Zones of Thought Vernor Vinge, 2010-10-21 Vinge's masterpieces together at last in one epic volume The Hugo Award winning *A FIRE UPON THE DEEP* and its epic companion novel *A DEEPNESS IN THE SKY* set in the same universe but 20 000 years earlier were benchmarks for SF in the last decade of the 20th century In *FIRE* Vinge presents a galaxy divided into Zones regions where different physical constraints allow very different technological and mental possibilities Earth remains in the Slowness zone where nothing can travel faster than light and minds are fairly limited The action of the book is in the Beyond where translight travel and other marvels exist and humans are one of many intelligent species One human colony has been experimenting to find a path to the Transcend where intelligence and power are so great as to seem godlike Instead they release the Blight an evil power from a billion year captivity Publisher's Weekly In *DEEPNESS* the story has the same sense of epic vastness despite happening mostly in one isolated solar system Here there's a world of intelligent spider creatures who traditionally hibernate through the Deepest Darkness of their strange variable sun's long off periods when even the atmosphere freezes Now science offers them an alternative Meanwhile attracted by spider radio transmissions two human starfleets come exploring merchants hoping for customers and tyrants who want slaves Their inevitable clash leaves both fleets crippled with the power in the wrong hands which leads to a long wait in space until the spiders develop exploitable technology Over the years Vinge builds palpable tension through multiple storylines and characters Dave Langford
