Deciding For Others The Ethics Of Surrogate Decision Making:

Deciding for Others Allen E. Buchanan, Dan W. Brock, 1989 This book is the most comprehensive treatment available of one of the most urgent problems in bioethics decision making for incompetents Deciding for Others Allen E. Buchanan, Dan W. Brock, 1989 This book is the most comprehensive treatment available of one of the most urgent problems in bioethics decision making for incompetents Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2009-12-04 For nearly fifteen years Practical Decision Making in Health Care Ethics has offered scholars and students a highly accessible and teachable alternative to the dominant principle based theories in the field Devettere's approach is not based on an ethics of abstract obligations and duties but following Aristotle on how to live a fulfilled and happy life in short an ethics of personal well being grounded in prudence the virtue of ethical decision making This third edition is revised and updated and includes discussions of several landmark cases including the tragic stories of Terri Schiavo and Jesse Gelsinger the first death caused by genetic research Devettere addresses new topics such as partial birth abortion law embryonic stem cell research infant euthanasia in The Netherlands recent Vatican statements on feeding tubes organ donation after cardiac death new developments in artificial hearts clinical trials developed by pharmaceutical companies to market new drugs ghostwritten scientific articles published in major medical journals and controversial HIV AIDS research in Africa This edition also includes a new chapter on the latest social and political issues in American health care Devettere's engaging text relies on commonsense moral concepts and avoids academic jargon It includes a glossary of legal medical and ethical terms an index of cases and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading It is a true classic brilliantly conceived and executed and is now even more valuable to undergraduates and graduate students medical students health care professionals hospital ethics committees and institutional review boards and general readers interested in philosophy medicine and the rapidly changing field of health care ethics *Ethical Issues in Neurology* James L. Bernat, 2008 Written by an eminent authority from the American Academy of Neurology's Committee on Ethics Law and Humanities this book is an excellent text for all clinicians interested in ethical decision making The book features outstanding presentations on dying and palliative care physician assisted suicide and voluntary active euthanasia medical futility and the relationship between ethics and the law New chapters in this edition discuss how clinicians resolve ethical dilemmas in practice and explore ethical issues in neuroscience research Other highlights include updated material on palliative sedation advance directives ICU withdrawal of life sustaining therapy gene therapy the very low birth weight premature infant the developmentally disabled patient informed consent organizational ethics brain death controversies and fMRI and PET studies relating to persistent vegetative state *Resolving Ethical Dilemmas* Bernard Lo, 2013-01-25 Now in its Fifth Edition this respected reference helps readers tackle the common and often challenging ethical issues that affect patient care The book begins with a concise discussion of clinical ethics that

provides the background information essential to understanding key ethical issues Readers then explore a wide range of real world ethical dilemmas each accompanied by expert guidance on salient issues and how to approach them The book s two color design improves retention of material for visual learners An accompanying website lets readers access the full text along with features designed to reinforce understanding and test knowledge New to the Fifth Edition This edition includes new discussions of ethical issues as they relate to clinical practice guidelines and evidence based medicine electronic medical records genetic testing and opioid prescription The book also includes an increased focus on ethical issues in ambulatory care Readers will also find more detailed analysis of cases more examples of ethical reasoning more highlight pages relating clinical ethics to emergency medicine oncology palliative care and family medicine Also new are discussions of quality improvement and use of advance care planning rather than advance directives

New Directions in the Ethics of Assisted Suicide and Euthanasia Michael Cholbi, Jukka Varelius, 2023-03-03 This book provides novel perspectives on ethical justifiability of assisted dying in the revised edition of *New Directions in the Ethics of Assisted Suicide and Euthanasia* Going significantly beyond traditional debates about the value of human life the ethical significance of individual autonomy the compatibility of assisted dying with the ethical obligations of medical professionals and questions surrounding intention and causation this book promises to shift the terrain of the ethical debates about assisted dying The novel themes discussed in the revised edition include the role of markets disability gender artificial intelligence medical futility race and transhumanism Ideal for advanced courses in bioethics and healthcare ethics the book illustrates how social and technological developments will shape debates about assisted dying in the years to come

Principles of Health Care Ethics Richard Edmund Ashcroft, Angus Dawson, Heather Draper, John McMillan, 2007-07-23 Edited by four leading members of the new generation of medical and healthcare ethicists working in the UK respected worldwide for their work in medical ethics *Principles of Health Care Ethics* Second Edition is a standard resource for students professionals and academics wishing to understand current and future issues in healthcare ethics With a distinguished international panel of contributors working at the leading edge of academia this volume presents a comprehensive guide to the field with state of the art introductions to the wide range of topics in modern healthcare ethics from consent to human rights from utilitarianism to feminism from the doctor patient relationship to xenotransplantation This volume is the Second Edition of the highly successful work edited by Professor Raanan Gillon Emeritus Professor of Medical Ethics at Imperial College London and former editor of the *Journal of Medical Ethics* the leading journal in this field Developments from the First Edition include The focus on Four Principles Method is relaxed to cover more different methods in health care ethics More material on new medical technologies is included the coverage of issues on the doctor patient relationship is expanded and material on ethics and public health is brought together into a new section

Difficult Decisions in Pediatric Surgery Mark B. Slidell, Marion C.W. Henry, 2025-03-27 Pediatric surgery is a demanding specialty that requires not only technical expertise but also exceptional clinical judgment and

adaptability Pediatric surgeons frequently encounter rare congenital anomalies and unusual surgical problems often requiring them to make difficult decisions with limited precedent Even well recognized congenital conditions can present in atypical ways necessitating a patient centered approach that may deviate from routine practice This places a premium on a surgeon s ability to apply broad surgical principles to novel and complex situations tailoring interventions to each child s unique anatomy and pathology Compounding this challenge is the rapidly evolving literature in pediatric surgery where new techniques evolving guidelines and emerging technologies continually reshape best practices Thoughtful interpretation of the literature is essential particularly when the optimal approach to a problem remains unclear or controversial Pediatric surgeons must not only stay abreast of these developments but also critically analyze and synthesize data to make sound evidence based decisions in the face of uncertainty The Difficult Decisions in Surgery series was developed to address many of these challenges faced by surgeons To date 10 volumes have been published receiving enthusiastic engagement from the surgical community These multi authored volumes consist of concise chapters each focused on a specific difficult or controversial decision within a surgical specialty This series is particularly well suited for pediatric surgeons as it provides insight into difficult decisions faced within the field The volumes serve as a timely reference for practicing surgeons trainees and educators emphasizing the ideal approach to selected clinical situations rather than merely reflecting customary care Recommendations are grounded in published evidence while also incorporating expert opinions and personal experiences helping surgeons navigate complex evolving literature and apply general surgical principles to novel pediatric challenges The chapters in each volume adhere to a specific format This approach provides uniformity to the presentations making it possible to identify useful material at a glance a brief general introduction and description of the Difficult Decision laid out using PICO formatting a brief description of the literature search process a summary of available published evidence and discussion of the findings the author s personal view of the data and approach to the problem and why they do or don t do things found in the presented literature the chapter authors were selected from experts around the world the editors for this volume were selected from among internationally renown faculty at The University of Chicago and The Johns Hopkins University Children, Families, and Health Care Decision Making Lainie Friedman Ross, 2002 ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester Soren Holm University of Manchester Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes All too often ethical analysis has lagged behind these changes The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just health care trainees and professionals but also social scientists philosophers lawyers social workers and legislators The

series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest Philosophers doctors and lawyers from several countries already feature among the contributors to the series It promises to become the leading channel for the best original work in this burgeoning field this book Lainie Friedman Ross presents an original and controversial examination of the moral principles that guide parents in making health care decisions for their children and the role of children in the decision making process She opposes the current movement to increase child autonomy in favour of respect for family autonomy She argues that children should be included in the decision making process but that parents should be responsible for their children s health care even after the children have achieved some threshold level of competency The first half of the book presents and defends a model of decision making for children s health care the second half shows how it works in various practical contexts considering children as research subjects and as patients organ donorship and issues relating to adolescent sexuality Implementation of Ross s model would result in significant changes in what informed consent allows and requires for paediatric health care decisions This is the first systematic medical ethics book that focuses specifically on children s health care It has important things to say to health care providers who work with children as well as to ethicists and public policy analysts

End-of-life Decisions Maurice Steinberg, Stuart J. Youngner, 1998 In recent years the lens of the media has narrowed issues of euthanasia and assisted suicide to a drama involving two players Dr Kevorkian and the law This has left suffering patients and their families unrecognized and isolated when facing the most painful life decision Here at last is a book that addresses the role of psychiatry in dealing with a major controversial topic in American medicine today treatment decisions at the end of life End of Life Decisions A Psychosocial Perspective acknowledges and explores the role psychiatrists can play as advisers to the terminally ill and their loved ones It describes the wide range of emotional and psychiatric issues faced by the patient family and physician that affect choices patients make to limit treatment or seek physician assistance in dying A distinguished group of contributors all of whom have extensive experience dealing with end of life issues in clinical practice address topics that may not have been considered previously From dealing with issues of terminal illnesses in children to making difficult treatment decisions for patients with AIDS from judging the competency of clinically depressed patients for making sound decisions to understanding the influence of family dynamics economic forces and language differences on doctor patient communication the book uses specific case studies and data to explore the role of professionals in end of life decisions End of Life Decisions strikes a careful balance between the need for patient autonomy and the challenge to make well formulated treatment decisions This book will heighten modern medicine s and society s consciousness concerning the difficult challenges faced by patients and their families when making end of life decisions

Theories of the Self and Autonomy in Medical Ethics Michael Kühler, Veselin L. Mitrović, 2020-09-29 This book engages in a critical discussion on how to respect and promote patients autonomy in difficult cases such as palliative care and end of life decisions These cases pose specific epistemic normative and practical problems and the book elucidates the connection between the practical implications of the theoretical debate on respecting autonomy on the one hand and specific questions and challenges that arise in medical practice on the other hand Given that the idea of personal autonomy includes the notion of authenticity as one of its core components the book explicitly includes discussions on underlying theories of the self In doing so it brings together original contributions and novel insights for applied scenarios based on interdisciplinary collaboration between German and Serbian scholars from philosophy sociology and law It is of benefit to anyone cherishing autonomy in medical ethics and medical practice
