Ceramics and Society Valentine Roux,2019-02-14 Pottery is the most ubiquitous find in most historical archaeological excavations and serves as the basis for much research in the discipline But it is not only its frequency that makes it a prime dataset for such research it is also that pottery embeds many dimensions of the human experience ranging from the purely technical to the eminently symbolic The aim of this book is to provide a cutting edge theoretical and methodological framework as well as a practical guide for archaeologists students and researchers to study ceramic assemblages As opposed to the conventional typological approach which focuses on vessel shape and assumed function with the main goal of establishing a chronological sequence the proposed framework is based on the technological approach Such an approach utilizes the concept of chaîne opératoire which is geared to an anthropological interpretation of archaeological objects The author offers a sound theoretical background accompanied by an original research strategy whose presentation is at the heart of this book This research strategy is presented in successive chapters that are geared to explain not only how to study archaeological assemblages but also why the proposed methods are essential for achieving ambitious interpretive goals In the heated debate on the equation stating that pots equal people which is a rather fuzzy reference to assumed relationships between mostly ethnic groups and pottery technology enables us to propose with conviction the equation pots equal potters In this way a well founded history of potters is able to achieve a much better cultural and anthropological understanding of ancient societies

Egalitarian Revolution in the Savanna Stephen A. Dueppen,2014-09-11 Many West African societies have egalitarian political systems with non centralised distributions of power Egalitarian Revolution in the Savanna analyses a wide range of archaeological data to explore the development of such societies The volume offers a detailed case study of the village settlement of Kirikongo in western Burkina Faso Over the course of the first millennium this single homestead extended control over a growing community The book argues that the decentralization of power in the twelfth century BCE radically transformed this society changing gender roles public activities pottery making and iron working Egalitarian Revolution in the Savanna will be of interest to students of political science anthropology archaeology and the history of West Africa

Good taste, fashion, luxury: a genteel Melbourne family and their rubbish Sarah Hayes,2014-09-09 Melbourne grew during the 19th century from its fledgling roots into a global metropolitan centre and was home to many people from a range of social and cultural backgrounds The Martin family arrived in Melbourne in 1839 and soon established themselves at the genteel Viewbank estate near Heidelberg They were typical of the early middle class immigrants to Melbourne who brought their gentility and privilege with them to the colony The Martins spent many years at Viewbank and the physical remains they left behind provide a valuable case study for examining class negotiation in the colony through historical archaeology In this important study material culture is used to understand the unique way in which the Martin family used gentility to establish and maintain their class position

Prehistoric Subsistence on the Southern New England Coast David J. Bernstein, 2014-06-28 Prehistoric Subsistence on the Southern New England Coast examines long term trends in prehistoric subsistence in the Narragansett Bay region of Southern New England The results suggest that unlike other areas of Eastern north America specialized agricultural economies did not develop in this region prior to European contact The book is accessible to both the general reader as well as scholars and students interested in consulting the original data for their own research and analysis Incorporates original research in palynology and geomorphology in to an archaeological study Presents a study of modern shellfish growth that is used to interpret the archaeological remains found at Greenwich Cove Uses numerous animal species to determine site seasonality
