Deep River A Memoir Of A Missouri Farm:

Deep River David Hamilton, 2014-03-21 *Deep River* uncovers the layers of history both personal and regional that have accumulated on a river bottom farm in west central Missouri. This land was part of a late frontier passed over then developed through the middle of the last century as the author's father and uncle cleared a portion of it and established their farm. Hamilton traces the generations of Native Americans, frontiersmen, settlers, and farmers who lived on and alongside the bottomland over the past two centuries. It was a region fought over by Union militia and Confederate bushwhackers as well as by their respective armies, an area that invited speculation and the establishment of several small towns both before and after the Civil War, land on which the Missouri Indians made their long last stand less as a military force than as a settlement and civilization land that attracted French explorers, the first Europeans to encounter the Missouris and their relatives, the Ioways, Otoes, and Osage a century before Lewis and Clark. It is land with a long history of occupation and use extending millennia before the Missouris. Most recently it was briefly and intensively receptive to farming before being restored in large part as state managed wetlands. *Deep River* is composed of four sections each exploring aspects of the farm and its neighborhood. While the family story remains central to each, slavery and the Civil War in the nineteenth century and Native American history in the centuries before that become major themes as well. The resulting portrait is both personal memoir and informal history brought up from layers of time, the compound of which forms an emblematic American story.

Black Earth and Ivory Tower Zachary Michael Jack, 2005. The collected reflections and wisdoms of 30 contemporary farmer-writer-teachers heralding the seventy-fifth anniversary of the quintessential agrarian anthology *I'll Take My Stand*. Zachary Michael Jack himself, a fourth-generation farmer's son, has assembled North America's foremost contemporary writers on the present rural experience to provide their own twenty-first-century insights. In the grand tradition of farmer-writers Robert Frost, Henry David Thoreau, and Andrew Lytle, *Black Earth and Ivory Tower: New American Essays from Farm and Classroom* gathers the disparate wisdoms of modern-day stewards of the land, including Victor David Hanson, Michael Martone, Linda Hasselstrom, John Hildebrand, Country Things cartoonist Bob Artley, and Duane Acker, former U.S. Assistant Secretary of Science and Education and former president of Kansas State University. These gifted teachers and growers offer hard-won inspiration from the field and the classroom, exemplifying the multifaceted farm-grounded talents that call them to lives as writers, visual artists, conservation tillers, environmentalists, economists, policymakers, extension agents, and grassroots activists. Seeking a balanced life that reconciles the hands, heart, and head, they follow roads less traveled to find agrarian lifestyles at once enlightening and challenging. At a time when less than two percent of Americans count themselves as farmers, these writers, all of whom have cultivated the earth and climbed the ivory tower, underscore the diversity of the American farm as a wellspring of learning. Their plainspoken commentaries on modern farming, teaching, and living will remind older generations of time-honored agrarian values and provide a new generation with a literate critical account of

shifting national priorities **American Farming Culture and the History of Technology** Joshua T.

Brinkman, 2024-05-06 Presenting a history of agriculture in the American Corn Belt this book argues that modernization occurred not only for economic reasons but also because of how farmers use technology as a part of their identity and culture Histories of agriculture often fail to give agency to farmers in bringing about change and ignore how people embed technology with social meaning This book however shows how farmers use technology to express their identities in unspoken ways and provides a framework for bridging the current rural urban divide by presenting a fresh perspective on rural cultural practices Focusing on German and Jeffersonian farmers in the 18th century and Corn Belt producers in the 1920s the Cold War and the recent period of globalization this book traces how farmers formed their own versions of rural modernity Rural people use technology to contest urban modernity and debunk yokel stereotypes and women specifically employed technology to resist urban gender conceptions This book shows how this performance of rural identity through technological use impacts a variety of current policy issues and business interests surrounding contemporary agriculture from the controversy over genetically modified organisms and hog confinement facilities to the growth of wind energy and precision technologies Inspired by the author's own experience on his family's farm this book provides a novel and important approach to understanding how farmers culture has changed over time and why machinery is such a potent part of their identity This book will be of great interest to students and scholars of agricultural history technology and policy rural studies the history of science and technology and the history of farming culture in the USA **Called to Courage** Margot Ford

McMillen, Heather Roberson, 2002 While there are many accessible biographies of important Missouri men there are few such biographies of Missouri women which might suggest that they did not count in history This book written by a mother and daughter team helps to correct that misconception by tracing the lives of four women who played important roles in their eras These women were exceptional because they had the courage to make the best of their abilities forging trails and breaking the barriers that separated women's spheres from those of men Using Missouri and Illinois archives Margot Ford McMillen and Heather Roberson describe the lives of both women and men showing how roles changed as Missouri and America matured This book will be welcomed by anyone interested in women's history or Missouri history Book jacket

Pastkeepers in a Small Place Michael C. Batinski, 2004

How ordinary people use the past to shape their sense of self and community People know who they are by fixing themselves in place and time They keep the past in numerous ways not simply by writing histories but also by telling stories creating pictures collecting memorabilia preserving old homes and tracing genealogies As Michael C Batinski shows in this imaginative study the pastkeepers of Deerfield Massachusetts have long illustrated this human yearning to connect with past and place For five centuries people in this small New England town have passed stories from one generation to the next preserved homes and established one of the nation s first historical societies and local history museums Like many small places in the American landscape Batinski points out Deerfield does not fit into the history we learn in textbooks With the exception of the famous French and Indian raid on the town in 1704 nothing of national significance has happened there Yet that has not diminished the interest of local inhabitants in establishing and maintaining a vital connection to the past
