**Russian Peasant Women Who Refused to Marry** John Bushnell, 2017-10-09 John Bushnell's analysis of previously unstudied church records and provincial archives reveals surprising marriage patterns in Russian peasant villages in the 18th and 19th centuries For some villages the rate of unmarried women reached as high as 70 percent The religious group most closely identified with female peasant marriage aversion was the Old Believer Spasovite covenant and Bushnell argues that some of these women might have had more agency in the decision to marry than more common peasant tradition ordinarily allowed Bushnell explores the cataclysmic social and economic impacts these decisions had on the villages sometimes dragging entire households into poverty and ultimate dissolution In this act of defiance this group of socially politically and economically subordinated peasants went beyond traditional acts of resistance and reaction

Rudolph, 1995-01-01 In recent years the peasant household has become a central focal point of social history This is true not only because the peasant represents the major element of European society through the nineteenth century but also because many of the main issues in modern historical debate can be studied within the sphere of the peasant family This book deals with the European peasant family during the period of transformation from agrarian to industrial society the time called by some the period of protoindustrialization The essays in this volume explore some of the major issues concerning the influence of the economy society and institutions on the peasant household and conversely the influence of the peasant household on the outside world Themes dealt with include the ways in which the physical environment and the economy may make for very different family structures and even affect intra family relationships the effects of inheritance marriage and kinship strategies as well as social pressure on peasant family structure and demography the debate about changing gender roles and status the debate over the manner and effects of class formation questions of social and political agency the nature of gender and parent child relations the validity of protoindustrial theory and the role of peasants in initiating industrialization as consumers producers and as a labor force In examining these themes the essays provide both case studies and innovative analysis by preeminent international scholars in the fields of family and women s history economic history and demography **Rural Reform in Post-Soviet Russia** David J. Rural Development John Harriss, 2023-08-18 Originally published in 1982 this book provides an important set of basic materials for students of rural development Key papers have been chosen and arranged and the editor has provided a general introduction and passages that link the papers alerting the student to rival theoretical interpretations and to regional parallels and contrasts The book provides a basis for the analysis of the processes that make rural societies and economies what they are and substantially determine the changes that take place within them The papers help the reader to understand the nature of the phenomena with which rural development has to deal and in doing so to begin to evaluate the interventions of agencies and planners

**Revolution and the People in Russia and China** S. A.

Smith, 2008-04-24 A unique comparative account of the roots of Communist revolution in Russia and China Steve Smith examines the changing social identities of peasants who settled in St Petersburg from the 1880s to 1917 and in Shanghai from the 1900s to the 1940s Russia and China though very different societies were both dynastic empires with backward agrarian economies that suddenly experienced the impact of capitalist modernity This book argues that far more happened to these migrants than simply being transformed from peasants into workers It explores the migrants identification with their native homes how they acquired new understandings of themselves as individuals and new gender and national identities It asks how these identity transformations fed into the wider political social and cultural processes that culminated in the revolutionary crises in Russia and China and how the Communist regimes that emerged viewed these transformations in the working classes they claimed to represent Measuring Social and Economic Change in Rural Russia David J. O'Brien, V. V. Patsiorkovskii, 2006-01-01 Measuring Social and Economic Change in Rural Russia is based upon nine household surveys in seven rural regions of Russia from 1991 to 2003 including a four wave panel study over an eight year period The findings that O'Brien and Patsiorkovsky share in this important work are the only long term indicators of how ordinary people have learned to adapt to an economic system that was thrust upon them when the Soviet Union collapsed Three main themes are explored the relationship between formal and informal institutional change regional responses to reforms and the impact of household labor social networks and community involvement and physical capital on inequality in material social and psychological conditions This comprehensive study's conceptual and interdisciplinary approach will appeal to anyone interested in the transition of countries from socialist to market economies **The Blackwell Encyclopedia of the Russian Revolution** Harold Shukman, 1994-12-05 This single volume is an authoritative and accessible guide to the background and progress of the Revolution written by a team of over forty specialist contributors Beginning with the radical movements of the mid nineteenth century the Encyclopedia covers the development of the revolutionary movement created by the intelligentsia the condition of the peasants that of the working class and of the army the role of the Tsarist secret police the agents provocateurs the revolutionaries own underground A substantial section is devoted to the emergence of liberation movements among the national minorities of the borderlands The Encyclopedia also considers the formation of Soviet institutions and examines too the emergence of revolutionary culture well before 1917 the avant garde in art and theatre and the relationship to the revolution of three major Russian writers Blok Gorky and Mayakovsky Patterns of European Industrialisation Richard Sylla, Gianni Toniolo, 1992-10-01 The new opportunities for economic development in Eastern Europe and the approach of 1992 have heightened interest in the development of the European economy This volume which includes contributions from some of the world's leading economic historians presents and discusses the latest research findings on the industrialization and modernization *Modernization, Value Change and Fertility in the Soviet Union* Ellen Jones, Fred W. Grupp, 1987-03-12 This book explores social change in the Soviet Union *Family Forms in*

*Historic Europe* Cambridge Group for the History of Population and Social Structure, 1983-03-10 The family forms of historic Europe have been fascinating in their variety Their importance for the historical development of our continent would be difficult to exaggerate for our relationship with the peoples of the other continents of the world as well This book is an attempt to recover the different familial systems and compare them with one another The studies range from Russia Poland Hungary and Austria to Scandinavia Flanders and Britain All the influences which have affected the character and composition of European households are taken into account The analysis covers their function as productive work groups in the procreation and bringing up of children and in the support of the elderly and their relationship with the wider society and its norms along with its political organization central and local Claims that inheritance customs and inheritance practice and the occupation of the household head exerted a powerful influence on the size and composition of households are subjected to rigorous and systematic investigation
