The Economics of Adaptation and Long-term

Relationships Dean Victor Williamson, 2019 Do institutions matter in economic theory Or is the economic analysis of institutions a distraction from the most important action Indeed does Vernon Smith's notion of the institution free core of formal economic theory encompass that most important action To explore this question this book opens with an informal tour of the economics of system design out of which an economics of adaptation ultimately emerged The book then offers explorations via the application of the economics of adaptation in both law and economics relating to how parties manage relationships within the firm within the context of long term contracts and most vividly within the context of antitrust conspiracy

failure of any family business depends in part on the industry specific expertise of the owners and in part on the financial guidance of trusted professionals Business owners seeking direction as well as financial professionals attempting to provide this guidance find themselves facing a daunting task Financial issues that impact family businesses are quite diverse and require different strategies depending upon the stage of each business start up operational and exit

International Financial Connection and Stock Return Comovement Mr.Sakai Ando,2019-08-22 This paper studies whether bilateral international financial connection data help predict bilateral stock return comovement It is shown that when the United States is chosen as the benchmark a larger U S portfolio investment asset position on the destination economy predicts a stronger stock return comovement between them For large economies such as the United States and Germany the portfolio investment position is also the best predictor among other connection variables The paper discusses with a simple general equilibrium portfolio model that the empirical pattern is consistent with the behavior of index investors who trade in response to risk on risk off shocks

Chinese Banks and Their EMDE Borrowers: Have Their Relationships Changed in Times of Geoeconomic Fragmentation? Catherine Casanova,Mr. Eugenio M Cerutti,Swapan-Kumar Pradhan,2024-09-23 While Chinese banks have become the top cross border lender to EMDEs their expansion has slowed recently both in terms of volume and market share Also the strong correlation of China s bilateral trade and its banks cross border lending has weakened while during 2020 22 lending became more positively correlated with FDI In our paper we analyse these patterns and we explore the role of borrower risk variables and foreign policies Our findings show that although the shifting correlation from trade to FDI is a general EMDE phenomenon China s Belt and Road Initiative reinforces it By contrast borrowers that potentially benefit from geoeconomic fragmentation do not display stronger FDI lending relationships We also find that Chinese banks exhibit different levels of risk tolerance relative to other bank nationalities as borrower country risk variables are positively correlated with Chinese banks market shares but not with their amounts of cross border lending
