Deep Citizenship:

Education for Citizenship Denis Lawton, Jo Cairns, Roy Gardner, 2004-11-15 There is now broad agreement that citizenship should form an important part of the curriculum And that broadly is where the agreement ends yet busy practitioners have to teach citizenship effectively now Education for Citizenship is based on the assumption that theory needs to be related to practice and that there is already a wealth of good practice from which we can learn **Citizenship** Keith

Faulks, 2013-09-27 This book presents a clear and comprehensive overview of citizenship which has become one of the most important political ideas of our time The author an experienced textbook writer and teacher uses a postmodern theory of citizenship to ask topical questions as Can citizenship exist without the nation state What should the balance be between our rights and responsibilities Should we enjoy group as well as individual rights Is citizenship relevant to our private as well as our public lives Have processes of globalisation rendered citizenship redundant **Citizenship Through Secondary**

Geography David Lambert, Paul Machon, 2004-01-14 This book reveals the potential of geography to engage with citizenship It provides theoretical signposts in the form of short digestible explanations for key ideas such as racism values identity community and social exclusion a number of inset activities for further thinking a critique of the discipline and the pitfalls to avoid in teaching citizenship through geography practical teaching suggestions All the contributions to this valuable book point to the capacity of geography to engage with citizenship values education and people environment decision making on scales that range from the local to the global It offers positive and direct ways to become involved in the thinking that must underpin any worthwhile citizenship education for all experienced teachers student teachers heads of department curriculum managers principals and policy makers **Supranational citizenship** Lynn Dobson, 2013-01-18 Can we conceptualise a

kind of citizenship that need not be of a nation state but might be of a variety of political frameworks Bringing together political theory with debates about European integration international relations and the changing nature of citizenship this book available at last in paperback offers a coherent and innovative theorisation of a citizenship independent of any specific form of political organisation It relates that conception of citizenship to topical issues of the European Union democracy and legitimate authority non national political community and the nature of the supranational constitution The author argues that citizenship should no longer be seen as a status of privileged membership but instead as an institutional role enabling individuals capacities to shape the context of their lives and promote the freedom and well being of others In doing so she draws on and develops ideas found in the work of the philosopher Alan Gewirth **Practicing Citizenship** Kristy

Maddux, 2019-04-24 By 1893 the Supreme Court had officially declared women to be citizens but most did not have the legal right to vote In Practicing Citizenship Kristy Maddux provides a glimpse at an unprecedented alternative act of citizenship by women of the time their deliberative participation in the Chicago World s Fair of 1893 Hailing from the United States and abroad the more than eight hundred women speakers at the World s Fair included professionals philanthropists socialites

and reformers addressing issues such as suffrage abolition temperance prison reform and education Maddux examines the planning of the event the full program of women speakers and dozens of speeches given in the fair's daily congresses In particular she analyzes the ways in which these women shaped the discourse at the fair and modeled to the world practices of democratic citizenship including deliberative democracy racial uplift organizing and economic participation In doing so Maddux shows how these pioneering women claimed sociopolitical ground despite remaining disenfranchised This carefully researched study makes significant contributions to the studies of rhetoric American women's history political history and the history of the World's Fair itself Most importantly it sheds new light on women's activism in the late nineteenth century even amidst the suffrage movement women innovated practices of citizenship beyond the ballot box

Real Green Manuel Arias-Maldonado, 2016-03-23 What would a sustainable society look like How could it be achieved By challenging conventional wisdom about the ecological crisis and reframing the traditional values of green politics Real Green Sustainability after the End of Nature offers new answers to the key questions of the environmental debate In this ground breaking and challenging work Manuel Arias Maldonado convincingly argues that since nature has now been transformed into a part of the human environment it can be seen to no longer exist Ecological problems thus become an inevitable and normal feature of our relationship with nature Hence a post natural environmentalism realistic and liberal while remaining green is advocated In this framework sustainability democracy and liberalism become mutually reinforcing elements rather than conflicting ones Only by combining them can a green society be realised

Rethinking Australian Citizenship Wayne Hudson, John Kane, 2000-06 The notion of citizenship is now being taken up internationally as a way to rethink questions of social cohesion and social justice In Europe the concept of national identity is under close scrutiny while the pressures of globalizing markets and the power of transnational corporations everywhere raise questions about the true place and meaning of citizenship in civil society In Australia a traditional view of citizens belonging to a single nation made up of one people with a special relationship to one land has been thrown open to challenge by a range of differing perspectives Rethinking Australian Citizenship considers the major debates Some chapters look at contemporary theoretical debates while others reinvent Australian citizenship from a particular perspective on civil life The result is a rich and coherent volume that shows the diverse ways in which Australian citizenship can be rethought

Vaughn, 2016-04-22 This volume contains articles examining freedom of information statutes including those protecting government employees who expose official misconduct Using United States laws as examples the articles explore the relationship of these laws to administrative and constitutional theory in the United States In addition they demonstrate how varying conceptions of information illuminate the controversies in the application of these laws to the revolution in the electronic storage and retrieval of information The articles allow the reader to speculate how the connection of these laws to liberal democratic theory explains their recent adoption in several countries and their international application

The Autobiography of Citizenship Tova Cooper, 2015-02-08 At the turn of the twentieth century the United States was faced with a new and radically mixed population one that included freed African Americans former reservation Indians and a burgeoning immigrant population In The Autobiography of Citizenship Tova Cooper looks at how educators tried to impose unity on this divergent population and how the new citizens in turn often resisted these efforts reshaping mainstream U S culture and embracing their own view of what it means to be an American The Autobiography of Citizenship traces how citizenship education programs began popping up all over the country influenced by the progressive approach to hands on learning popularized by John Dewey and his followers Cooper offers an insightful account of these programs enlivened with compelling readings of archival materials such as photos of students in the process of learning autobiographical writing by both teachers and new citizens and memoirs photos poems and novels by authors such as W E B

Du Bois Jane Addams Charles Reznikoff and Emma Goldman Indeed Cooper provides the first comparative inside look at these citizenship programs revealing that they varied wildly at one end assimilationist boarding schools required American Indian children to transform their dress language and beliefs while at the other end the libertarian Modern School encouraged immigrant children to frolic naked in the countryside and learn about the world by walking hiking and following their whims Here then is an engaging portrait of what it was like to be and become a U S citizen one hundred years ago showing that what it means to be American is never static

The Ethics of Cities Timothy Beatley, 2024-04-05 Ethical dilemmas and value conflicts affect cities globally but urban leaders and citizens often avoid confronting them directly and instead view the governance of cities as primarily an administrative task or even worse a merely political one Timothy Beatley challenges readers to consider the issues in our cities not simply as legal or economic problems but as moral ones asking readers How can a city become more ethical Beatley unearths exposes and explores the many ethical questions cities face today and touches on many topics from privacy and crime to racism and the ethics of public space Drawing from recent policy debates and using extensive examples to consider complex ethical dilemmas Beatley argues that cities must expand the definition of the moral community to include all their citizens Cities must take profound steps to address social injustice and plan for climate change both moral

obligations and this approachable and readable introduction to moral philosophy urban planning and social justice will help new generations to grapple with these global issues Geography, Culture and Education Rod Gerber,M.

Williams,2013-04-17 An important challenge for our world is to understand how cultural understanding and geographical education can be linked and used to improve the global society We readily accept that our world is constituted by numerous groups of people who are organised by committees tribes regions nations or continental entities How these groups interact show concern for each others well being and progress is still an unpredictable activity Intercultural tensions racial conflicts and religious clashes have all led to the challenges for enacting a constructive world Fundamental perspectives challenge moderate ones and the resulting tensions produce elements of fear doubt and distrust The extremist views of terrorist groups exaggerate these tensions to the extent that some different cultural groups do not prefer to live in peace with their neighbours Deep seated intercultural tensions predominate over peaceful co existence Such challenges may easily dominate the interaction between racial groups tribes indigenous peoples and colonisers However we know that through the sound practice of intercultural understanding cultural groups in different contexts around the world can interact and co exist successfully and productively In fact they can work together to seek to improve their society This does not mean that one group will dominate the other Rather it means that both groups work together to improve their collective lives Education has played an important role in the long term achievement of such harmony This volume has been developed to demonstrate that geographical education can be a potent force in the development of cultural understanding in different societies
