*American Book Publishing Record* , 1996      *Deconstructing the Model in 20th and 21st-Century Italian Experimental Writings* Beppe Cavatorta, 2019-08-19 Through a series of original analyses of experimental works that exist well outside of the established territory inhabited by the Italian literary canon or which purposely position themselves at its margins this volume proposes a new way to understand the goals of literary experimentation as a means to break the canon and give literature the same freedom that is easily granted to other arts This serves to allow literature itself to intersect with those other art forms while enhancing the powerful and positive outcomes of literary experimentation Specifically the volume explores a series of 20th and 21st century Italian works that are characterized by a non normative approach to language or the act of writing itself The contributors while addressing diverse writers and often even adopting different theoretical interpretations of experimentalism itself all analyze the intersection between experimental literatures and other art forms as

well as cross disciplinary and non traditional approaches to the theme of experimentation *Forthcoming Books* Rose Army,1996-06 L'era de la informació Manuel Castells,2003 **La Era de la información** Manuel Castells,2004 Este volumen analiza la oleada de expresiones de identidad colectiva que desafían la globalización en defensa de la singularidad cultural y el control sobre la propia vida y el medio ambiente Analizando el desarrollo de movimientos proactivos y reactivos como el feminismo el ecologismo y los movimientos de resistencia que intentan modificar las relaciones humanas en forma radical el autor muestra cómo las categorías fundamentales de la existencia son transformadas por la influencia combinada de las fuerzas tecnoeconómicas y de los movimientos sociales Subject Guide to Books in Print ,1997 **Index of Conference Proceedings** British Library. *The Author in Criticism* Elio Attilio Baldi, 2020-03-11 *The Author in Criticism* Italo Calvino s Authorial Image in Italy the United States and the United Kingdom explores the cultural and historic

patterns and differences in the critical readings of Italian author Italo Calvino's works in the United States of America, the United Kingdom, and Italy. It considers the external factors that contribute to create recognizable patterns in the readings of Calvino's texts in different contexts. This volume therefore covers most notably matters of genre, science fiction, postmodernism, cultural perceptions and conventions, the re-current image of the author in different media, academic schools, curricula, and canons, biographical information such as gender and background, and translation and the language in which the author speaks or fails to speak to us. It traces the influence of these aspects in the academic discourse on Calvino. The Author in Criticism also analyzes Calvino's various professional roles as writer, editor, essayist, journalist, private correspondent, and public cosmopolitan intellectual, reappraising their often little acknowledged importance for academic criticism. An important underlying idea is that the preconceived image that every critic has of Calvino before even opening one of his books is often solidified and repeated even in the most refined and complex critical analyses. This volume purposefully foregrounds the textual and non-textual parts that are usually considered peripheral to the works of an author, such as book covers, blurbs, reviews, talks, interviews, etc. In this way, this book provides insight into the reception of Calvino's works in different countries. Moreover, it forms a broader reflection of and on important constants in the workings of literary criticism and on the way academic discourses have developed in various cultural contexts over the last decades.

*Men of Empire* Monique O'Connell, 2009-04-27

The city-state of Venice, with a population of less than 100,000, dominated a fragmented and fragile empire at the boundary between East and West, between Latin Christian, Greek Orthodox, and Muslim worlds. In this institutional and administrative history, Monique O'Connell explains the structures, processes, practices, and laws by which Venice maintained its vast overseas holdings. The legal, linguistic, religious, and cultural diversity within Venice's empire made it difficult to impose any centralization or unity among its disparate territories. O'Connell has mined the vast archival resources to explain how Venice's central government was able to administer and govern its extensive empire. O'Connell finds that successful governance depended heavily on the experience of governors, an interlocking network of noble families who were sent overseas to negotiate the often conflicting demands of Venice's governing council and the local populations. In this nexus of state power and personal influence, these imperial administrators played a crucial role in representing the state as a hegemonic power, creating patronage and family connections between Venetian patricians and their subjects, and using the judicial system to negotiate a balance between local and imperial interests. In explaining the institutions and individuals that permitted this type of negotiation, O'Connell offers a historical example of an early modern empire at the height of imperial expansion.
