped the physical landscape and historical memory influencing architectural trends and national identity Focusing on the motives and methods behind the razing the book explores key examples of castle demolitions analyzing the political motivations military tactics and social consequences The study progresses by first establishing the significance of castles then diving into specific case studies of deliberate destruction and finally examining the aftermath of this destruction on national identity and architectural trends
