Deep Design:

Deep Design David Wann,1995-12 In *Deep Design* David Wann explores a new way of thinking about design one that asks What is our ultimate goal before the first step has even been taken Designs that begin with such a question whether in products buildings technologies or communities are sensitive to living systems and can potentially accomplish their mission without the seemingly unavoidable side effects of pollution erosion congestion and stress Such deep designs meet the key criteria of renewability recyclability and nontoxicity Often based on natural systems they are easy to understand and implement and provide more elegant approaches to getting the services and functions we need Wann presents information gleaned from interviews with more than fifty innovative designers in a wide variety of fields and describes numerous case studies that explain the concept and practice of deep design

Deep Design Thinking Mike Baxter,Seaton Baxter,2024-07-14 This book is a manifesto urging deeper thought about what we design as well as how and why we design As design thinking deepens its reach widens making this a book not just for designers but also for policymakers government ministers company CEOs and other makers of big decisions The world we live in presents a myriad of complex critical challenges which design thinking has the potential to resolve The hope in writing this book is that when future generations look back and reflect on how we succeeded in steering away from our climate warming species killing polluting habits of the past towards a more productive life fulfilling and equitable future they might see the hand of deep design thinking on the tiller Seaton and Mike Baxter are father and son who have both been Professors of Design and have contributed over several decades between them to the fields of ecological design product design and strategy design This book is the result of many years of discussions between them on the nature of design and the ideas and practicalities that lead to deep design thinking

Teacher as Designer David Scott,Jennifer Lock,2021-02-20 This book offers insights into how design based processes principles and mindsets can be productively employed in diverse P 16 educational spaces by a myriad of educational actors including teachers instructional leaders and students It addresses concerns about the theoretical and practical implications of the still emergent emphasis of design in education The book begins by examining a number of prominent design processes being used by educators including human centred design designing for authentic inquiries and Universal Design for Learning It then delves into how teachers system leaders and students can engage in educational design within the complex spaces of K 12 contexts Finally the book takes up design in education within a maker and making context Each chapter includes a vignette a series of guiding questions along with specific design principles that can help address common challenges and issues educators encounter in their practice This book provides both theoretical and practical elements involved in educational design and is beneficial to scholars graduate students educators and pre service teachers

The Fundamentals of Graphic Design Gavin Ambrose,Paul Harris,2008-12-24 The book covers key aspects of design including typography art direction production and finishing environmental design and self promotion It also examines the broader

implications of graphic design including social responsibility its role in art and its future The Fundamentals of Graphic Design places graphic design in its socio historical context discussing its influences and development It includes contributions of work from contemporary designers including Pentagram Why Not Associates and Studio Myerscough It is an ideal guide for anyone starting out or seeking a role in the world of graphic design *Designing with the Body* Kristina Hook,2024-03-12 Interaction design that entails a qualitative shift from a symbolic language oriented stance to an experiential stance that encompasses the entire design and use cycle With the rise of ubiquitous technology data driven design and the Internet of Things our interactions and interfaces with technology are about to change dramatically incorporating such emerging technologies as shape changing interfaces wearables and movement tracking apps A successful interactive tool will allow the user to engage in a smooth embodied interaction creating an intimate correspondence between users actions and system response And yet as Kristina H k points out current design methods emphasize symbolic language oriented and predominantly visual interactions In *Designing with the Body* H k proposes a qualitative shift in interaction design to an experiential felt aesthetic stance that encompasses the entire design and use cycle H k calls this new approach soma design it is a process that reincorporates body and movement into a design regime that has long privileged language and logic Soma design offers an alternative to the aggressive rapid design processes that dominate commercial interaction design it allows and requires a slow thoughtful process that takes into account fundamental human values She argues that this new approach will yield better products and create healthier more sustainable companies H k outlines the theory underlying soma design and describes motivations methods and tools She offers examples of soma design encounters and an account of her own design process She concludes with A Soma Design Manifesto which challenges interaction designers to restart their field to focus on bodies and perception rather than reasoning and intellect *Designing Publics* Christopher A. Le Dantec,2016-09-16 An exploration of design considerations in the design of technologies that support local collective action Contemporary computing technologies have thoroughly embedded themselves in every aspect of modern life conducting commerce maintaining and extending our networks of friends and mobilizing political movements all occur through a growing collection of devices and services designed to keep and hold our attention Yet what happens when our attention needs to be more local collective and focused on our immediate communities Perhaps more important how can we imagine and create new technologies with local communities In *Designing Publics* Christopher Le Dantec explores these questions by designing technologies with the urban homeless Drawing on a case study of the design of a computational infrastructure in a shelter for homeless women and their children Le Dantec theorizes an alternate vision of design in community contexts Focusing on collective action through design Le Dantec investigates the way design can draw people together on social issues and create and sustain a public By designing publics he refers both to the way publics arise out of design intervention and to the generative action publics take how they do design as they mobilize and act in the world This

double lens offers a new view of how design and a diverse set of design practices circulate in sites of collective action rather than commercial production *Design Things* Thomas Binder, Giorgio De Michelis, Pelle Ehn, Giulio Jacucci, Per Linde, 2011-09-30 A new perspective on design thinking and design practice beyond products and projects toward participatory design things *Design Things* offers an innovative view of design thinking and design practice envisioning ways to combine creative design with a participatory approach encompassing aesthetic and democratic practices and values The authors of *Design Things* look at design practice as a mode of inquiry that involves people space artifacts materials and aesthetic experience following the process of transformation from a design concept to a thing *Design Things* which grew out of the Atelier Architecture and Technology for Inspirational Living research project goes beyond the making of a single object to view design projects as sociomaterial assemblies of humans and artifacts design things The book offers both theoretical and practical perspectives providing empirical support for the authors conceptual framework with field projects case studies and examples from professional practice The authors examine the dynamics of the design process the multiple transformations of the object of design metamorphosing performing and taking place as design strategies the concept of the design space as emerging landscapes the relation between design and use and the design of controversial things

Advances in Human Factors in Training, Education, and Learning Sciences Salman Nazir, Anna-Maria Teperi, Aleksandra Polak-Sopińska, 2018-06-27 This book focuses on the importance of human factors in optimizing the learning and training process It reports on the latest research and best practices and discusses key principles of behavioral and cognitive science which are extremely relevant to the design of instructional content and new technologies to support mobile and multimedia learning virtual training and web based learning among others as well as performance measurements social and adaptive learning and many other types of educational technologies with a special emphasis on those important in the corporate higher education and military training contexts Based on the AHFE 2018 Conference on Human Factors in Training Education and Learning Sciences held July 21 25 2018 in Orlando Florida USA on July 21 25 2018 the book offers a timely perspective on the role of human factors in education It highlights important new ideas and will foster new discussions on how to optimally design learning experiences The Five Literacies of Global Leadership Richard David Hames, 2015-06-10

New research has exposed our leadership paradigm as a outdated mess of flawed models and practices By working with great leaders and observing their common attitudes and behaviours Richard Hames has cracked a universal code based on intelligence appreciation and collaboration This code unlocks Five Literacies of Global Leadership These behaviours are the trade secrets of the artists and alchemists among us Often instinctively these leaders charge others with energy search for new perspectives and embrace diversity And they are driven by dialogue This book reveals approaches and attitudes that they all share and that can make anyone an exceptional leader The Aesthetics of Imagination in Design Mads Nygaard Folkmann, 2013-04-12 A theoretically informed investigation that relates the philosophies of aesthetics and imagination to

understanding design practice In *The Aesthetics of Imagination in Design* Mads Folkmann investigates design in both material and immaterial terms Design objects Folkmann argues will always be dual phenomena material and immaterial sensual and conceptual actual and possible Drawing on formal theories of aesthetics and the phenomenology of imagination he seeks to answer fundamental questions about what design is and how it works that are often ignored in academic research Folkmann considers three conditions in design the possible the aesthetic and the imagination Imagination is a central formative power behind the creation and the life of design objects aesthetics describes the sensual conceptual and contextual codes through which design objects communicate the concept of the possible the enabling of new uses conceptions and perceptions lies behind imagination and aesthetics The possible Folkmann argues is contained as a structure of meaning within the objects of design which act as part of our interface with the world Taking a largely phenomenological perspective that reflects both continental and American pragmatist approaches Folkmann also makes use of discourses that range from practice focused accounts of design methodology to cultural studies Throughout he offers concrete examples to illustrate theoretical points Folkmann s philosophically informed account shows design in all its manifestations from physical products to principles of organization to be an essential medium for the articulation and transformation of culture *Gowanus Creek Channel Navigation Improvement, Brooklyn* ,1982

Discursive Design Bruce M. Tharp, Stephanie M. Tharp, 2022-11-22 Exploring how design can be used for good prompting self reflection igniting the imagination and affecting positive social change Good design provides solutions to problems It improves our buildings medical equipment clothing and kitchen utensils among other objects But what if design could also improve societal problems by prompting positive ideological change In this book Bruce and Stephanie Tharp survey recent critical design practices and propose a new more inclusive field of socially minded practice discursive design While many consider good design to be unobtrusive intuitive invisible and undemanding intellectually discursive design instead targets the intellect prompting self reflection and igniting the imagination Discursive design derived from discourse expands the boundaries of how we can use design how objects are in effect good s for thinking Discursive Design invites us to see objects in a new light to understand more than their basic form and utility Beyond the different foci of critical design speculative design design fiction interrogative design and adversarial design Bruce and Stephanie Tharp establish a more comprehensive unifying vision as well as innovative methods They not only offer social criticism but also explore how objects can for example be used by counselors in therapy sessions by town councils to facilitate a pre vote discussions by activists seeking engagement and by institutions and industry to better understand the values beliefs and attitudes of those whom they serve Discursive design sparks new ways of thinking and it is only through new thinking that our sociocultural futures can change

Before Modernism Virginia Jackson, 2023-02-14 In *Before Modernism Inventing American Lyric* Virginia Jackson argues that in the late eighteenth and early nineteenth centuries Black poetics in antagonism with White poetics produced the conditions for the invention of modern American poetry This is not a history of American poetry that begins with the Puritans and stretches to the present or that jumps from the British Romantics to Walt Whitman or that restricts the influence of African American poetry to a separate tradition instead this book emphasizes the many ways in which early Black poets invented what Phillis Wheatley Peters called the deep design of American lyric Through readings of the poetics of Wheatley Peters George Moses Horton James Monroe Whitfield and Frances Ellen Watkins Harper as well as the poetics of now neglected but once popular White poets William Cullen Bryant and Henry Wadsworth Longfellow Jackson suggests that Black poetics inspired the direction that American poetics has taken for the last two centuries Thus this book represents not only a new history but a new theory of American poetry Over the late eighteenth and early nineteenth centuries as an idea of poetry based on genres of poems ballads elegies odes hymns drinking songs epistles etc gave way to an idea of poetry based on genres of people Black White male female Indigenous etc almost all poetry became lyric poetry Like everything else in America what we now think lyric is can be traced back to the twisted paths that have determined what we now think people are and can be This book tells that story the story of American lyric
