AND THE INTERESTS OF THEORY

By Christopher Norris

Deconstruction The Interests Of Theory

Michael Syrotinski

Deconstruction The Interests Of Theory:

Deconstruction and the Interests of Theory Christopher Norris, 1988 A collection of essays in current analytical philosophy which is united by a general concern with the uses of theory and the way that certain advanced forms of literary critical theory have been extended to other disciplines often the author argues with undesirable results **Deconstruction After All** Christopher Norris, 2015-10-01 This collection of interviews reflections and creative criticism presents Christopher Norris's vigorous polemics with Hayden White Michel Foucault Jean Baudrillard Jean Francois Lyotard Thomas Kuhn Emmanuel Levinas Pierre Bourdieu Richard Rorty and Stanley Fish Alongside Norris's uncompromising critiques there emerge passages of close and careful reading of Jacques Derrida's texts as he cites and reiterates Derrida's philosophical contexts in the works of Immanuel Kant Gaston Bachelard and Georges Canguilhem and in the current discursive fields of epistemology and philosophy of science The book also offers a coda of essays on Frank Kermode Terry Eagleton and Terence Hawkes This collection prefaced with the author's own academic memoir provides an accessible and provocative introduction to Norris's critical thought and highlights the wide range of his interests and philosophical engagements **The Reading of Theoretical Texts** Peter Ekegren, 2002-01-04 Since the structuralist debates of the 1970s the field of textual analysis has largely remained the preserve of literary theorists Social scientists while accepting that observation is theory laden have tended to take the meaning of texts as given and to explain differences of interpretation either in terms of ignorance or bias In this important contribution to methodological debate Peter Ekegren uses developments within literary criticism philosophy and critical theory to reclaim this study for the social sciences and to illuminate the ways in which different readings of a single text are created and defended **Derrida: Ethics Under Erasure** Nicole Anderson, 2012-03-08 Derrida's work is controversial its interpretation hotly contested Derrida Ethics Under Erasure offers a new way of thinking about ethics from a Derridean perspective linking the most abstract theoretical implications of his writing on deconstruction and on justice and responsibility to representations of the practice of ethical paradoxes in everyday life The book presents the development of Derrida's thinking on ethics by demonstrating that the ethical was a focus of Derrida's work at every stage of his career In connecting Derrida's earlier work on language with the ethics implicated in his later work on justice and responsibility Nicole Anderson traverses literary linguistic philosophical and ethical interpretative movements thus recontextualising Derrida's entire oeuvre for a contemporary readership She explores the positive ethical implications of Derrida's work for representation and practice and asks the reader to consider how this new ethical reading of Derrida's work might be applied to concrete instances of his or her own ethical experience *The Reception of Derrida* M. Thomas, 2006-05-31 This book explores the cross cultural reception of Derrida's work specifically how that work in all its diversity has come to be identified with word deconstruction It is the first book to consider the cultural reception of Derrida's works its accessible language and structure help to make this a benchmark amongst introductory Derrida studies **The Deconstructive Owl of Minerva**

Lillian Francis Burke, 2013-10-03 *The Deconstructive Owl of Minerva: An Examination of Schizophrenia through Philosophy, Psychoanalysis, and Postmodernism* takes as its project the articulation of the language of schizophrenia as it inscribes itself between the self and other. It takes into account Georg W. F. Hegel's account of self-consciousness as a master-slave relation. A reading of Jacques Lacan provides access to the narrative self in terms of the mirror stage as the recognition of the self as other. By a further reading of postmodern theorists, this book shows that what has been named schizophrenia calls for a deconstructive strategy that operates with the divergence between pharmacological treatment and the understanding of the language of the schizophrenic condition. This difference will emphasize language as plural, plurivalent, polyphonic, and polylogical. This book essentially seeks to circumvent the label of schizophrenia and to provide alternative ways to understand schizophrenic language in order to culturally rearticulate its effects in society. Postmodern and deconstructive modes of access to the languages of desire, dispersal, and plurivalence that are associated with schizophrenic conditions can help to open up spaces of understanding that are rendered impossible through symptomatic treatment models. **Fictive Theories**

S. McManus, 2005-06-03 *Fictive Theories* is a significant and innovative intervention in key debates in political theory concerning the ways theory should be philosophically grounded and the task that political theory should set itself. Susan McManus argues that political theory has been grounded in controlling fictions, from fictions of human nature to morals laws that function to close possibility. Starting by interrogating the often hidden work of fictions in political theories, she argues that all theorizing is a form of world-creating. Rather than hiding the fictions at work in political theory, McManus argues that theory should become self-consciously fictive and that there are political and ethical advantages to so doing. She then develops a uniquely deconstructive and utopian understanding of the project of political theory grounded in the fictive, a creative and future-oriented imagination. Rather than seeking to provide blueprints of how a polity should be organized, fictive theories seek to fabricate futures through the anticipatory articulation of possibility. Drawing on a rich range of thinkers from the traditions of political theory—Hobbes, Rousseau, Kant, deconstructive theory, Roland Barthes, Jacques Derrida—and utopian studies, Ernst Bloch, this book will be of interest to researchers, teachers, and students in the fields of political theory, utopian studies, literary theory, and cultural studies. *The Practice of Theory*

Keith P. F. Moxey, 1994 Many art historians regard poststructuralist theory with suspicion; some even see its focus on the political dimension of language as hostile to an authentic study of the past. Keith Moxey bridges the gap between historical and theoretical approaches with the provocative argument that we cannot have one without the other. If art history is to take part in the processes of cultural transformation that characterize our society, he writes, then its historical narratives must come to terms with the most powerful and influential theories that currently determine the way in which we conceive of ourselves. After exploring how the insights offered by deconstruction and semiotics change our understanding of representation, ideology, and authorship, Moxey himself puts theory into practice. In a series of engaging essays accompanied by twenty-eight illustrations, he first examines the

impact of cultural values on Erwin Panofsky's writings Taking a fresh look at work by artists from Albrecht Dürer and Erhard Schön to Barbara Kruger and Julian Schnabel he then examines the process by which the generic boundaries between high and low art have helped to sustain class and gender differences Making particular reference to the literature on Martin Schongauer Moxey also considers the value of art history when it is reduced to artist's biography Moxey's interpretation of the work of Hieronymus Bosch not only reassesses its intelligence and imagination but also brings to light its pragmatic conformity to elite definitions of artistic genius With his compelling analysis of the politics of interpretation Moxey draws attention to a vital aspect of the cultural importance of history

Philosophy at the Limit David Wood, 2023-08-11 First published in 1990 *Philosophy at the Limit* was originally part of the Problems of Modern European Thought book series It pursues the theme of philosophy's confrontation with its own limits in modern philosophers from Hegel to Derrida including Nietzsche Wittgenstein Heidegger and Gadamer The author focuses on questions of philosophical style dialogue and indirect communication the structural closure of philosophical texts and performative strategy in philosophy The book is an accessible discussion of many of the complex issues that empower continental philosophy It will appeal to students of philosophy and contemporary thought at every level and to the general reader interested in the heart of the debates in European thought

The Deconstruction of Time David Wood, 2001 Double rethinking seeks to rethink time in terms of our experience of it and attempts to rethink our selves in terms of the results of that initial rethinking This book undertakes a critical reformulation of the project through discussions of Derrida Nietzsche Husserl and Heidegger

Thinking Without Desire Panu Minkkinen, 1999-10-06 The book attempts to evaluate the reception of Continental philosophy phenomenology hermeneutics deconstruction within mainstream jurisprudence

Deconstruction and Critical Theory Peter V. Zima, 2002-06-01 This book surveys the main schools and theorists of deconstruction establishing their philosophical roots and tracing their intellectual development It analyses their contribution to the understanding of literature and ideology comparing their critical value and exploring the critical reaction to deconstruction and its limitations The text is designed for students who wish to understand how and why deconstruction has become the dominant tool of the humanities

Deconstruction and Critical Theory marks a new stage in the reception history of Derrida's work and in the wider philosophical debate around deconstruction Zima's study makes a strikingly original contribution to our better understanding of deconstruction and its various philosophic sources Christopher Norris University of Wales at Cardiff *Deconstruction and Critical Theory* surveys the main schools and theorists of deconstruction establishes their philosophical roots traces their intellectual development analyses their contribution to the understanding of literature and ideology compares their critical value explores the critical reaction to deconstruction and its limitations This is the ideal text for students who wish to understand how and why deconstruction has become the dominant tool of the Humanities

Deconstruction and the Postcolonial Michael Syrotinski, 2007-01-01 Postcolonial studies and the rich body of theory that it applies in its analyses has

transformed and unsettled the ways in which across a whole range of disciplines we think about notions such as subjectivity national identity globalization history language literature or international politics Until recently the emphasis of the groundbreaking work being carried out in these areas has been almost exclusively within an Anglophone context but increasingly the focus of postcolonial studies is shifting to a more comparative approach One of the most intriguing developments in this shift ICGG 2018 - Proceedings of the 18th International Conference on Geometry and Graphics Luigi Cocchiarella,2018-07-06 This book gathers peer reviewed papers presented at the 18th International Conference on Geometry and Graphics ICGG held in Milan Italy on August 3 7 2018 The spectrum of papers ranges from theoretical research to applications including education in several fields of science technology and the arts The ICGG 2018 mainly focused on the following topics and subtopics Theoretical Graphics and Geometry Geometry of Curves and Surfaces Kinematic and Descriptive Geometry Computer Aided Geometric Design Applied Geometry and Graphics Modeling of Objects Phenomena and Processes Applications of Geometry in Engineering Art and Architecture Computer Animation and Games Graphic Simulation in Urban and Territorial Studies Engineering Computer Graphics Computer Aided Design and Drafting Computational Geometry Geometric and Solid Modeling Image Synthesis Pattern Recognition Digital Image Processing and Graphics Education Education Technology Research Multimedia Educational Software Development E learning Virtual Reality Educational Systems Educational Software Development Tools MOOCs Given its breadth of coverage the book introduces engineers architects and designers interested in computer applications graphics and geometry to the latest advances in the field with a particular focus on science the arts and mathematics education **Deconstructionism** Joan Nordquist,1992 **Politics of Deconstruction** Susanne Lüdemann,2014-08-13 The book offers a new introduction to Jacques Derrida and to Deconstruction as an important strand of Continental Philosophy From his early writings on phenomenology and linguistics to his later meditations on war terrorism and justice Jacques Derrida 1930 2004 achieved prominence on an international scale by addressing as many different audiences as he did topics Yet despite widespread acclamation his work has never been considered easy Rendering accessible debates that marked more than four decades of engagement and inquiry Susanne L demann traces connections between the philosopher s own texts and those of his many interlocutors past and present Unlike conventional introductions Politics of Deconstruction offers a number of personal approaches to reading Derrida and invites readers to find their own Emphasizing the relationship between philosophy and politics it shows that with Deconstruction there is much more at stake than an academic discussion for Derrida s work deals with all the burning political and intellectual challenges of our time The author s own professional experience in both the United States and in Europe which particularly inform her chapter on Derrida s reception in the United States opens a unique perspective on a unique thinker one that rewards specialists and newcomers alike *Personality Imagery* *Deconstruction: Theory And Application* Yuan Yuan,Yu Cao,Jianjun Zhu,2025-03-07 Personality imagery deconstruction is an

innovative theory in personality psychology grounded in Imagery Communication Psychology ICP This book offers a comprehensive exploration of the sources of personality imagery as well as the significance and methods of deconstructing it for practical applications Inspired by Chinese cultural philosophy this approach views personality as a system rather than a collection of separate traits Instead personality is deconstructed into distinct independent sub personalities each with its own motives behaviours and preferences Through ICP these sub personalities emerge in the conscious mind appearing as individual entities within a broader community of the self By consciously engaging with each sub personality individuals can encourage communication and harmony among them This process allows for the transformation of negative or stagnant sub personalities helping to restore vitality and clarity to the overall personality In essence personality imagery deconstruction enables personal growth by transforming the inner dynamics of one's mental life

Narrative after Deconstruction Daniel Punday, 2012-02-01 Interrogating stories told about life after deconstruction and discovering instead a kind of afterlife of deconstruction Daniel Punday draws on a wide range of theorists to develop a rigorous theory of narrative as an alternative model for literary interpretation Drawing on an observation made by Jean Fran ois Lyotard Punday argues that at the heart of narrative are concrete objects that can serve as lynchpins through which many different explanations and interpretations can come together Narrative after Deconstruction traces the often grudging emergence of a post deconstructive interest in narrative throughout contemporary literary theory by examining critics as diverse as Jacques Derrida Gilles Deleuze Elizabeth Grosz and Edward Said Experimental novelists like Ronald Sukenick Raymond Federman Clarence Major and Kathy Acker likewise work through many of the same problems of constructing texts in the wake of deconstruction and so provide a glimpse of this post deconstructive narrative approach to writing and interpretation at its most accomplished and powerful

Identity Politics in Deconstruction Carolyn D' Cruz, 2008 Identity politics dominates the organisation of liberation movements today In this book Carolyn D Cruz investigates the nexus between what David Birch describes as the seemingly impossible of high theory and the seemingly accessible possibilities of popular discourse as encountered in liberation movements based on identity D Cruz reworks the logic of such movements through the unique combination of Derridean deconstruction Foucauldian discourse and Levinasian ethics Moving both within and between the domains of philosophy politics and postmodern culture this book offers both a clear explication of complex philosophical issues and an understanding of how they relate to the political practicalities of everyday life

Constitutional Interpretation Keith E. Whittington, 1999 With its detailed and wide ranging explorations in history philosophy and law this book is essential reading for anyone interested in how the Constitution ought to be interpreted and what it means to live under a constitutional government
