Decision Information:

Decision Support Systems for Sustainable Development Anthony Gar-On Yeh, 2000 In recent years much work has been done in formulating and clarifying the concept of sustainable development and related theoretical and research issues Now the challenge has shifted to designing and stimulating processes of effective planning and decision making at all levels of human activity in such a way as to achieve local and global sustainable development Information technology can help a great deal in achieving sustainable development by providing well designed and useful tools for decision makers One such tool is the decision support system or DSS This book explores the area of DSS in the context of sustainable development As DSS is a very new technique especially in the developing world this book will serve as a reference text primarily for managers government officials and information professionals in developing countries It covers the concept of sustainable development defines DSS and how it can be used in the planning and management of sustainable development and examines the state of the art in DSS use Other interested readers will include students teachers and analysts in information sciences DSS designers developers and implementors and international development agencies *Efficient Decision Support Systems* Chiang Jao, 2011-09-09 This series is directed to diverse managerial professionals who are leading the transformation of individual domains by using expert information and domain knowledge to drive decision support systems DSSs The series offers a broad range of subjects addressed in specific areas such as health care business management banking agriculture environmental improvement natural resource and spatial management aviation administration and hybrid applications of information technology aimed to interdisciplinary issues This book series is composed of three volumes Volume 1 consists of general concepts and methodology of DSSs Volume 2 consists of applications of DSSs in the biomedical domain Volume 3 consists of hybrid applications of DSSs in multidisciplinary domains The book is shaped upon decision support strategies in the new infrastructure that assists the readers in full use of the creative technology to manipulate input data and to transform information into useful decisions for decision makers Decision Support Systems and Data Warehouses B. Ravindranath, 2003 This Book Provides A Systematic Introduction To The Principles Of Decision Support Systems And Data Warehouses It Covers The Entire Range Of Tools From Decision Trees To Expert Systems Which Are Now Available For Managerial Decision Making Under Stress And Severe Time Constraints The Chapters On Data Warehousing And Knowledge Retrieval Cover The Recent Trends In Developing Customer Profiles And Other Useful Information From The Data Available In Enterprises The Last Chapter Computer Networks Provides The Required Information To Managers And Executives For Getting Familiar With The Delivery System Which Has Become Indispensable For Computer Based Information Systems This Book Will Be Useful To Undergraduate Students Of Computer Science Information Technology Managers And Executives Will Also Find This Book A Useful Reference Source *Decision Support Systems VIII: Sustainable Data-Driven and Evidence-Based Decision Support* Fatima Dargam, Pavlos Delias, Isabelle Linden, Bertrand Mareschal, 2018-05-15 This book

constitutes the proceedings of the 4th International Conference on Decision Support Systems ICDSST 2018 held in Heraklion Greece in May 2018 The main topic of this year's conference was Sustainable Data Driven and Evidence Based Decision Support The 15 papers presented in this volume were carefully reviewed and selected from 71 submissions They were organized in topical sections named decision support systems for a sustainable society decision support systems serving the public decision support systems in management and organization and advances in decision support systems technologies and methods The EWG DSS series of International Conference on Decision Support System Technology ICDSST starting with ICDSST 2015 in Belgrade were planned to consolidate the tradition of annual events organized by the EWG DSS in offering a platform for European and international DSS communities comprising the academic and industrial sectors to present state of the art DSS research and developments to discuss current challenges that surround decision making processes to exchange ideas about realistic and innovative solutions and to co develop potential business opportunities

Research Anthology on Decision Support Systems and Decision Management in Healthcare, Business, and Engineering Management Association, Information Resources, 2021-05-28 Decision support systems DSS are widely touted for their effectiveness in aiding decision making particularly across a wide and diverse range of industries including healthcare business and engineering applications The concepts principles and theories of enhanced decision making are essential points of research as well as the exact methods tools and technologies being implemented in these industries From both a standpoint of DSS interfaces namely the design and development of these technologies along with the implementations including experiences and utilization of these tools one can get a better sense of how exactly DSS has changed the face of decision making and management in multi industry applications Furthermore the evaluation of the impact of these technologies is essential in moving forward in the future The Research Anthology on Decision Support Systems and Decision Management in Healthcare Business and Engineering explores how decision support systems have been developed and implemented across diverse industries through perspectives on the technology the utilizations of these tools and from a decision management standpoint The chapters will cover not only the interfaces implementations and functionality of these tools but also the overall impacts they have had on the specific industries mentioned This book also evaluates the effectiveness along with benefits and challenges of using DSS as well as the outlook for the future This book is ideal for decision makers IT consultants and specialists software developers design professionals academicians policymakers researchers professionals and students interested in how DSS is being used in different industries

Handbook on Decision Support Systems 1 Frada Burstein, Clyde W. Holsapple, 2008-01-22 Decision support systems have experienced a marked increase in attention and importance over the past 25 years The aim of this book is to survey the decision support system DSS field covering both developed territory and emergent frontiers It will give the reader a clear understanding of fundamental DSS concepts methods technologies trends and issues It will serve as a basic reference work for DSS research practice and instruction To

achieve these goals the book has been designed according to a ten part structure divided in two volumes with chapters authored by well known well versed scholars and practitioners from the DSS community **Proceedings of the 5th International Conference on Decision Support System Technology - ICDSST 2019 & EURO Mini Conference 2019**

CIO ,1994-08 *Development of a web-based spatial decision support system (WSDSS) for river restoration* Andreas Zitek,2010-01-05 Inhaltsangabe Introduction The main goal of this thesis is to develop a framework for a Web based Spatial Decision Support System WSDSS for supporting the development of river restoration strategies Due to their free availability open source free GIS tools and technology are used to develop this decision support framework supporting a multi user decision support platform via the web The integration of latest multi scale river ecological knowledge is assured by the strong relatedness of this thesis to a project that has been run at the University of Natural Resources and Applied Life Sciences BOKU in Vienna between 2005 and 2008 the MIRR project Model based Instrument for River Restoration By order of the Austrian Ministry of Life being responsible for the implementation of the EU Water Framework

Directive a strategic instrument to identify hydro morphological restoration measures for running waters to enhance the ecological status of rivers in Austria measured by fish was developed at the Institute of Hydrobiology and Aquatic Ecosystem Management IHG at the BOKU based on comprehensive multivariate analyses of fish pressure relationships using data from Lower Austria The identification and quantification of the effects of the main relevant pressure types allowed the development of flow charts for guiding restoration activities at multiple scales Up to now no tool exists allowing an automated evaluation of the effects of different restoration strategies on the ecological status of the so called water bodies the relevant scale for action and reporting with regard to the EU WFD Furthermore existing web based GIS tools related to rivers and the implementation of the EU WFD in Austria and on an EU level do not allow any interaction with the data and are therefore not well suited for decision support for example the Water Information system of Austria WISA or the Water Information System of Europe WISE The following parts of the MIRR project conducted under the supervision of the author of this thesis as work package leader and can be seen as part of this thesis although mainly content relevant for the development of the WSDSS framework is reproduced here Literature research and definition of relevant parameters to model fish pressure relationships on multiple spatial and temporal scales Investigation and collection of the available GIS datasets in Austria that might be of relevance for the MIRR project and matching

Handbook on Decision Making Chee Peng Lim, 2010-09-07 Decision making arises when we wish to select the best possible course of action from a set of alternatives With advancements of the digital technologies it is easy and almost instantaneous to gather a large volume of information and or data pertaining to a problem that we want to solve For instance the world wi web is perhaps the primary source of information and or data that we often turn to when we face a decision making problem However the information and or data that we obtain from the real world often are complex and comprise various kinds of noise Besides real world information and or data often are incomplete and ambiguous owing to uncertainties of the environments All these make decision making a challenging task To cope with the challenges of decision making searchers have designed and developed a variety of decision support systems to provide assistance in human decision making processes The main aim of this book is to provide a small collection of techniques stemmed from artificial intelligence as well as other complementary methodo gies that are useful for the design and development of intelligent decision support systems Application examples of how these intelligent decision support systems can be utilized to help tackle a variety of real world problems in different mains e g business management manufacturing transportation and food ind tries and biomedicine are also presented A total of twenty chapters which can be broadly divided into two parts i e
