Depending upon one s perspective the need to choose among alternatives can be an unwelcome but unavoidable responsibility an exciting and challenging opportunity a run of the mill activity that one performs seem ingly without thinking very much about it or perhaps something in between Your most recent selections from a restaurant menu from a set of jobs or job candidates or from a rent or buy or sell or lease option are cases in point Oftentimes we are involved in group decision processes such as the choice of a president wherein one group member s unwelcome responsibility is another s exciting opportunity Many of us that voted in the presidential elections of both 1956 and 1984 irrespective of political affiliation experienced both emotions others just pulled the lever or punched the card without thinking very much about it Arriving at either an individual or a group decision can sometimes be a time consuming torturous and traumatic process that results in a long regretted choice that could have been reached right off the bat On other occasions the just let s get it over with and get out of here solution to a long festering problem can yield rewards that are reaped for many 1 ORGANIZATION AND DECISION THEORY 2 years to come One way or another however individuals and organiza tions somehow manage to get the decision making job done even if they don t quite understand and often question just how this was accomplished      **Supply**

**and Costs in the U.S. Petroleum Industry (Routledge Revivals)** Franklin M. Fisher,2015-06-11 Any discussion of the various facets of petroleum policy in the United States rests to a greater or less extent on the issue of sensitivity of petroleum exploration and hence of new petroleum discoveries to economic incentives Indeed a principle argument in favour of having a special petroleum policy at all is that domestic petroleum exploration is so sensitive to economic considerations that in the

absence of special incentives exploration expenditures would sharply decrease as would the amount of petroleum discovered consequently the nation's known oil resources would be reduced to an extent dangerous in the event of an international crisis This study attempts to answer the question how sensitive are new petroleum discoveries to economic incentives This book will be of interest to students of environmental studies *Uncertainty* Millett Granger Morgan, Max Henrion, Mitchell Small, 1990 A risk analysis textbook which is intended as a basic text for students as well as a reference for practitioners and researchers It provides a basis for policy analysis and draws upon a variety of case studies Capital Markets and Finance Bibliography, 1979

**Strategic Planning for Exploration Management** Allen N. Quick, Neal A. Buck, 2012-12-06 In all the industries in which I do management consulting each manager considers his own industry to be truly unique Of course each is different in some respects and each has its own quirks and features However the similarities among industries far outweigh the

differences The critical dynamics and the management issues have a great deal in common However there are I believe two industries or segments of industries that have an important critical uniqueness that does distinguish them from the rest One of these is the exploration for undiscovered natural resources notably for oil and gas the other is research In these two industry segments the competition is not nearly so much one firm against another as it is each firm against nature or if you prefer against the unknown This uniqueness not only sets these two industry segments apart from the rest it also helps us to see what they have in common with each other Pure scientific talent ability and genius have direct commercial value We do not have the zero sum game of competition in the market place A discovery by one firm does not usually perceptibly lessen the opportunity of a competitor for a discovery On the contrary a discovery by one firm usually increases the knowledge of the whole industry increasing competitors opportunity for discovery We see the source of continuing life for the rest of the firm
