Decision By Default Peacetime Conscription And British Defence 1919 1939:

Decision by Default Peter Dennis, 2021-03-30 Britain's vast losses of men in the first world war produced a revulsion against conscription. Originally published in 1972, Peter Dennis here describes how conscription was introduced once more in 1939 when pressure from within Britain and from France forced the British Government to reverse its position. With the use of original sources, Peter Dennis explores the development of British military policy between the wars from the period of readjustment and realignment immediately after the first world war up to the breakdown of the Chamberlain government's pledge not to introduce conscription in peacetime. He points out that the politicians and the public were not afraid of conscription itself but of conscription in peacetime as the forerunner of continental military adventures in alliance with France. He shows how the battles over conscription had a marked effect on the indecision of military thinking and how in 1939 conscription finally became the crucial issue in Britain's preparation for war. Decision by Default: Peacetime Conscription and British Defence, 1919-1939 Peter Dennis, 1972 Englands hvervepolitik i rene mellem 1 og 2 Verdenskrig. Emner: Overvejelserne efter Locarnopagtens sammenbrud og fransk engelsk samarbejde. **Conscription in Britain, 1939-1964** Roger Broad, 2006 Compulsory military service in Britain can be traced back to Anglo-Saxon times but it was only in the twentieth century that it became universal. Conscription occurred during both world wars with a total of eight million men in total being conscripted into the army, navy and air forces and after the end of the Second World War compulsory service continued for another eighteen years to meet overseas commitments and under the threat of the Cold War. Conscription in Britain 1939 1963 outlines the historical record of conscription from the fyt of the Dark Ages through to Nelson's day and up to and including the First World War. The book goes on to concentrate on conscription during the Second World War and National Service which continued in the decades afterwards. The strategic and political considerations that governed British military recruitment in the period 1939 1963 are described and analyzed. Individual experiences in the services are examined, putting human flesh on the strategic and political skeleton. The book looks at aspects of conscription including the demands made on the services, how officers and men were selected and trained and how discipline was imposed. The years following the Second World War are also investigated, considering the effect of twenty-four years continuous conscription on the services themselves, on women's rights, on attitudes towards authority and patriotism, on race issues and on the breakout of individualism in the 1960s. **Deterrence, Coercion, and Appeasement** David French, 2022 A compelling and original survey of British grand strategy in the inter-war period, underlining the inexorable relationships between foreign policy, grand strategy, military force, intelligence, finance and not least domestic politics and public opinion. British Rearmament in the Thirties Robert Paul Shay, Jr., 2015-03-08 Here is a comprehensive analysis of rearmament under the Baldwin and Chamberlain governments. It reveals the primary determinants of events and provides important new information regarding the principal considerations underlying Chamberlain's policy of appeasement. The author concentrates

on a problem that was of central concern to the government For this reason and because he draws on the recently opened Cabinet and Treasury papers at the Public Record Office in London he is able to offer a broader view than that of the existing studies He describes in detail the interaction of the Cabinet Treasury and Armed Services and the influence of the financial and industrial communities Originally published in 1977 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Neville Chamberlain, Appeasement, and the British Road to War** Frank McDonough, 1998 Drawing on a wide range of material including primary sources Frank McDonough re examines the controversial policy of appeasement and argues that appeasement was part of a broad consensus in British society at the time **Public Opinion and the End of Appeasement in Britain and France** Dr Daniel Hucker, 2013-07-28 The 1930s policy of appeasement is still fiercely debated by historians critics and contemporary political commentators more than 70 years after the signing of the 1938 Munich Agreement What is less well understood however is the role of public opinion on the formation of British and French policy in the period between Munich and the outbreak of the Second World War not necessarily what public opinion was but how it was perceived to be by those in power and how this contributed to the policymaking process It therefore fills a considerable gap in an otherwise vast literature seeking to ascertain the extent to which public opinion can be said to have influenced the direction of foreign policy in a crucial juncture of British and French diplomatic history Employing an innovative and unique methodological framework the author distinguishes between two categories of representation firstly reactive representations of opinion the immediate and spontaneous reactions of the public to circumstances and events as they occur and secondly residual representations which can be defined as the remnants of previous memories and experiences the more general tendencies of opinion considered characteristic of previous years even previous decades It is argued that the French government of douard Daladier was consistently more attuned to the evolution of reactive representations than the British government of Neville Chamberlain and consequently it was the French rather than the British who first pursued a firmer policy towards the European dictatorships This comparative approach reveals a hitherto hidden facet of the diplomatic prelude to the Second World War that British policy towards France and French policy towards Britain were influenced by their respective perceptions of public opinion in the other country A sophisticated analysis of a crucial period in international history this book will be essential reading for scholars of the origins of World War II the political scenes of late 1930s Britain and France and the study of public opinion and its effects on policy **France and Britain, 1900-1940** P. M. H. Bell, 2014-05-12 The first of a two volume study which will analyse the complex relationship between Britain and France in the twentieth century a

relationship which has been crucial to European politics and to both World Wars This volume fully self contained runs from the period of intense imperial rivalry at the turn of the century to the Fall of France Philip Bell discusses diplomatic economic and military policy combining absorbing narrative with revealing commentary about the two countries Public Opinion and the End of Appeasement in Britain and France Daniel Hucker, 2016-04-15 The 1930s policy of appeasement is still fiercely debated by historians critics and contemporary political commentators more than 70 years after the signing of the 1938 Munich Agreement What is less well understood however is the role of public opinion on the formation of British and French policy in the period between Munich and the outbreak of the Second World War not necessarily what public opinion was but how it was perceived to be by those in power and how this contributed to the policymaking process It therefore fills a considerable gap in an otherwise vast literature seeking to ascertain the extent to which public opinion can be said to have influenced the direction of foreign policy in a crucial juncture of British and French diplomatic history Employing an innovative and unique methodological framework the author distinguishes between two categories of representation firstly reactive representations of opinion the immediate and spontaneous reactions of the public to circumstances and events as they occur and secondly residual representations which can be defined as the remnants of previous memories and experiences the more general tendencies of opinion considered characteristic of previous years even previous decades It is argued that the French government of douard Daladier was consistently more attuned to the evolution of reactive representations than the British government of Neville Chamberlain and consequently it was the French rather than the British who first pursued a firmer policy towards the European dictatorships This comparative approach reveals a hitherto hidden facet of the diplomatic prelude to the Second World War that British policy towards France and French policy towards Britain were influenced by their respective perceptions of public opinion in the other country A sophisticated analysis of a crucial period in international history this book will be essential reading for scholars of the origins of World War II the political scenes of late 1930s Britain and France and the study of public opinion and its effects on policy *German Rearmament and the West, 1932-1933* Edward W. Bennett, 2015-03-08 This probing examination of the period just before and after Hitler came to power corrects many misconceptions about German rearmament Drawing on previously unexploited sources Edward Bennett unravels German military plans and shows their implications undermining the notion that Hitler s accession represented a radical break with Germany s past He also lays bare the fears and rivalries that hindered the West s response particularly at the 1932 1933 World Disarmament Conference Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its

C. McKercher, 1999-02-15 This book addresses one of the least understood issues in modern international history how between 1930 and 1945 Britain lost its global pre-eminence to the United States The crucial years are 1930 to 1940 for which until now no comprehensive examination of Anglo-American relations exists Transition of Power analyses these relations in the pivotal decade with an epilogue dealing with the Second World War after 1941 Britain and the United States and their intertwined fates were fundamental to the course of international history in these years Professor McKercher's book dissects the various strands of the two powers relationship in the fifteen years after 1930 from a British perspective economic diplomatic naval and strategic *Churchill and the Strategic Dilemmas before the World Wars* John H.
