Decentralization And Transition In The Visegrad:

Decentralization and Transition in the Visegrad E. Kirchner, 1999-05-17 The book assesses the democratization and marketization in the Visegrad states It analyses the effectiveness of these emerging government structures at a regional and local level in terms of competencies and resources makes comparisons with West European experiences at this level and examines the role of external factors especially the EU and international financial organisations in the development of sub national authorities in these countries Europeanization, Varieties of Capitalism and Economic Performance in Central and Eastern Europe L. Cernat, 2016-01-18 By combining insights from Europeanization globalization varieties of capitalism and policy transfer literature this book reconceptualizes the dynamics taking place during the EU enlargement process and makes a major contribution to the understanding of the relationships between institutional transformation and economic performance

Social Service Reform in the Postcommunist State Janelle A. Kerlin, 2005-06-28 The fall of Communist regimes in Eastern Europe raised the complex question of how social services were to be distributed and administered in countries with legacies of highly centralized state In Poland a series of reforms attempted to modify and decentralize social service programs Yet with Poland's second round of decentralization long held and clearly specified reform goals were undermined from the very outset In this insightful detailed and carefully argued study Janelle A Kerlin demonstrates how and why reforms intended to improve services and increase citizen participation in social service programming largely failed to meet expected goals The politics of reform development including political deals exclusionary tactics and hidden maneuvering by Polish policymakers prevented any significant upgrade of services or real change in decision making structures Conflicting ideologies and pressures on policy actors stemming from historical institutional political and international sources often resulted in compromises that led to unfavorable public service outcomes In this book Kerlin uses focused interviews with leading reform actors and a nationwide representative survey of two hundred public social service institutions to develop a model that connects the politics of the decentralization process with social service outcomes Not only students of the former Soviet bloc but also those interested in the links between politics and policy outcomes more broadly will find in this volume an informative and instructive case study that has far reaching implications

Governing the Post-communist City Martin Horak, 2007-01-01 When faced with the rapid and disorienting transition from communism to democracy many eastern European leaders sought simple immediately rewarding answers to complex policy problems Undoubtedly this hurried approach had a significant impact on the quality of democratic government in formerly communist countries Through an analysis of urban politics in Prague between 1990 and 2000 *Governing the Post Communist City* sheds new light on the factors that shaped policy in eastern Europe at the time of its democratic transformation The first book length study of post communist urban politics in a city outside of Russia *Governing the Post Communist City* links the difficulties of democratic government in 1990s Prague to decisions made shortly after the fall of communism Focusing on the

issues of road infrastructure and downtown development Martin Horak argues that local leadership was more concerned with insulating policy making processes from public influence than with creating new policies suited to post communist urban development This set a precedent for the whole institutional environment of post communist Prague and entrenched itself in the city s politics throughout the 1990s Original engaging and authoritative this study has much to say about the political climate in Prague after the downfall of communism and makes insightful conclusions about the factors that contributed to present political circumstances in the region *Varieties of Capitalism in Post-Communist Countries* D. Lane,M. Myant,2016-01-23 This book sets the experiences of former communist countries as they head towards capitalism against the varieties of capitalism paradigm and provides a framework for comparing transformation processes demonstrating how differing heritages of communist and pre communist pasts are leading to different kinds of capitalist economies Region, State and Identity in Central and Eastern Europe Judy Batt,Kataryna Wolczuk,2013-01-11 The papers that comprise this collection examine the role of competing European national ethnic and regional identities over the introduction of new regional levels of government in the former Soviet and now Central and Eastern European states

Developments in Central and East European Politics 4 Stephen White,Judy Batt,Paul G. Lewis,2007 The face of Central and Eastern Europe has been dramatically transformed since the collapse of communism The region faces new challenges including the needs to find a balance between effective leadership and accountability and to reverse the economic decline of the late communist years Addressing these concerns and others *Developments in Central and East European Politics 4* brings together specially commissioned chapters by leading scholars from both sides of the Atlantic The chapters all of which are new to this edition focus on key features of the political systems that have emerged following the transition to postcommunist rule and the enlargement of the European Union through 2006 Full attention is given to the pattern of events in individual nations but the main emphasis is on the framework of politics across the region constitutions leadership parliaments parties and electoral systems and the process of politics as it is revealed in political participation civil society economic change and the quality of democratic government within and beyond the region Clearly written and well supported with references and suggestions for further reading *Developments in Central and East European Politics 4* is the ideal guide to the process of change in a group of states that were formerly modeled on the Soviet Union but are now a distinctive and varied presence within a continent that has been redefining its boundaries its values its economic systems and its international allegiances Contributors Judy Batt Dirk Berg Schlosser Sarah Birch Heather Grabbe Tim Haughton Krzysztof Jasiewicz Petr Kopeck Paul G Lewis Frances Millard Cas Mudde D Mario Nuti Mark Pittaway Ray Taras Stephen White Andrew Wilson Kataryna Wolczuk Local Elites, Political Capital and Democratic Development Stefan Szücs,Lars Strömberg,2007-08-17 This book helps to understand in which ways local governing elites are important for the success or failure of national democratic development Although we know a great deal about the general importance of civil society and

social capital for the development of sustainable democracy we still know little about what specific local governing qualities or political capital that interact with democratic development The collected data covers time series of surveys from between 15 to 30 political and administrative leaders in over a hundred middle sized European and Eurasian cities The study takes us across the 1980s and 1990s going from cities in Sweden and the Netherlands through the Baltic cities to the cities of Belarus and Russia The findings show the importance of local political capital based on commitments to core democratic values informal governance networks and the significance of initially connecting the community to global non economic relationships

Local Democracy in Post-Communist Europe Harald Baldersheim, Michal Illner, Hellmut Wollmann, 2013-04-17 Der englischsprachige Band führt ein in die Lokal und Regionalpolitik der mitteleuropäischen Reformländer Der Band beleuchtet aktuelle Probleme der Kommunal und Regionalpolitik in den Ländern Mitteleuropas einschließlich Russlands Zentral sind Fragen der Beziehungen zwischen zentraler regionaler und lokaler Politik und Verwaltungsebene der lokalen Demokratie und Partizipation sowie Fragen der Verwaltungsmodernisierung

The Party Politics of Territorial Reforms in Europe Emanuele Massetti, Simon Toubreau, 2020-07-24 The book analyses how political parties compete and strategise on the issue of territorial reform using case studies that include countries from both Western Belgium Germany Italy and Spain and Central Eastern Europe Poland Slovakia and Romania Each case study considers different drivers of decentralization such as territorial identities and the demands of regionalist parties for territorial autonomy or independence efficiency concerns related to issues of uneven economic development and economic competitiveness the pressure from supra national organizations especially the EU as well as different combinations of these drivers They also consider how the ideology and organisation of state wide parties and the institutional context in which they compete shape their responses to these drivers and their strategy towards the question of territorial reform This collection investigates the logic of the actions that guide political parties strategy to highlight trends that are apparent across the case studies This book was originally published as a special issue of West European Politics

Spreading Democracy and the Rule of Law? Wojciech Sadurski, Adam Czarnota, Martin Krygier, 2006-07-30 The accession of eight post communist countries of Central and Eastern Europe and also of Malta and Cyprus to the European Union in 2004 has been heralded as perhaps the most important development in the history of European integration so far While the impact of the enlargement on the constitutional structures and practices of the EU has already generated a rich scholarly literature the influence of the accession on constitutionalism democracy human rights and the rule of law among

the new member states has been largely ignored This book fills this gap and addresses the question of the consequences of the external force of European enlargement upon the understanding and practice of democracy and the rule of law and among both the main legal political actors and the general public in the new member states A number of leading legal scholars sociologists and political scientists both from Central and Eastern Europe and from outside address these issues in a systematic and critical way Taken together these essays help answer a fundamental question does the European Union have the potential of promoting and consolidate democracy and human rights **Polish Politics and Society** Frances

Millard,2002-09-11 An examination of political social and economic development in Poland since the summer of 1989 with the main focus on democratization **Elections, Parties and Representation in Post-Communist Europe** F.

Millard,2016-01-08 Elections Parties and Representation in Post Communist Europe 1990 2002 stresses the ways in which the development of political parties affected the quality of democracy the nature of political representation and political accountability in the early stages of post communist politics It also analyzes the nature and consequences of the corpus of parliamentary candidates and deputies for the representation of social classes women and minorities In contrast with the wide social profile of communist parliaments politics largely became the playground of new highly educated male elites

Democratic Consolidation in Eastern Europe: Volume 1: Institutional Engineering Jan Zielonka,2001 This is the first volume in a series of books on democratic consolidation in Eastern Europe The series focuses on three major aspects of democratic consolidation in Eastern Europe institutional engineering transnational pressures and civil society This first volume analyses constraints on and opportunities of institutional engineering in Eastern Europe to what extent and how elites in Eastern Europe have been able to shape if not manipulate the politics of democraticconsolidation through institutional means The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years The volume tries to avoid complex debates about definitions methods and the uses and misuses of comparative research Instead it tries to establish what has really happened in the region and which of the existing theories have proved helpful in explaining these developments The volume starts with a presentation of conceptual and comparative frameworks followed by in depth empirical analyses of the thirteen individual countries undergoing democratic consolidation The first conceptual and comparative part contains three chapters The first chapter explains what institutional engineering is about and describes our experiences with institutional engineering in former transitions to democracy It also focuses on the import and export of institutional designs Thesecond chapter analyses the utility of constitutions in the process of democratic consolidation The third chapter compares constitutional designs and problems of implementation in Southern and Eastern Europe The empirical case studies deal with the following countries Estonia Latvia Lithuania Bulgaria Romania Ukraine Russia Belarus the Czech Republic Slovakia Slovenia Hungary and Poland And the conclusions evaluate the enormous impact of institutions on politics in Eastern Europe and show how central constitutional designs are to the

Runaway State-Building Conor O'Dwyer, 2006-09-14 Here Conor O Dwyer introduces the phenomenon of runaway state building as a consequence of patronage politics in underdeveloped noncompetitive party systems Analyzing the cases of three newly democratized nations in Eastern Europe Poland the Czech Republic and Slovakia O Dwyer argues that competition among political parties constrains patronage led state expansion O Dwyer uses democratization as a starting point examining its effects on other aspects of political development Focusing on the link between electoral competition and state building he is able to draw parallels between the problems faced by these three nations and broader historical and contemporary problems of patronage politics such as urban machines in nineteenth century America and the Philippines after Marcos This timely study provides political scientists and political reformers with insights into points in the democratization process where appropriate intervention can minimize runaway state building and cultivate efficient bureaucracy within a robust and competitive democratic system

New Security Challenges in Postcommunist Europe Andrew Cottey, Derek

Averre, 2002 Cubism was the most influential artistic movement that emerged in the twentieth century The hallmarks of its style were stamped on the art design and architecture and its aesthetic principles governed the representation of modernity across all the arts Yet just what cubism was or stood for at the time of its emergence is still in dispute while the explanations offered for its importance for twentieth century art and its legacy for the present are bewildering in their variety This fascinating book offers a way beyond this confusion a narrative of its beginnings consolidation and dissemination that takes into account not only what the style and the movement signified at the time of its emergence but also the principal writings through which cubism's significance for modernism has been established Visually stunning with over 100 illustrations this is an essential work for all students and teachers of modern art history
