Post-Communist Poland - Contested Pasts and Future Identities Ewa Ochman, 2013-07-18 This book explores the reinterpretations of Poland's past which have been undertaken by Polish national and local elites since the fall of communism It focuses on remembrance practices and traces the decommemorating of communism to examine the ways in which collective remembering and forgetting shapes present power constellations in Poland and impacts on foreign and domestic policy The book outlines the detail of the new hegemonic national myths which are being established but also investigates fragmentation and diversification of commemorative practices at the local level that has the most potential to challenge the dominant vision of national Polish identity historically centred on martyrdom heroism and independence as less relevant to Poland's new aspirations for the future

Debating a Post-Work Future Denise Celentano, Michael Cholbi, Jean-Philippe Deranty, Kory P. Schaff, 2024-06-19 The book provides a comprehensive critical overview of philosophical social scientific and humanistic arguments about the design and desirability of post work society Its purpose is to clarify the concepts and theories that inform this debate by exploring the diversity of arguments from a wide range of perspectives about the meaning of a post work future The book's 12 chapters were written exclusively for the volume by an international team of researchers in philosophy political science gender studies law sociology history and engineering They are organized into four larger sections I Defining the Post Work Debate II From Past to Future III The Value and Conditions of Work vs Post Work IV The Politics and Justice of Post Work After a general introduction and then an initial round table discussion among four leading theorists the book explores topics like work as an evolving social invention the possible effects of a shorter work week and UBI automation climate change and the roles of Marxism capitalism and democracy in a post work future

Li Dazhao Patrick Fuliang Shan, 2024-03-01 As one of the founders of the Chinese Communist Party Li Dazhao 1889-1927 was a key figure in China's transition from empire to republic from tradition to modernity and from imperial rule to turbulent revolution Patrick Fuliang Shan's biography of Li the first English language study in over half a century draws on a wealth of Chinese language primary

and secondary sources to examine Li's early life, family, education and career, his endeavors to introduce Western civilization to the Chinese, his switch to communism and his leadership role in the early Communist movement, his political maneuvers and revolutionary activities, and his tragic death at the hands of the warlord Zhang Zuolin. While its focus is on Li's personal odyssey and extraordinary journey, the book also presents an in-depth analysis of China's broad national experience and its march towards modernity.

Communism Unwrapped Paulina Bren, Mary Neuburger, 2012-09-06 *Communism Unwrapped* reveals the complex world of consumption in Cold War Eastern Europe, exploring the ways people shopped, ate, drank, smoked, cooked, acquired, assessed, and exchanged goods.

Twenty Years After Communism Michael H. Bernhard, Jan Kubik, 2014 While the fall of the Berlin Wall is positively commemorated in the West, the intervening years have shown that the former Soviet Bloc has a more complicated view of its legacy. In post-communist Eastern Europe, the way people remember state socialism is closely intertwined with the manner in which they envision historical justice. *Twenty Years After Communism* is concerned with the explosion of a politics of memory triggered by the fall of state socialism in Eastern Europe, and it takes a comparative look at the ways that communism and its demise have been commemorated or not commemorated by major political actors across the region. The book is built on three premises. The first is that political actors always strive to come to terms with the history of their communities in order to generate a sense of order in their personal and collective lives. Second, new leaders sometimes find it advantageous to mete out justice on the politicians of abolished regimes, and whether and how they do so depends heavily on their interpretation and assessment of the collective past. Finally, remembering the past, particularly collectively, is always a political process; thus, the politics of memory and commemoration needs to be studied as an integral part of the establishment of new collective identities and new principles of political legitimacy. Each chapter takes a detailed look at the commemorative ceremony of a different country of the former Soviet Bloc. Collectively, the book looks at patterns of extrication from state socialism, patterns of ethnic and class conflict, the strategies of communist successor parties, and the cultural traditions of a given country that influence the way official collective memory is constructed. *Twenty Years After Communism* develops a new analytical and explanatory framework that helps readers to understand the utility of historical memory as an important and understudied part of democratization.

The Future of University Education Michał Izak, Monika Kostera, Michał Zawadzki, 2017-04-26 This collected volume of essays offers glimpses of the future of university education. While universities consider the spirit of theoretical exchange and intellectual pursuit to be a defining trait of their identity, this book argues that this heritage is disappearing under the influence of the short-term demands of societies and markets. Universities used to be sites of dissent, civil courage, and societal conscience, but have now instead become little more than pseudo-businesses, rendering them incapable of remaining critical or independent. However, with more people going to university every year, there is a strong resistance to the notion that the university as a collegial and critical institution is dead among academics as well as the broader public. With contributions from scholars across the world, this

edited collection explores the ramifications of marketization on universities and provides glimpses of what higher education will look like in the future It will be of great interest to teachers and students in higher education as well as policy makers and those interested in the current and future state of higher education **Vygotsky's Notebooks** Ekaterina

Zavershneva,René van der Veer,2018-01-24 This book consists of previously unpublished manuscripts by Vygotsky found in the first systematic study of Vygotsky s family archive The notebooks and scientific diaries gathered in this volume represent all periods of Vygotsky s scientific life beginning with the earliest manuscript entitled The tragicomedy of strivings 1912 and ending with his last note entitled Pro domo sua 1934 written shortly before his death The notes reveal unknown aspects of the eminent psychologist s personality show his aspirations and interests and allow us to gain insights into the development of his thinking and its internal dynamics Several texts reflect the plans that Vygotsky was unable to realize during his lifetime such as the creation of a theory of emotions and a theory of consciousness others reveal Vygotsky s involvement in activities that were previously unknown and still others provide outlines of papers and lectures The notes are presented in chronological order preceded by brief introductions and accompanied by an extensive set of notes The result is a book that allows us to obtain a much deeper understanding of Vygotsky s innovative ideas The Future of Belief Debate Gregory

Baum,1967 **Parliamentary Debates** New Zealand. Parliament,1968 **Debate Resolved** George Grebens PhD,2011-12-28 This e book has a life that began with 28 pages of recommendations to a high school teacher who requested ways of addressing a publishers three questions on the Neo Evolution vs Creation debate This was in May 2005 Since then I expanded similar Q As in various media participated in public debates 2007 2009 I look back to the successful high level Evolution vs Creation debates that were held during the 1970s and early 1980s Dr Henry M Morris and Dr Duane T Gish had used their newly developed Creation Scientific Model to challenge those who defended the Evolution Scientific Model The Debates format was very constructive and contributed strategically in addressing many key issues that required further clarification The debaters were well prepared and well disciplined and even if some of the debaters appeared to have lost in this round the debate exercise itself helped to rejuvenate the debaters and the audience thus helping them to energize and look forward towards the next round of the continuing series of debates Parliamentary Debates. Legislative Council and

House of Representatives New Zealand. Parliament,1964 *The Future of Communism in Europe* Richard Voyles

Burks,1968 **Writing Future Worlds** Ulf Hannerz,2016-09-27 This volume presents a comprehensive analysis of global future scenarios and their impact on a growing shared culture Ever since the end of the Cold War a diverse range of future concepts has emerged in various areas of academia and even in popular journalism A number of these key concepts the end of history the clash of civilizations the coming anarchy the world is flat soft power the post American century suggest what could become characteristic of this new interconnected world Ulf Hannerz scrutinizes these ideas considers their legacy and suggests further dialogue between authors of the American scenario and commentators elsewhere *The Vietnam War*

Debate Louis B. Zimmer, 2011-01-01 This book tells the story of how America's national leadership failed the nation and produced the greatest foreign policy disaster in American history to that time. It is foremost however the story of a great man who tried to halt his nation's drift into what became an American tragedy. It is also a story that has never before been told. As the war escalated a variety of critics emerged to challenge the war policy and thus my book is about the national debate in which University of Chicago Professor Hans J. Morgenthau emerged as the chief opponent of the war. Morgenthau argued relentlessly in teach-ins around the country in public debates and in hundreds of articles that Vietnam was never a threat to America's security and that the war should never have been fought. In the history of the national debate on Vietnam it is Morgenthau who is the hero of the anti-war movement and the centerpiece of my study. Morgenthau had written the basic text on foreign policy *Politics Among Nations* and had established the field of international relations as an independent discipline of study. His arguments against the war derive from these earliest writings and are elaborated in this book, the principles of which remain valid today. The war ended in 1975 as North Vietnamese troops marched into Saigon after over 58 000 American servicemen and millions of Vietnamese had died in the fighting. The war could have been averted. Morgenthau was ignored. American policy makers misunderstood the nature of the civil conflict in Vietnam. As Morgenthau told an interviewer in July 1965: "What I have said recently I have been saying for years without anybody paying any attention."

The Future of Revolution Jasper Bernes, 2025-04-29 How might a twenty-first century revolution against class society succeed? Communism comes from the future but its hopes haunt our past. Reading revolutionary history from the Paris Commune to the George Floyd Uprising by the light of communist theory from Marx to C. L. R. James, *The Future of Revolution* illuminates the possibilities for overcoming class society in the twenty-first century. When Marx wrote that the Paris Commune of 1871 showed that the working class cannot simply lay hold of the ready-made state machinery and wield it for its own purposes, he identified a principle that will remain true as long as capitalism and its class antagonism persist. Historical revolutions reveal essential features of our communist horizon which would-be revolutionaries then as now must negotiate one way or another. In chapters that move from a critical history of the workers' council to a reading of Marx's theory of value as an inverted description of communism, Jasper Bernes synthesizes from a history of failure the key criteria for success. He defines for our present moment the urgent mission of the world proletariat.
