Decision Support Systems In Potato Production Bringing Models To Practice:

Decision support systems in potato production D.K.L. MacKerron,A.J. Haverkort,2023-08-28 Models of crop growth and development were conceived originally for scientific purposes Typically they describe the mechanisms of crop production development from emergence through tuber initiation to senescence determined by temperature and day length Growth is driven by solar radiation intercepted by the foliage Yields are enhanced by the availability of water and nutrients and may be reduced by pests diseases and weeds The scientific models describing the processes involved are leaving the research institutes and increasingly are becoming a means of knowledge transfer for students and most importantly to growers and their intermediaries such as extensionists and consultants Many decision support systems DSS have a mechanistic model core that assures their robustness and reliability This book gives an overview of model based DSS in potato production Decision support systems are used by the processing industry to guide them to promising production areas and by breeders to identify the ideal genotype for such environments Consultants and soil laboratories use them as well as farmers to optimize the use of nitrogen water and chemicals to control insects nematodes late blight and weeds The systems making use of models and sensing techniques improve yield and quality while allowing their users to improve the efficiency of use of resources thus generating positive effects for profits and for the environment The book also gives examples of new introductions of DSS and farmers responses The book is intended for researchers wanting to bring their models to practice students to learn about DSS intermediaries and growers to improve the performance of the potato industry or of other commodities for which potato serves as an example *Handbook of Potato Production, Improvement, and Postharvest Management* Jai Gopal,S.M. Khurana,2006-08-11 Potatoes are a crucial food crop around the world grown in nearly 150 countries The Handbook of Potato Production Improvement and Postharvest Management compiles everything you need to know about potato crop production in one well organized reference Leading international authorities clearly discuss the biology genetics breeding diseases and effective approaches for improvement of crop and handling after harvest This one of a kind text explores from interdisciplinary perspectives every aspect of potato crop management from seed germination to end use while presenting the most current research available Precision Agriculture: Modelling Davide Cammarano,Frits K. van Evert,Corné Kempenaar,2023-01-03 This book describes how models are used to monitor crops and soils in precision agriculture and how they are used to support farmers decisions The introductory section starts with an overview of precision agriculture from the early days of yield monitoring in the 1980s to the present with a focus on the role of models The section continues with descriptions of the different kinds of models and the opportunities for their application in precision agriculture The section concludes with a chapter on socio economic drivers and obstacles to the adoption of precision agriculture technologies The middle section of the book explores the state of the art in modeling for precision agriculture Individual chapters focus on the major processes in precision agriculture water use nitrogen and other amendments as well

as weeds pests and diseases The final section contains a series of short chapters that each describe a commercial model based service that is currently available to farmers The book aims to provide useful information to graduate level professionals that want to broaden their knowledge of precision agriculture to scientists who want to learn about using academic knowledge in practical farming and to farmers farm consultants and extension workers who want to increase their understanding of the science behind some of the commercial software available to the farming community

Potato in progress A.J. Haverkort,P.C. Struik,2023-08-28 This book contains the proceedings of the Potato 2005 conference held in Emmeloord The Netherlands This conference offered a platform to a diverse group of stakeholders in the potato industry to learn what science has to offer At the same time it created an environment for scientists to learn what drives the industry in the rapidly changing world of the potato The contributions in this book reflect the rapid developments both in the industry and in science The nutritional aspects of the potato tuber are discussed as well as the volatile consumer moods in saturated or new markets Latest developments in potato breeding and seed potato production are highlighted and these contributions underline how these potato sectors have been revolutionized The present and future role of decision support systems in managing inputs of nitrogen and water and in managing pests and thus in making potato production more sustainable is described Several innovations in technology development in potato production and storage are illustrated Experts provide the latest news on crop protection with a focus on developments in the control of the potato brown rot bacterium and late blight Finally the trends in potato trade are described This book shows that the potato crop is progressing globally with increasing impact on food supply and added value providing many opportunities for science to meet practice

Potato Biology and Biotechnology Dick Vreugdenhil,John Bradshaw,Christiane Gebhardt,Francine Govers,Mark A. Taylor,Donald K.L. MacKerron,Heather A. Ross,2011-08-31 In the past 15 20 years major discoveries have been concluded on potato biology and biotechnology Important new tools have been developed in the area of molecular genetics and our understanding of potato physiology has been revolutionized due to amenability of the potato to genetic transformation This technology has impacted our understanding of the molecular basis of plant pathogen interaction and has also opened new opportunities for the use of the potato in a variety of non food biotechnological purposes This book covers the potato world market as it expands further into the new millennium Authors stress the overriding need for stable yields to eliminate human hunger and poverty while considering solutions to enhance global production and distribution It comprehensively describes genetics and genetic resources plant growth and development response to the environment tuber quality pests and diseases biotechnology and crop management Potato Biology is the most valuable reference available for all professionals involved in the potato industry plant biologists and agronomists Offers an understanding of the social economic and market factors that influence production and distribution Discusses developments and useful traits in transgenic biology and genetic engineering The first reference entirely devoted to understanding new advances in potato biology and biotechnology

Understanding Plant Nitrogen Uptake for Systems Modeling Liwang Ma, Lajpat R. Ahuja, Tom Bruulsema, 2008-08-27

Discusses New Advancements to Improve Existing Simulations of Plant Nitrogen Written by research pioneers and leading scientists in the area of agricultural systems Quantifying and Understanding Plant Nitrogen Uptake for Systems Modeling comprehensively covers plant N uptake in agricultural system models especially for building soil plant system m

Advances in crop modelling for a sustainable agriculture Emeritus Professor Ken Boote, 2019-12-03 Focus on development of next generation of whole farm models to improve decision making and support for farmers Addresses the challenges of combining modular sub systems into whole farm system models Reviews the performance of specific models such as APSIM and DSSAT **Sensing Approaches for Precision Agriculture** Ruth Kerry, Alexandre Escolà, 2021-11-23

Sensing Approaches for Precision Agriculture aims to bring together the state of the art of the most popular sensing techniques and the current state of research on the application of sensors in Precision Agriculture PA Sensing is of great value in PA because it provides cheap and immediate data for management This book gives a broad overview of sensing in PA and a coherent introduction for new professionals and research scientists Readers are introduced to the potential applications of a range of different sensors how they should be used properly and their limitations for use in PA Chapters on specific topics and case studies provide depth and enable implementation of the methods by users A general introduction about sensing techniques in PA is followed by Chapters 2 9 on the most important specific techniques in sensing and Chapters 10 13 include mini case studies each showing cutting edge applications for different sensing methods Finally there is an Epilogue on how we expect sensors and analysis to develop [The Physiology of Vegetable Crops, 2nd Edition](#) Hans

Christian Wien, Hartmut Stützel, 2020-05-01 Completely updated and revised this bestselling book continues to explain the growth and developmental processes involved in the formation of vegetables Since the publication of the successful first edition significant discoveries particularly in the area of molecular biology have deepened and broadened our knowledge and understanding of these processes This new edition brings the topic up to date and is presented over two sections the first provides general knowledge on germination transplanting flowering the effects of stress and modelling whilst the second section details the physiology of specific crops or crop groups **Precision agriculture '09** E.J. van Henten, D. Goense, C.

Lokhorst, 2023-09-04 Precision Agriculture is becoming ever more relevant as the agricultural industry struggles to come to terms with the environment economics traceability vehicle guidance and crop management Whilst some benefits have proved elusive others contribute positively to today s agriculture Research continues to be necessary and needs to be reported and disseminated to a wide audience These proceedings contain the reviewed papers from the 7th European Conference on Precision Agriculture The papers reflect the wide range of disciplines that impinge upon precision agriculture including remote sensing plant disease and weed detection yield monitoring soil sensing geo statistics and path planning regional and crop modelling cooperation and guidance of robots precision application ICT in precision agriculture future farming and

European relevance for precision agriculture The broad range of research topics reported is a valuable resource for researchers advisors teachers and professionals in agriculture Also note that the reviewed papers from the 4th European Conference on Precision Livestock Farming are presented in a companion publication

Cyst Nematodes Roland N Perry,Maurice Moens,John T Jones,2018-04-09 This book is a compendium of current information on all aspects of these economically important parasites It provides comprehensive coverage of their biology management morphology and diagnostics in addition to up to date information on molecular aspects of taxonomy host parasitic relationships and resistance Written by a team of international experts Cyst Nematodes will be invaluable to all researchers lecturers and students in nematology parasitology agriculture and agronomy industries with an interest in chemical and biological control products for management of plant parasitic nematodes and any courses quarantine and advisory services *Annual Report* Scottish Crop Research Institute,2004

Sustainable Potato Production: Global Case Studies Zhongqi He,Robert Larkin,Wayne Honeycutt,2012-05-24 Potato *Solanum tuberosum* L is grown in over 100 countries throughout the world As a staple food potato is the fourth most important crop after rice wheat and maize and has historically contributed to food and nutrition security in the world Global interest in potato increased recently as world food prices soared threatening the global food security and stability Unlike major cereals potato is not a globally traded commodity and prices are usually determined by local production costs Thus potato is increasingly regarded as a vital food security crop and as a substitute for costly cereal imports With such importance the 29 chapters in the edited book address the issues of sustainable potato production This book begins with an introduction on sustainable potato production and global food security and then presents eight case studies selected globally and covering different issues relevant to sustainable potato production in both developed and developing countries

The Epidemiology of Plant Diseases B. Michael Cooke,D. Gareth Jones,Bernard Kaye,2006-06-18 Plant disease epidemiology is a dynamic science that forms an essential part of the study of plant pathology This book brings together a team of 35 international experts Each chapter deals with an essential component of the subject and allows the reader to fully understand how each exerts its influence on the progress of pathogen populations in plant populations over a defined time scale Since the first edition of the text was published in 1998 many new developments have occurred in the subjects covered particularly molecular diagnostics modelling fungicide resistance and information technology The second edition of the book is a comprehensive text on all aspects of plant disease epidemiology that should serve as an invaluable reference work for those involved in this fascinating science of crop plants
