Debating Revolutions Nikki R. Keddie, 1995 Brings together contemporary essays from the journal *Contention* on the causes and prediction of revolutions Contributors discuss the Iranian Eastern European and French revolutions and the theoretical and comparative aspects of revolutionary study and respond to each other's views in debate style Topics include the social interpretation of the French Revolution demographic cycles and structural analysis in the world system and global implications of the 1989 revolutions in Eastern Europe Annotation copyright by Book News Inc Portland OR

Debating Revolutions Nikki R. Keddie, 1995-09 Throughout history and especially in this century revolutions have played a central role in human history Yet as both the Iranian revolution of 1978-79 and the revolutions of 1989 in Eastern Europe made clear revolutions are rarely predictable nor attributable to a single cause *Debating Revolutions* brings together some of our best social and political thinkers to address two central questions of revolution Can they be predicted And what are their causes In the debating style of *Contention* the award winning journal from which the essays are culled the contributors among them Charles Tilly Jack A Goldstone Edward Berenson Said Amir Arjomand and Daniel Chirot focus on the Iranian Eastern European and French revolutions and on the theoretical and comparative aspects of revolutionary study Unlike most anthologies *Debating Revolutions* has a format that enables scholars to engage one another in discussion thus resolving many disputes and addressing dilemmas rather than merely outlining differences

Debating Modern Revolution Jack Richard Censer, 2020 Revolution is an idea that has been one of the most important drivers of human activity since its emergence in its modern form in the 18th century From the American and French revolutionaries who upset a monarchical order that had dominated for over a millennium up to the Arab Spring this notion continues but has also developed its meanings Equated with democracy and legal equality at first and surprisingly redefined into its modern meaning revolution has become a means to create nations change the social order and throw out colonial occupiers and has been labelled as both conservative and reactionary In this concise introduction to the topic Jack R Censer charts the development of these competing ideas and definitions in four chronological sections Each section includes a debate from protagonists who represent various forms of revolution and counterrevolution allowing students a firmer grasp on the particular ideas and individuals of each era This book offers a new approach to the topic of revolution for all students of world history

Theorizing Revolutions John Foran, 2003-09-02 In *Theorizing Revolutions* some of the most exciting thinkers in the study of revolutions today look critically at the many theoretical frameworks through which revolutions can be understood and apply them to specific revolutionary cases The theoretical approaches considered in this way include state centred perspectives structural theory world system analysis elite models demographic theories and feminism and the revolutions covered range in time from the French Revolution to Eastern Europe in 1989 and in place from Russia to Vietnam and Nicaragua *Americomania and the French Revolution Debate in Britain, 1789-1802* Wil Verhoeven, 2013-11-12 This book explores the evolution of British identity and participatory politics in the 1790s Wil Verhoeven argues that in the course of the French Revolution debate in Britain the idea of America came to represent for the British people the choice between two diametrically opposed models of social justice and political participation Yet the American Revolution controversy in the 1790s was by no means an isolated phenomenon The controversy began with the American crisis debate of the 1760s and 1770s which overlapped with a wider Enlightenment debate about transatlantic utopianism All of these debates were based in the material world on the availability of vast quantities of cheap American land Verhoeven investigates the relation that existed throughout the eighteenth century between American soil and the discourse of transatlantic utopianism between America as a physical geographical space and America as a utopian dystopian idea image **Revolutions in World**

History Michael D. Richards, 2004 This broad comparative survey traces the origins developments and outcomes of revolutions starting with the English Revolutions in the 17th century and going on to the Mexican Russian Vietnamese and Iranian Revolutions *The Romanian Revolution of December 1989* Peter Siani-Davies, 2007 The Romanian Revolution of 1989 was the most spectacularly violent and remains today the most controversial of all the East European upheavals of that year Despite or perhaps because of the media attention the revolution received it remains shrouded in mystery How did the seemingly impregnable Ceausescu regime come to be toppled so swiftly and how did Ion Iliescu and the National Salvation Front come to power Was it by coup d tat Who were the mysterious terrorists who wreaked such havoc on the streets of Bucharest and the other major cities of Romania Were they members of the notorious securitate What was the role of the Soviet Union Blending narrative with analysis Peter Siani Davies seeks to answer these and other questions while placing the events and their immediate aftermath within a wider context Based on fieldwork conducted in Romania and drawing heavily on Romanian sources including television and radio transcripts official documents newspaper reports and interviews this book is the most thorough study of the Romanian Revolution that has appeared in English or any other major European language Recognizing that a definitive history of these events may be impossible Siani Davies focuses on the ways in which

participants interpreted the events according to particular scripts and myths of revolution rooted in the Romanian historical experience In the process the author sheds light on the ways in which history and the conflicting retellings of the 1989 events are put to political use in the transitional societies of Eastern Europe

The Future of Revolutions John Foran,2003 The 20th Century was pre eminently an age of revolutions in Russia China Cuba and elsewhere that fundamentally transformed the nature of politics and social arrangements As we enter a new century has it got harder for revolutions to occur in the new unipolar globalized world Here John Foran asks is the era of revolution over if so why and if not what might the revolutions of the future

States, Ideologies, and Social Revolutions Misagh Parsa,2000-08-17 Between 1979 and 1986 Iran Nicaragua and the Philippines underwent dramatic political and social revolutions This book examines the conditions and processes that gave rise to revolutions and their outcomes through an in depth analysis of economic and political developments in these countries The book studies the background to revolution provided by state formation and development economic intervention the states vulnerabilities and the social consequences of their development policies Extensive primary data is used to analyze the impact of the collective actions and ideologies of the major social groups involved students clergy workers and capitalists and how they affected the potential for a successful revolutionary outcome Parsa challenges prevailing theories of social revolution and develops an alternative model that incorporates variables from a wide variety of perspectives His book provides a valuable framework within which to understand the causes of revolutions their mechanics and development and their outcomes

An Analysis of Jack A. Goldstone's Revolution and Rebellion in the Early Modern World Etienne Stockland,2017-07-05 Understanding why revolutions take place when they do and as they do is important in itself Understanding how they are rooted in the societies they upend and the ways in which those societies share crucial similarities is arguably even more so The enduring influence of Jack Goldstone s Revolution and Rebellion lies as much in the challenge that it issues to the long dominant model of western exceptionalism the idea that it was early modern Europe s distinctive history that launched it on the path to world domination as it does in the book s persuasive account of revolutions rooted in a four stage process that advances from fiscal crisis through inter elite conflict and mass mobilization potential to the breakdown and re making of culture and ideology It can be argued that this unexpected outcome one that the author himself did not anticipate is the product of an acute problem solving ability one that made Goldstone particularly receptive to alternative possibilities His insistence that early modern and modern European and Asian peoples have vastly more in common than was generally recognised and followed a similar path of advanced organic development that left Qing China as vulnerable to revolution as the France of the Ancien R gime has not only become a central contention of early 21st century sociology it has also underpinned the creation of multiple theoretical models that have nothing to do with revolution None of this would have been possible had not Goldstone challenged himself by asking questions that other scholars had supposed had mundane answers

Handbook of Revolutions in the 21st Century Jack A. Goldstone,Leonid Grinin,Andrey

Korotayev,2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra Fundamentalism, Sectarianism, and Revolution S. N. Eisenstadt,1999 Fundamentalism Sectarianism and Revolution is a major comparative analysis of fundamentalist movements in cultural and political context with an emphasis on the contemporary scene Leading sociologist S N Eisenstadt examines the meaning of the global rise of fundamentalism as one very forceful contemporary response to tensions in modernity and the dynamics of civilization He compares modern fundamentalist movements with the proto fundamentalist movements which arose in the axial civilizations in pre modern times he shows how the great revolutions in Europe which arose in connection with these movements shaped the political and cultural programmes of modernity and he contrasts post Second World War Moslem Jewish and Protestant fundamentalist movements with communal national movements notably in Asia The central theme of the book is the distinctively Jacobin features of fundamentalist movements and their ambivalent attitude to tradition above all their attempts to essentialize tradition in an ideologically totalistic way Eisenstadt has won the Amalfi book prize A Concise History of Revolution Mehran Kamrava,2020 From rebellion to revolution Social movements and revolution Revolutionary states Revolutionary polities **Revolution and the Global Struggle for Modernity** Frank Jacob,2024-03-12 This book as the first volume of a multiple volume endeavor to analyze

several revolutions of the long nineteenth and short twentieth century to show how revolutionary processes evolved takes a closer look at the Atlantic Revolutions that is the American the French and the Haitian Revolution It will therefore use a comparative ten step model to emphasize similarities with regard to the revolutionary developments in different parts of the world The book consequently aims at providing a general but deeper understanding of revolutions as a global phenomenon of modernity while explaining how revolutionary processes evolve and develop and how they could and can be corrupted

Cultural Politics in the Third World Mehran Kamrava,2002-01-04 First Published in 1999 This book does not aim to offer a new or radically different interpretation of the ongoing debate over cultural geography Kamrava states nor does it seek to present a universal theory of what Third World countries have done or ought to do as they navigate the political economic and sociocultural traumas of development Instead it tries to place culture in its proper political perspective in the Third World

Market Economics and Political Change Juan D. Lindau,2000-01-01 Does market liberalization promote democracy The accepted answer from scholars pundits and politicians alike has been yes However the contributors to this innovative study of market reforms and political change in Mexico and the People s Republic of China argue that this easy equation is not only empirically uncertain but methodologically flawed Using comparative contextual analysis the contributors carefully identify the elective affinities between these two very different polities to reveal key variables that determine how markets will affect democracy particularly law as the rudder of democracy and the role of political culture in civil society

On the Arab Revolts and the Iranian Revolution Arshin Adib-Moghaddam,2013-10-10 On the Arab Revolts and the Iranian Revolution Power and Resistance Today is the first comparative analysis of two central political events that have altered our world forever the Arab uprisings which started in Tunisia and the Iranian revolution in 1979 Adib Moghaddam demonstrates how contemporary forms of protest are changing our understanding about the way power and resistance function In a theoretical tour de force which is substantiated with a range of primary material he argues that acts of protest in Tehran to Cairo can be entirely linked to the same act in New York London Madrid and Athens Breaking through the east west north south divide Adib Moghaddam shows how the Arab revolts promise to shift the discourse away from the idea that Arabs and Muslims are peculiar that Middle Eastern Studies cannot be linked to political theory that the dynamics of rebellion there are fundamentally different from the politics of revolt here Adib Moghaddam argues that the dialectics of power and resistance are truly universal and that they are unfolding within a globalised political context that is increasingly interconnected In order to illuminate this argument theoretically the study is organised around conceptual terms that feed into forms of power and resistance such as revolution radicalism dissent knowledge neighbour and reform These terms and concepts are discussed and deconstructed via an empirical discussion of pivotal events beyond the non western world demonstrating that for a long time and without realising it we have been living in the end times of unitary categories such as west and east
