## **Debordered Space Indeterminacy Within The Visual Perception Of Space:**

*Debordered space* Markus Jatsch, 2004 Text in English and German This monograph describes the construction of reality through the cognitive subject and associated with this potential ways for producing space The book studies methods for exposing through indeterminacy the definition of space to a larger field of possibility within personal interpretation and thus virtually de bordering space Against a historical background of past attempts to de border space visually new possible ways of indeterminately defining space through the modulation of light are shown The analysis of various modulation phenomena is illustrated with references to works of art and the phenomena are studied with a view to integrating them in the actual production of space The modulation of light has the potential of creating diffuse and ambivalent characteristics on space defining surfaces This fuzziness offers an opportunity for a freer interpretation of spatial definition and thus also for de bordering space due to the process of perception New materials and technologies can be used to create spatial worlds that open up genuine hitherto unknown realms of cognition and experience Based on multilayered ambiguous spatial situations according to the author new open spaces of perception are possible and thus an expansion of human consciousness as well with respect to the world around us

**Wittgensteins Philosophie** Wilhelm Vossenkuhl, 2025-10-06 In zehn Kapiteln beschäftigt sich Wilhelm Vossenkuhl mit Wittgensteins Werk das für ihn vor allem ein Werk im Werden ist Für uns Leserinnen und Leser ist es nie abgeschlossen wir können immer wieder Neues entdecken Deswegen sollten wir zurückhaltend mit abschließenden Urteilen und Interpretationen und offen für Revisionen und Ergänzungen sein Wittgensteins Nachlass wurde erst ab 2000 mit der Bergen Electronic Edition erschlossen Viele Aspekte seiner Philosophie wurden dadurch erst sichtbar und werden es immer noch Die Wiener Ausgabe macht Wittgensteins Werk ab 1929 dem Jahr seiner Rückkehr nach Cambridge zugänglich Beide Quellen gehen weit über die Werkausgabe die zu seinem 100 Geburtstag erschien hinaus Von dieser Lage geht Vossenkuhl aus indem er vieles was ihm in seiner früheren Beschäftigung mit Wittgenstein als klar erschien kritisch berprft und revidiert Die philosophische Auseinandersetzung mit Wittgensteins Denken ist vom philologischen Umgang mit seinem Nachlass nicht zu trennen Es zeigen sich immer wieder neue Erkenntnisse wie etwa Wittgensteins Orientierung an Anton Bruckners Kompositionen oder die Bedeutung der vielen von ihm sehr ernst genommenen Wiederholungen die in früheren Editionen nicht zu finden sind Die immer wieder neu ansetzenden Gedanken zum Sehen von Aspekten oder zum Solipsismus kommen zu keinem Ende Die Herausforderung der Auseinandersetzung mit Wittgensteins Werk ist in jedem Fall lohnend

**The Global Structure of Visual Space** Tarow Indow,2004 The space we see around us is the end product of a long series of processes physical physiological and cognitive It is a highly structured perceptual entity In contrast to the fact that most studies of visual perception are concerned with local phenomena in this visual space the main purpose of this book is to discuss the global structure of visual space The physical space which surrounds us is of Euclidean structure but its perceived image is not necessarily structured in that way Problems such as why the sky appears as a vault and why the horizon is located at eye level are discussed in the book *An Investigation of the Factors in Tests Involving the Visual Perception of Space* A. **The Primacy of Depth in Visual Perception** Robert Fox,VANDERBILT UNIV NASHVILLE TN DEPT OF PSYCHOLOGY.,1981 This report is a slightly edited version of an invited address New Fellows Address given by the writer at the national convention of the American Psychological Association in Los Angeles on August 28 1981 The implications of several kinds of recent investigations of three dimensional visual space perception are discussed including investigations performed by the writer and his colleagues and summarized in *Contour Interaction in Visual Space* The results of all investigations are interpreted as supporting the claim that the X Y Z position of objects in visual space is processed quite early by the visual system This initial identification of the loci of objects in space serves to control subsequent analysis of the characteristics of those objects This interpretation supports a general theory of visual space perception that assumes there is an internal continuous representation of visual space within the visual system This representation is assumed to be an intrinsic hardwired characteristic of that system Conversely support is not given to an alternative general theory of space perception that assumes depth information is processed relatively late in the visual system by an analysis of specific cues to distances cues which acquire their significance gradually by repeated exposure to the environment
