simplicity of a small garden It is not surprising then that also in the sphere of economics flowers should have come to play an important role Three decades ago a small group of visionary entrepreneurs realized that the Bogota Savannah and certain regions of Antioquia were ideal sites for intensive floriculture and they put that idea to work At present Colombia is one of the world s leader flower producing countries and one of the main exporters to the United States Ninety percent of Colombia s entire flower production is for exportation The quality of its products its rigorous at meeting schedules and the competitiveness of its prices have helped the Colombian flower industry to maintain its privileged position in international markets competing and successfully against countries such as Holland and Japan The flower industry has also helped to strengthen the Colombian economy in rural areas by maintaining a stable working population thus helping to avoid migration to the cities
