Debating Human Rights In China:

Debating Human Rights in China Marina Svensson, 2002 Drawing on little known sources Marina Svensson argues that the concept of human rights was invoked by the Chinese people well before the adoption of the Universal Declaration of Human Rights in 1948 and it has continued to have strong appeal after 1949 both in Taiwan and on the mainland These largely forgotten debates provide important perspectives on and contrasts to the official PRC line The author gives particular attention to the issues of power and agency in describing the widely divergent views of official spokespersons establishment intellectuals and dissidents Until recently the PRC dismissed human rights as a bourgeois slogan yet the globalization of human rights and the growing importance of the issue in bilateral and multilateral relations has grown Thus the regime has been forced to embrace or rather appropriate the language of human rights an appropriation that continues to be vigorously challenged by dissidents at home and abroad

Debating Human Rights in China Marina Svensson, 2002-05-14 Tracing the concept of human rights in Chinese political discourse since the late Qing dynasty this comprehensive history convincingly demonstrates that contrary to conventional wisdom there has been a vibrant debate on human rights throughout the twentieth century Drawing on little known sources Marina Svensson argues that the concept of human rights was invoked by the Chinese people well before the adoption of the Universal Declaration of Human Rights in 1948 and that it has continued to have strong appeal after 1949 both in Taiwan and on the mainland These largely forgotten debates provide important perspectives on and contrasts to the official PRC line The author gives particular attention to the issues of power and agency in describing the widely divergent views of official spokespersons establishment intellectuals and dissidents Until quite recently the PRC dismissed human rights as a bourgeois slogan Yet the globalization of human rights and the growing importance of the issue in bilateral and multilateral relations have forced the regime to embrace or rather appropriate the language of human rights an appropriation that continues to be vigorously challenged by dissidents at home and abroad By exploring the relationship between domestic and international human rights discourses this study offers new insights not only into the Chinese but also into the Western human rights debate Students and scholars of China and of human rights will find this work an important tool for understanding one of the great issues of our time

Debating Human Rights Peter Van Ness, 2003-07-13 Human rights debates can provoke strong reactions particularly among people of different cultural backgrounds The debate over Asian values and the use of human rights diplomacy are the most obvious manifestations of divisions between Asia and the West and reflect particular world views and historical legacies In this new book scholars from the United States and several Asian countries debate fundamental issues such as Asian values peaceful evolution and cultural imperialism Provocative and challenging essays analyse the debate between East and West presenting critical perspectives on globalization and human rights diplomacy *Debating Human Rights* is an original contribution to a vital area of debate It presents a uniquely wide diversity of perspectives on controversial issues and demonstrates how scholars and activists who

view the world very differently can nonetheless move these debates forward in a search for common ground Liberal Rights and Political Culture Zhenghuan Zhou, 2013-10-14 This book argues that the liberal concept of rights presupposes and is grounded in an individualistic culture or shared way of relating and that this particular shared way of relating emerged only in the wake of the Reformation in the modern West Challenges and Policy Programmes of China's New Leadership Joseph Y. S. CHENG, 2007-04-01 This volume analyzes the new leadership's perceptions of the challenges facing it how it defines its priorities builds up political support for its policy programmes and overcomes the resistance of vested interests Attempts will also be made to evaluate its achievements so far Published by City University of Hong Kong Press The China Wave Wei-Wei Zhang, 2012 This Chinese best seller is a geopolitical book for our times It provides an original comprehensive engrossing study on the rise of China its effective yet controversial model of development has become a centrepiece of an unfolding debate within China on the nature future of the world's most populous nation its possible global impact **China's Struggle for Status** Yong Deng, 2008-04-28 At the end of the Cold War the People's Republic of China found itself in an international crisis facing severe problems in both domestic politics and foreign policy Nearly two decades later Yong Deng provides an original account of China's remarkable rise from the periphery to the center stage of the post Cold War world Deng examines how the once beleaguered country has adapted to and proactively realigned the international hierarchy great power politics and its regional and global environment in order to carve out an international path within the globalized world Creatively engaging with mainstream international relations theories and drawing extensively from original Chinese material this is a well grounded assessment of the promises and challenges of China's struggle to manage the interlacing of its domestic and international transitions and the interactive process between its rise and evolving world politics *China and International Human Rights* Na Jiang, 2013-12-12 This book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with China to the process and reality of a newly confident China's participation in the international human rights system albeit with inherent challenges From an international and comparative perspective one of the key findings of the author's research is that progress towards human rights depends more on judges than on legislators Chinese legislators have enacted a series of reforms in order to better protect human rights Unfortunately these reforms have not led to greater adherence to China's international human rights obligations in practice The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms Specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses This examination has several purposes The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re-applying to be a member of the UN Human Rights Council in the future The second is to explain how judges could be better educated in

international human rights norms so as to greatly reduce the use of severe punishments and better comply with China's human rights obligations. The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements. The author's ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government, between Chinese judges and their foreign counterparts, and between China's government and the international community. Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re-examine trends in its developing human rights policy after standing down from the Council in late 2012. The tortuous progress of China's criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards. Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR. In order to better educate and train judges, this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective. To illustrate how Chinese justice currently falls short of international norms, this paper also examines several cases that are considered to be indicative of China's progress towards greater respect for human rights and the rule of law. These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty, forced labor, and torture.

China, Democracy, and Law, 2021-12-06. This landmark volume deals with such essential questions as: What points of departure or resources can be identified in Chinese history and culture for what we call democracy? What are and have been their potential for development in a modern China confronted with powerful Western influences? Are there any connections between imperial China's strong legal tradition and the PRC's current endeavour to restore the rule of law in a context of legal globalization in which China itself is an important participant? How serious or superficial should the political opening which started in the 1980s be regarded and the discourse on human rights currently heard in official circles? And finally, how relevant is Taiwan's experiment with democratic institutions? In this rich and inspiring volume, foremost French scholars carefully clarify the process of political and legal change, convincingly showing that these questions cannot be answered without a proper understanding of centuries of Chinese juridical, philosophical, religious, and political thought. *Ouvrage publié avec le soutien du Centre national du livre*. Debating Human Rights Daniel P. L. Chong, 2014. Even as human rights provide the most widely shared moral language of our time, they also spark highly contested debates among scholars and policymakers. When should states protect human rights? Does the global war on terror necessitate the violation of some rights? Are food, housing, and health care valid human rights? *Debating Human Rights* introduces the theory and practice of international human rights by examining fourteen controversies in the field. Daniel Chong presents the major arguments on both sides of each debate, encouraging

readers to think critically and form their own opinions Designed for classroom use the structure of the book makes it easy for students to become familiar with the major political and legal actors in the global human rights system and to understand the practical challenges of protecting civil political social and economic rights Essays in Honour of Göran Melander Jonas Grimheden,Rolf Ring,2006 This volume illustrates the complex relationship between dissemination of human rights standards and their application in human rights law and thus serves as a tribute to Melander s belief in and commitment to the dynamics of education in human rights law **Congressional Record** United States. Congress,1999 **Human Rights in China** Eva Pils,2017-11-10 How can we make sense of human rights in China s authoritarian Party State system Eva Pils offers a nuanced account of this contentious area examining human rights as a set of social practices Drawing on a wide range of resources including years of interaction with Chinese human rights defenders Pils discusses what gives rise to systematic human rights violations what institutional avenues of protection are available and how social practices of human rights defence have evolved Three central areas are addressed liberty and integrity of the person freedom of thought and expression and inequality and socio economic rights Pils argues that the Party State system is inherently opposed to human rights principles in all these areas and that contributing to a global trend it is becoming more repressive Yet despite authoritarianism s lengthening shadows China s human rights movement has so far proved resourceful and resilient The trajectories discussed here will continue to shape the struggle for human rights in China and beyond its borders **Human Rights in Asia** Damien Kingsbury,Leena Avonius,2008-09-15 This book offers a critical reassessment of the Asian values debate which dominated the human rights discourse in the late 1990s and a reappraisal of the human rights situation in Asia sincethen In this book Asian and non Asian scholars contextualize the Asian values debate and examine in what ways the issues raised then continue to trouble Asian societies Human rights are seen both in the context of political developments in individual Asian countries as well as in relation to global issues such as the Global War on Terror The book challenges the reader to critically examine human rights rhetoric and practice both in Asia and globally Some Aspects of Community Empowerment and Resilience Venkat Pulla ,Bharath Bhushan Mamidi,2015-07-01 With escalating poverty rising individualism outright destruction of social security networks and diminished civil liberties across the world many professionals appear to be settling down for individual fixes rather than system overhauls Social work has a rich history of community development yet seems to be a semi passive spectator to the growing listlessness in our communities Fuelled by the elites government and agencies the models of community development seem to perpetuate dependency A right oriented citizen s perspective has been a long overdue in the discourse of empowerment of people Professions with espoused commitment to human rights ought to step up their role and and rekindle the roots in community empowerment Some Aspects of Community Empowerment and Resilience addresses the above central themes and offers fresh and refined approach on aspects of coping and resilience community and building hope **International Engagement in China's**

Human Rights Titus Chen, Dingding Chen, 2015-07-03 Since the Tiananmen Square incident in 1989 there has been increasing international pressure on China to improve its approach to human rights whilst at the same time the Chinese government has itself realised that it needs to improve its approach and has indeed done much to implement improvements This book explores systematically the international engagement in human rights in China and assesses the impact of such foreign involvement It looks at particular areas including criminal justice labour and religious freedom considers the processes by which international pressure is brought to bear and the processes by which improvements are implemented in China and concludes that whilst China's human rights record has improved more than many people realise further improvements are still needed *Menschenrechte, Kulturen und Gewalt* Ludger Kühnhardt, Mamoru Takayama, 2005 Der interkulturelle Dialog zwischen dem Westen und ostasiatischen Intellektuellen ist von den geistigen Folgen der Auseinandersetzung mit dem internationalen Terrorismus nicht unberührt geblieben Erstmals legen renommierte Geisteswissenschaftler aus Europa und Ostasien ergänzt durch Stimmen aus den USA und aus der arabischen Welt Reflexionen über Grundfragen im Schnittpunkt von menschenrechtlichen Begriffen kulturellen Deutungen und der Gewaltproblematik vor *Human Rights Education in China* Weihong Liang, 2022-04-25 The book provides new research highlighting perspectives perceptions and practices regarding human rights and human rights education in China It traces the emergence and evolution of the human rights conception and human rights education from comparative perspectives China's deeply embedded philosophical and cultural traditions shed light on its ideas of human rights and human rights education The efforts to construct an independent and strong nation state since the mid to late nineteenth century fashioned the Chinese thinking of rights and citizenship and the reciprocal relation between the individual and community state With the help of collected data the book unpacks that the goal making and content selection of human rights education in China rely heavily on the provisions given by central authorities however the practices have different facets depends on how the people perceive and respond those requirements in the school and classroom contexts The book concludes by explaining the human rights education in China as a socialization project for citizenship making and suggests that China's doctrine on human rights and human rights education is closely associated with cultural relativization and social construction Though China is just beginning to develop human rights education in its education systems this study suggests possible direction for future research How to live with human rights should be included further in schooling especially how to infuse human rights education into all aspects of school day to day life **Parliamentary Debates (Hansard)**.
