## **Decolonization And World Peace:**

**Decolonization and World Peace** Brian Urquhart, 1989-08-01 Brian Urquhart's remarkable career in the United Nations began when the UN was founded in 1945 and ended in 1986 after a twelve year tenure as Under Secretary General for Special Political Affairs the equivalent of commander of UN peacekeeping operations Among the many revolutions he observed during that period was the process of decolonization which completely changed the geopolitical map of the world and the conditions under which governments seek to assure world peace In *Decolonization and World Peace* he charts the rapid progress of decolonization in Africa the Middle East and other areas of the Third World and describes some of its repercussions One of the most serious repercussions has been the chain of regional conflicts arising from the creation of postcolonial power vacuums in various parts of the world Attributing the difficulty in resolving many of these conflicts including the Palestine conflict and the Iran Iraq War to the climate of Cold War that paralyzed UN authority from the 1960s through the early 1980s Urquhart is encouraged by what he calls a new summer of international relations brought on by the warming of relations between the US and the USSR The four chapters of *Decolonization and World Peace* are based on the Tom Slick World Peace lectures that Urquhart delivered at the Lyndon B Johnson School of Public Affairs of the University of Texas at Austin in 1988 The appendices offer further insights into the peacekeeping potential of the UN Included are his remarks at the Nobel Prize Banquet in Norway on the occasion of the award of the 1988 Nobel Peace Prize to UN peacekeeping forces

*War Crimes Trials in the Wake of Decolonization and Cold War in Asia, 1945-1956* Kerstin von Lingen, 2016-11-04 This book investigates the political context and intentions behind the trialling of Japanese war criminals in the wake of World War Two. After the Second World War in Asia the victorious Allies placed around 5 700 Japanese on trial for war crimes. Ostensibly crafted to bring perpetrators to justice, the trials intersected in complex ways with the great issues of the day. They were meant to finish off the business of World War Two and to consolidate United States hegemony over Japan in the Pacific but they lost impetus as Japan morphed into an ally of the West in the Cold War. Embattled colonial powers used the trials to bolster their authority against nationalist revolutionaries but they found the principles of international humanitarian law were sharply at odds with the inequalities embodied in colonialism. Within nationalist movements local enmities often overshadowed the reckoning with Japan. And hovering over the trials was the critical question just what was justice for the Japanese in a world where all sides had committed atrocities.

**Decolonization and the Evolution of International Human Rights** Roland Burke, 2011-06-06 In the decades following the triumphant proclamation of the Universal Declaration of Human Rights in 1948 the UN General Assembly was transformed by the arrival of newly independent states from Asia, Africa and the Middle East. This diverse constellation of states introduced new ideas, methods and priorities to the human rights program. Their influence was magnified by the highly effective nature of Asian, Arab and African diplomacy in the UN human rights bodies and the sheer numerical superiority of the so-called Afro-Asian bloc. Owing to the nature of General Assembly procedure the Third World states dominated the human rights agenda and enthusiastic support for universal human rights was replaced by decades of authoritarianism and an increasingly strident rejection of the ideas laid out in the Universal Declaration. In *Decolonization and the Evolution of International Human Rights* Roland Burke explores the changing impact of decolonization on the UN human rights program. By recovering the contributions of those Asian, African and Arab voices that joined the global rights debate, Burke demonstrates the central importance of Third World influence across the most pivotal battles in the United Nations, from those that secured the principle of universality to the passage of the first binding human rights treaties to the flawed but radical step of studying individual pleas for help. The very presence of so many independent voices from outside the West and the often defensive nature of Western interventions complicates the common presumption that the postwar human rights project was driven by Europe and the United States. Drawing on UN transcripts, archives and the personal papers of key historical actors, this book challenges the notion that the international rights order was imposed on an unwilling and marginalized Third World. Far from being excluded, Asian, African and Middle Eastern diplomats were powerful agents in both advancing and later obstructing the promotion of human rights. Official Records, 1971.

**The United Nations and Decolonization: The Role of Afro — Asia** Y. El-Ayouty, 2012-12-06 When the United Nations Charter was signed in San Francisco in 1945 the number of African member states of the Organisation was only 4. By the end of 1960 it had risen to 22. Today it is 41. How has this come about? The answer is given in this valuable book.

by Dr Yassin El Ayouty The handful of Asian and African countries who had the privilege of foundation membership made it their business to see to it that their brethren who were still under the colonial yoke attained their freedom and independence as soon as possible and in the meanwhile that they were treated with decency and fairness by their colonial masters It was a tough assignment The struggle was long requiring a great deal of patience and endurance It was at times fierce requiring much dogged resolution It also called for the deployment of intellectual agility of the highest order Fortunately all these qualities were available in the representatives of Asia and Africa who led the great struggle These distinguished delegates also demonstrated a wonderful degree of solidarity which has happily become an Afro Asian tradition at the United Nations The battle began even before the Organisation had itself become a fact It would have been a more difficult struggle had there been no provision in the Charter at all in respect of colonies by whatever name called

which have brought its existence and relevance under criticism and questioning The UN after the end of the Cold War for a short period of time gave a new hope to the world that it would now work genuinely according to its member states will in an environment of cooperation and understanding between its member states for common goals However right after the collapse of the communist bloc and the end of capitalist communist antagonism the process of globalization already in force gained momentum which brought about a new era in the UN s life affecting international relations and the world politics too The emergence of globalization has created many new challenges not only to the individuals and countries but also to the international institutions and global organizations This study is an attempt to analyze the real purpose of the emergence of globalization as a policy and its effects on the UN in particular and the international political economic relations in a wider context
