First published in 2006 This guide is an A to Z trade reference aimed at music students technophiles and audio video computer users The world of music technology has exploded over the last decades thanks to introductions of new digital formats At the same time there has been a renaissance in analog high fidelity equipment and resurgent interest in turntables long playing records and vintage stereo systems Music students collectors and consumers will appreciate the availability of a guide to all things musical in the technological universe *Legacies of Power in American Music* Judith A.

Mabary, 2022-10-24 This volume honors and extends the contributions of educator and scholar Dr Michael J Budds to the field of musicology particularly the study of American music As the longtime editor of two book series for the College Music Society Budds nurtured a wide range of scholarship in American music and had a lasting impact on the field This book brings together scholars who worked with Budds as a colleague editor or mentor to carry on his legacy of passionate engagement with America's rich and varied musical heritage Ranging through jazz gospel Americana and film music to American classical and addressing music's social contexts and analytical structure the research gathered here attests to the diversity of the mosaic that is American music and the numerous scholarly approaches that have been taken to the subject Music and the Racial Imagination Ronald M. Radano, Philip V. Bohlman, 2000-12 A specter lurks in the house of music and it goes by the name of race write Ronald Radano and Philip Bohlman in their introduction Yet the intimate relationship between race and music has rarely been examined by contemporary scholars most of whom have abandoned it for the more enlightened notions of ethnicity and culture Here a distinguished group of contributors confront the issue head on Representing an unusually

broad range of academic disciplines and geographic regions they critically examine how the imagination of race has influenced musical production reception and scholarly analysis even as they reject the objectivity of the concept itself Each essay follows the lead of the substantial introduction which reviews the history of race in European and American non Western and global musics placing it within the contexts of the colonial experience and the more recent formation of world music Offering a bold new revisionist agenda for musicology in a postmodern postcolonial world this book will appeal to students of culture and race across the humanities and social sciences The Decca Labels: The California sessions ,1996
