artefacts such as the Elgin marbles or indigenous remains testify to an increasing public interest in archaeology For students and scholars of this archaeology and of its relationship with the public this will prove essential reading

Gender Trouble and Current Archaeological Debates Uroš Matić, Bisserka Gaydarska, Laura Coltofean, Marta Díaz-Guardamino, 2024-10-28 This volume challenges the status quo by addressing a selection of intensely discussed themes in contemporary archaeological practice from a gender perspective It aims to demonstrate that gender is intrinsic to archaeology and that gender archaeology can enrich our studies irrespective of the discipline's possible future directions and so called paradigm shifts The scholarly contributions commissioned for this volume critically discuss and reflect on a wide range of concepts ideas principles and theories presently applied in archaeology within the framework of gender The chapters included in the first part deal with themes in world archaeology that have little or no focus on gender such as the Third Science Revolution e g ancient DNA stable isotopes analyses big data posthumanism e g new materialism symmetrical archaeology and the ontological turn and digital archaeology and heritage The second part focuses on themes in which gender archaeology has made serious advances intersectionality social inequality violence mobility The third part deals with themes crucial for contemporary archaeology and society namely gender education gender representation in museum exhibitions and the future of gender archaeology The volume concludes with a coda chapter that critically assesses the preceding contributions and the volume as a whole The book offers a gender balanced and inclusive authorship consisting of both well established and early career researchers closely connected to the EAA whose professionally culturally and geographically diverse backgrounds and experiences enrich the viewpoints discussed in the chapters The targeted audience is archaeologists from all theoretical and scientific backgrounds at all stages of their career Chapter 2 Sex Gender and the Third Science Revolution is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Doing Archaeology Donald Henson, 2012 Covering archaeology from a range of angles incorporating history major themes theories and methods Doing Archaeology provides a firm grounding for anyone interested in learning more about the discipline Throughout the book key information is accessibly presented and important questions are answered including What is archaeology How did archaeology begin How can archaeology tell us about the past How can archaeology tell how people use space and the landscape How can we use the past to understand people How do archaeology and heritage interact What role does archaeology play in society today How do we practice archaeology Drawing on the experiences of practising archaeologists with engaging examples and studies from sites around the world this book gives the reader a sense of what it is to study archaeology and be an archaeologist An essential text for students studying A Level archaeology those considering or beginning a degree foundation degree in archaeology and those of all ages interested in volunteering or becoming involved in archaeological projects

Ethics and Archaeological Praxis Cristóbal Gnecco, Dorothy Lippert, 2014-11-10 Restoring the historicity and plurality of archaeological ethics is a task to which this book is devoted its emphasis on praxis mends the

historical condition of ethics In doing so it shows that nowadays a multicultural sometimes also called public ethic looms large in the discipline By engaging communities differently archaeology has explicitly adopted an ethical outlook purportedly striving to overcome its colonial ontology and metaphysics In this new scenario respect for other historical systems worldviews and social accountability appear to be prominent Being ethical in archaeological terms in the multicultural context has become mandatory so much that most professional international and national archaeological associations have ethical principles as guiding forces behind their openness towards social sectors traditionally ignored or marginalized by their practices This powerful new ethics its newness is based to a large extent in that it is the first time that archaeological ethics is explicitly stated as if it didn't exist before emanates from metropolitan centers only to be adopted elsewhere In this regard it is worth probing the very nature of the dominant multicultural ethics in disciplinary practices because a it is at least suspicious that at the same time archaeology has tuned up with postmodern capitalist market needs and b the discipline along with its ethical principles is contested worldwide by grass roots organizations and social movements Can archaeology have socially committed ethical principles at the same time that it strengthens its relationship with the market and capitalism Is this coincidence just merely haphazard or does it obey more structural rules The papers in this book try to answer these two questions by examining praxis based contexts in which archaeological ethics unfolds *The Oxford Handbook of Public Archaeology* Robin Skeates, Carol McDavid, John Carman, 2012-01-05 Divided into four distinct sections and drawing across various disciplines this volume seeks to reappraise the place of archaeology in the contemporary world by providing a series of essays that critically engage with both old and current debates in the field of public archaeology *Archaeology and State Theory* Bruce Routledge, 2013-11-21 After neo evolutionism how does one talk about the pre modern state Over the past two decades archaeological research has shifted decisively from check list identifications of the state as an evolutionary type to studies of how power and authority were constituted in specific polities Developing Gramsci's concept of hegemony this book provides an accessible discussion of general principles that serve to help us understand and organise these new directions in archaeological research Throughout this book conceptual issues are illustrated by means of case studies drawn from Madagascar Mesopotamia the Inca the Maya and Greece **Transforming Archaeology** Sonya Atalay, Lee Rains Clauss, Randall H McGuire, John R Welch, 2016-07 Archaeology for whom The dozen well known contributors to this innovative volume suggest nothing less than a transformation of the discipline into a service oriented community based endeavor They wish to replace the primacy of meeting academic demands with meeting the needs and values of those outside the field who may benefit most from our work They insist that we employ both rigorous scientific methods and an equally rigorous critique of those practices to ensure that our work addresses real world social environmental and political problems A transformed archaeology requires both personal engagement and a new toolkit Thus in addition to the theoretical grounding and case materials from around the world each contributor offers a personal statement of their goals and an

outline of collaborative methods that can be adopted by other archaeologists

Official Report OF DEBATES VOLUME II Council of Europe, **Archaeologies of Us and Them** Charlotta Hillerdal, Carl-gsta Ojala, Anna Karlstrom, 2019-12-12 Archaeologies of Us and Them explores the concept of indigeneity within the field of archaeology and heritage and in particular examines the shifts in power that occur when we define the other by categorizing them as indigenous Recognizing the complex and shifting distinctions between indigenous and non indigenous pasts and presents this volume gives a nuanced analysis of the underlying definitions concepts and ethics associated with this field in order to explore Indigenous archaeology as a theoretical ethical and political concept Indigenous archaeology is an increasingly important topic discussed worldwide and as such critical analyses must be applied to debates which are often surrounded by political correctness and consensus views Drawing on an international range of global case studies this timely and sensitive collection significantly contributes to the development of archaeological critical theory *Tradition and Transformation in Anglo-Saxon England* Susan Oosthuizen, 2013-07-04 Explores the origins of Anglo Saxon England between 400 and 900 AD through the organisation of arable and commons **The Anthropology of Hunter-Gatherers** Vicki Cummings, 2013-04-11 A basic introduction to key debates in the study of hunter gatherers specifically from an anthropological perspective but designed for an archaeological readership *Shaky Ground* Elizabeth Marlowe, 2013-10-10 The recent crisis in the world of antiquities collecting has prompted scholars and the general public to pay more attention than ever before to the archaeological findspots and collecting histories of ancient artworks This new scrutiny is applied to works currently on the market as well as to those acquired since and despite the 1970 UNESCO Convention which aimed to prevent the trafficking in cultural property When it comes to famous works that have been in major museums for many generations however the matter of their origins is rarely considered Canonical pieces like the Barberini Togatus or the Fonseca bust of a Flavian lady appear in many scholarly studies and virtually every textbook on Roman art But we have no more certainty about these works archaeological contexts than we do about those that surface on the market today This book argues that the current legal and ethical debates over looting ownership and cultural property have distracted us from the epistemological problems inherent in all ostensibly ancient artworks lacking a known findspot problems that should be of great concern to those who seek to understand the past through its material remains **Archaeologies of Conflict** John Carman, 2013-04-11 The last two decades have seen the emergence of a specific set of archaeological approaches to war and conflict This concise and readable study assesses the current state of conflict archaeology looking forward to what the field can offer as it develops **Readings in Law and Popular Culture** Steven Greenfield, Guy Osborn, 2007-05-07 Fascinating and varied this is the first book to bring together high quality research with an emphasis on context from key researchers working at the cutting edge of both law and cultural disciplines *Bridging the Divide* Caroline Phillips, Harry Allen, 2016-09-16 The collected essays in this volume address contemporary issues regarding the relationship between Indigenous groups and archaeologists including the challenges of

dialogue colonialism the difficulties of working within legislative and institutional frameworks and NAGPRA and similar legislation The disciplines of archaeology and cultural heritage management are international in scope and many countries continue to experience the impact of colonialism In response to these common experiences both archaeology and indigenous political movements involve international networks through which information quickly moves around the globe This volume reflects these dynamic dialectics between the past and the present and between the international and the local demonstrating that archaeology is a historical science always linked to contemporary cultural concerns

Archaeological Resource Management John Carman, 2015-09-09 Archaeological resource management ARM is the practice of recording evaluating preserving for future research and presenting to the public the material remains of the past Almost all countries uphold a set of principles and laws for the preservation and professional management of archaeological remains This book offers a critical and comparative perspective on the law and professional practices of managing archaeological remains Beginning with a global history of ARM John Carman provides an overview of legal and professional regulations governing ARM today He then turns to consider the main practices involved in managing archaeological remains namely their identification and recording their evaluation for significance their preservation and their presentation to the public As a whole the book offers an overview of what ARM does in the world with implications for understanding the role of archaeology as a contemporary set of practices that determine how future generations will access material remains of the past
