Symes, 2011-10-10 This unique reference provides a primary source for osteologists and the medical legal community for the understanding of burned bone remains in forensic or archaeological contexts It describes in detail the changes in human bone and soft tissues as a body burns at both the chemical and gross levels and provides an overview of the current procedures in burned bone study Case studies in forensic and archaeological settings aid those interested in the analysis of burned human bodies from death scene investigators to biological anthropologists looking at the recent or ancient dead Includes the diagnostic patterning of color changes that give insight to the severity of burning the positioning of the body and presence or absence of soft tissues during the burning event Chapters on bones and teeth give step by step recommendations for how to study and recognize burned hard tissues **Bearing the Torch** T.R.C. Hutton, 2023-08-18 *Bearing the Torch* stands as a comprehensive history of the University of Tennessee replete with

anecdotes and vignettes of interest to anyone interested in UT from the administrators and chancellors to students and alums and even to the Vols fans whose familiarity with the school comes mainly from the sports page It is also a biography of a school whose history reflects that of its state and its nation The institution that began as Blount College in 1794 in a frontier village called Knoxville exemplifies the relationship between education and American history This is the first scholarly history of UT since 1984 T R C Hutton not only provides a much needed update but also seeks to present a social history of the university fully integrating historical context and showing how the volume s central character the university itself reflects historical themes and concerns For example Hutton shows how the school s development was hampered in the early nineteenth century by stingy state funding a theme that also appears in subsequent decades and Jacksonian fears that publicly funded higher education equaled elite privilege The institution nearly disappeared as the Civil War raged in a divided region but then it flourished thanks to policies that never could have happened without the war In the twentieth century students embraced dramatic social changes as the university wrestled with race gender and other important issues In the Cold War era UT became a successful research institution and entered into a deep partnership with Oak Ridge National Laboratories that persists to this day All the while UT athletics experienced the highs of national championships and the lows of lawsuits and losing seasons UT is a university with a universe of historical experiences The University of Tennessee s story has always been defined by inclusion and exclusion and the school has triumphed when it practiced the former and failed when it took part in the latter Bearing the Torch traces that ongoing process richly detailing the University s contributions to what one president Joseph Estabrook called the diffusion of knowledge among the people

Ritualizing the Disposal of the Deceased William W. McCorkle, 2010 Ritualizing the Disposal of the Deceased traces mortuary behavior from the early fossil record to modern religious contexts in diverse cultural settings By using archival and ethnographic evidence from Buddhist traditions the author highlights the disparity between doctrines that contradict actual practices performed by Buddhists themselves By appealing to the evolved cognitive architecture of human minds this book argues that ritualized disposal behavior is the by product of mental systems designed to handle living people Due to complex social intelligence humans are compelled to handle dead people in ritualized behaviors and to represent them in counterintuitive ways The author also examines the professional religious guilds that have taken advantage of these ritualized compulsions over the last several thousand years by giving and controlling the meanings behind these actions Furthermore experimental evidence is given to support this hypothesis providing the first mature cognitive and evolutionary theory for mortuary behavior by humans
