Debt Shock Darrell Delamaide,1985 **The Collapse of State Socialism** Bartolomiej Kaminski,2014-07-14 Does the abrupt collapse of communist regimes in Eastern Europe arise only from errors in implementing the policy of state socialism leaving the concept itself still a potentially valid one Bartlomiej Kaminski argues to the contrary state socialism is a fundamentally defective idea that was well carried out enabling it to exist until its accumulated shortcomings made its survival extremely difficult How did the flawed state socialist system endure for so long Why is it failing now In answering these questions Kaminski who is both an economist and a political analyst proposes a general theory and then applies it to the case of Poland Contending that the breakdown of state socialism results from symbiosis of the state and the economy the book describes how communist governments searched for tools that would replace the market mechanism and the rule of law Doomed in advance by the absence of autonomy and competition this search generated new crises by undermining the state's capacity to suppress individual interests and to direct the economy Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **International Financial System** Ross P. Buckley,2009-01-01 Provides deep analyses of some of the devastating financial crises of the last quarter centuries by showing how such factors as the origins and destinations of loans bank behaviour bad timing ignorance of history trade regimes capital flight and corruption coalesce under certain circumstances to trigger a financial crash **The Other Canon of Economics, Volume 1** Erik Reinert,2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies *The International Law of Responsibility for Economic Crimes* Ndiva Kofele-Kale,2016-03-03 Focusing on the problem of indigenous spoliation in developing countries this work explores the controversial issue of spoliation by national officials of the wealth of the states of which they are custodians Due to

constraints of the state system and the lack of appropriate substantive municipal law efforts to punish those responsible for the economic rape of entire nations and to recover spoliated funds have been frustrated and rendered insubstantial Taking a multidisciplinary approach and on the basis of data generated from empirical cross national research this study makes the case for indigenous spoliation as a violation of international law Substantially revised and updated to take account of recent legal and political developments the second edition will be a valuable resource for academics practitioners NGOs and policymakers

Ownership of Proceeds of Corruption in International Law Kolawole Olaniyan,2024-02-13 In the first comprehensive study on the issue Kolawole Olaniyan challenges the conventional notion that sovereign and ownership rights over proceeds of corruption should be exclusively exercised by States He examines the relationship between the right to wealth and natural resources proceeds of corruption and economic activities

Groupthink or Deadlock Paul A. Kowert,2012-02-01 The danger of groupthink is now standard fare in leadership training programs and a widely accepted explanation among political scientists for policy making fiascoes Efforts to avoid groupthink however can lead to an even more serious problem deadlock Groupthink or Deadlock explores these dual problems in the Eisenhower and Reagan administrations and demonstrates how both presidents were capable of learning and consequently changing their policies sometimes dramatically but at the same time

doing so in characteristically different ways Kowert points to the need for leaders to organize their staff in a way that fits their learning and leadership style and allows them to negotiate a path between groupthink and deadlock **Special**

Bibliography Series United States Air Force Academy. Library,1988 **The American Role in the Global Economy** Susan J. Whitson,1988 Fictions of State Patrick Brantlinger,2019-06-30 In this ambitious book Patrick Brantlinger offers a cultural history of Great Britain focused on the concept of public credit from the 1694 founding of the Bank of England to the present He draws on literary texts ranging from Augustan satire such as Gulliver s Travels to postmodern satire such as Martin Amis s Money A Suicide Note All critique the misrecognition of public credit as wealth The economic foundations of modern nation states involved national debt public credit and paper money Brantlinger traces the emergence of modern imperial Great Britain from those foundations He analyzes the process whereby nationalism both the cause and the result of wars and imperial expansion multiplied national debt and produced crises of public credit resolved only through more nationalism and war During the first half of the eighteenth century conservatives attacked public credit as fetishistic and characterized national debt as alchemical From the 1850s the stabilizing theories of public credit authored by David Hume Adam Smith Henry Thornton and others helped initiate the first social science economics In the nineteenth century literary criticism both paralleled and questioned early capitalist discourse on public credit and nationalism while the Victorian novel refigured debt as the individual private credit and debt During the era of high modernism and Keynesian economics the notion of high culture as genuine value recast the debate over money and national indebtedness Brantlinger relates this cultural historical trajectory to Marxist poststructuralist and postcolonial theories about the decline of the European empires after World War II the global debt crisis and the weakening of western nation states in the postmodern era Public Administration Series--Bibliography ,1988-04 **Special Bibliography Series** ,1957 **Economics for Prophets** Walter L. because they conflict with the accused individual's right to be presumed innocent. Unfortunately, the recent spate of international legislation against official corruption provides no clear guidelines on how to proceed in balancing the right of the accused to be presumed innocent against the competing right of society to trace and recapture illicitly acquired national wealth. Combating Economic Crimes therefore sets out to address what has been left unanswered by these multilateral conventions: to wit, the level of burden of proof that should be placed on a public official who is accused of illicitly enriching himself from the resources of the State, balanced against the protection of legitimate community interests and expectations for a corruption-free society. The book explores the doctrinal foundations of the right to a presumption of innocence and reviews the basic due process protections afforded to all accused persons in criminal trials by treaty, customary international law, and municipal law. The book then goes on to propose a framework for balancing and situationalizing competing human rights and public interests in situations involving possible official corruption.

Images and Behaviour of Private Bank Lending to Developing Countries Margee M. Ensign, 2010-11-26. The primary questions addressed by this study, first published in 1988, focus on how private bankers made decisions on the creditworthiness of developing countries during the 1970s and what the implications of these decision rules are for the developing countries today. Based on interviews with senior bankers about their decision rules, the author has developed artificial intelligence-based simulations of their images of creditworthiness. Discussed are contemporary proposals for solving the debt crisis.
