Deeds Of Louis The Fat:

The Deeds of Louis the Fat Abbot of Saint Denis, Suger, 1992 No description available **Kings, Knights and Bankers** Richard Kaeuper, Christopher Guyol, 2015-10-20 In *Kings Knights and Bankers* Richard Kaeuper presents a lifetime of medieval research on Italian financiers English kingship chivalric violence and knightly piety His foundational work on public finance connects Italian merchant banking with the growth of state power at the turn of the fourteenth century Subsequent articles on law and order offer measured contributions to the continuing debate over the growth of governance and its relationship with contemporary disorder He also convincingly proves that knights the foremost military professionals of the medieval world considered their prowess as both a source of honor and of sanctification All interested in the history of medieval chivalry governance piety and public finance can learn from this impressive collection of articles Paris Alexandra Gajewski, John McNeill, 2023-07-24 *Paris The Powers that Shaped the Medieval City* considers the various forces royal monastic and secular that shaped the art architecture and topography of Paris between c 1100 and c 1500 a period in which Paris became one of the foremost metropolises in the West The individual contributions written by an international group of scholars cover the subject from many different angles They encompass wide ranging case studies that address architecture manuscript illumination and stained glass as well as questions of liturgy religion and social life Topics include the early medieval churches that preceded the current cathedral church of Notre Dame and cultural production in the Paris area in the late 12th and early 13th centuries as well as Paris s chapels and bridges There is new evidence for the source of the c 1240 design for a celebrated window in the Sainte Chapelle an evaluation of the liturgical arrangements in the new shrine choir of Saint Denis built 1140-44 and a valuable assessment of the properties held by the Cistercian Order in Paris in the Middle Ages Also the book investigates the relationships between manuscript illuminators in the 14th century and representations of Paris in manuscripts and other media up to the late 15th century *Paris The Powers that Shaped the Medieval City* updates and enlarges our knowledge of this key city in the Middle Ages **Holy Warriors** Richard W. Kaeuper, 2012-06-04 The medieval code of chivalry demanded that warrior elites demonstrate fierce courage in battle display prowess with weaponry and avenge any strike against their honor They were also required to be devout Christians How then could knights pledge fealty to the Prince of Peace who enjoined the faithful to turn the other cheek rather than seek vengeance and who taught that the meek rather than glorious fighters in tournaments shall inherit the earth By what logic and language was knighthood valorized In *Holy Warriors* Richard Kaeuper argues that while some clerics sanctified violence in defense of the Holy Church others were sorely troubled by chivalric practices in everyday life As elite laity knights had theological ideas of their own Soundly pious yet independent knights proclaimed the validity of their bloody profession by selectively appropriating religious ideals Their ideology emphasized meritorious suffering on campaign and in battle even as their violence enriched them and established their dominance In a world of divinely ordained social orders theirs was blessed

though many sensitive souls worried about the ultimate price of rapine and destruction Kaeuper examines how these paradoxical chivalric ideals were spread in a vast corpus of literature from exempla and chansons de geste to romance Through these works both clerics and lay military elites claimed God's blessing for knighthood while avoiding the contradictions inherent in their fusion of chivalry with a religion that looked back to the Sermon on the Mount for its ethical foundation

Royal Bastards Sara McDougall, 2017 The stigmatization as bastards of children born outside of wedlock is commonly thought to have emerged early in Medieval European history Christian ideas about legitimate marriage it is assumed set the standard for legitimate birth Children born to anything other than marriage had fewer rights or opportunities They certainly could not become king or queen As this volume demonstrates however well into the late twelfth century ideas of what made a child a legitimate heir had little to do with the validity of his or her parents union according to the dictates of Christian marriage law Instead a child's prospects depended upon the social status and above all the lineage of both parents To inherit a royal or noble title being born to the right father mattered immensely but also being born to the right kind of mother Such parents could provide the most promising futures for their children even if doubt was cast on the validity of the parents marriage Only in the late twelfth century did children born to illegal marriages begin to suffer the same disadvantages as the children born to parents of mixed social status Even once this change took place we cannot point to the Church as instigator Instead exclusion of illegitimate children from inheritance and succession was the work of individual litigants who made strategic use of Christian marriage law This new history of illegitimacy rethinks many long held notions of medieval social political and legal history

Early Gothic Column-Figure Sculpture in France Janet E. Snyder, 2017-07-05 Richly illustrated Early Gothic Column Figure Sculpture in France is a comprehensive investigation of church portal sculpture installed between the 1130s and the 1170s At more than twenty great churches beginning at the Royal Abbey of Saint Denis and extending around Paris from Provins in the east south to Bourges and Dijon and west to Chartres and Angers larger than life size statues of human figures were arranged along portal jambs many carved as if wearing the dress of the highest ranks of French society This study takes a close look at twelfth century human figure sculpture describing represented clothing defining the language of textiles and dress that would have been legible in the twelfth century and investigating rationale and significance The concepts conveyed through these extraordinary visual documents and the possible motivations of the patrons of portal programs with column figures are examined through contemporaneous historical textual and visual evidence in various media Appendices include analysis of sculpture production and the transportation and fabrication in limestone from Paris Janet Snyder's new study considers how patrons used sculpture to express and shape perceived reality employing images of textiles and clothing that had political economic and social significances

Constance of France Myra Miranda Bom, 2022-11-12 Constance of France Womanhood and Agency in Twelfth Century Europe is a biography of Constance of France sister of King Louis VII of France Myra Bom recovers

Constance's life story and puts it in its medieval context by examining the historical evidence of chronicles, charters, seal imprints and letters. The countess's long and interesting life makes for women's history with a large geographical scope including France, England, Toulouse and the Latin East. It touches on many aspects of life during the Middle Ages such as birth, marriage and divorce, gender roles, experience of time and expectation for the afterlife. Bom demonstrates how and to what extent medieval women could and did take control of their own lives. This book is an account of the interplay of historical context and agency.

Paths to Kingship in Medieval Latin Europe, c. 950–1200 Björn Weiler, 2021-10-14. What did kingship mean to medieval Europeans, especially to those who did not wear a crown? From the training of heirs to the deathbed of kings and the choosing of their successors, this engaging study explores how a ruler's subjects shaped both the idea and the reality of power.

The Normans in Europe Elisabeth Van Houts, 2013-01-01. This book provides a selection from the abundant source material generated by the Normans and the peoples they conquered. As this study demonstrates, few other medieval peoples generated historical writing of such quantity and quality. Van Houts takes a wide European perspective on the Normans, assessing and explaining their origin, the Norman expansion and their political and social organisation in the period between c. 900 to c. 1150. The Normans in Europe explores such areas as the process of assimilation between Scandinavians and Franks and the emergence of Normandy, the internal organisation of the principality with a variety of source materials from chronicles, miracle stories and charters, the roles of women and children in Norman society, the main chronicle sources for the history of the Norman invasion and settlement in Britain, the contacts between the Norman dukes and the territorial princes of France and the progress of the Normans amongst the settlers in Southern Italy and elsewhere in the Mediterranean.

Norman Rule in Normandy, 911–1144 Mark S. Hagger, 2017. In around 911 the Viking adventurer Rollo was granted the city of Rouen and its surrounding district by the Frankish King Charles the Simple. Two further grants of territory followed in 924 and 933. But while Frankish kings might grant this land to Rollo and his son William Longsword, these two Norman dukes and their successors had to fight and negotiate with rival lords, hostile neighbours, kings and popes in order to establish and maintain their authority over it. This book explores the geographical and political development of what would become the duchy of Normandy and the relations between the dukes and these rivals for their lands and their subjects' fidelity. It looks too at the administrative machinery the dukes built to support their regime, from their toll collectors and vicomtes, an official similar to the English sheriff, to the political theatre of their courts and the buildings in which they were staged. At the heart of this exercise are the narratives that purport to tell us about what the dukes did and the surviving body of the dukes' diplomas. Neither can be taken at face value and both tell us as much about the concerns and criticisms of the dukes' subjects as they do about the strength of the dukes' authority. The diplomas, in particular, because most of them were not written by scribes attached to the dukes' households but rather by their beneficiaries, can be used to recover something of how the dukes' subjects saw their rulers as well as something of what they wanted or needed.

Courting Sanctity Sean L. Field,2019-05-15 The rise of the Capetian dynasty across the long thirteenth century which rested in part on the family s perceived sanctity is a story most often told through the actions of male figures from Louis IX s metamorphosis into Saint Louis to Philip IV s attacks on Pope Boniface VIII In *Courting Sanctity* Sean L Field argues that in fact holy women were central to the Capetian s self presentation as being uniquely favored by God Tracing the shifting relationship between holy women and the French royal court he shows that the roles and influence of these women were questioned and reshaped under Philip III and increasingly assumed to pose physical spiritual and political threats by the time of Philip IV s death Field s narrative highlights six holy women The saintly reputations of Isabelle of France and Douceline of Digne helped to crystalize the Capetians claims of divine favor by 1260 In the 1270s the French court faced a crisis that centered on the testimony of Elizabeth of Spalbeek a visionary holy woman from the Low Countries After 1300 the arrests and interrogations of Paupertas of Metz Margueronne of Bellevillette and Marguerite Porete served to bolster Philip IV s crusades against the dangers supposedly threatening the kingdom of France *Courting Sanctity* thus reassesses key turning points in the ascent of the most Christian Capetian court through examinations of the lives and images of the holy women that the court sanctified or defamed
