The Growth of the British Economy 1918-1968 G. A. Phillips, R. T. Maddock, 2021-11-21 Originally published in 1973 the aim of this work was to discuss the

various factors governing the rate of growth of the British economy since the First World War It endeavours to explain or at least to provide the groundwork for an explanation of the movements of aggregate production and productivity in this period In so doing it examines two particular and partly antithetical questions why Britain exceeded the predictions of economic theorists who until at least the Second World War had forecast a retardation of growth in all mature industrial economies and why especially since 1950 the economy has expanded less quickly than many professional economists and almost all politicians thought possible The authors look in turn at the changing trends in effective economic demand both domestic and foreign the supply of labour and capital and the role of management and the state in fostering growth Their object is to produce a balanced mixture of the available historical and statistical evidence and the relevant economic theory They introduce their readers at the same time to the more specialized works of both disciplines The book is the product of a fruitful collaboration between an economist and a historian both with considerable experience in teaching students combining their two subjects It marries accordingly the qualities of apt and informative use of evidence wide ranging theoretical discussion and clarity of exposition

The Development of British Industry and Foreign Competition

Derek H. Aldcroft, 2025-06-01 Originally published in 1968 this important work covers a crucial period in Britain's economic history In the three or four decades before the First World War British industry was subject to increasing foreign competition particularly from America and Germany This book reviews the main developments in 10 industries paying particular attention to the way in which they were affected by foreign competition and the measures taken to combat it Each case is analysed in terms of how progressive the British industrialists were and to what extent they were willing to innovate or alter their methods to meet the new conditions In cases where a lack of enterprise was clear the contributors have tried to determine what the major factors were which governed the pace of innovation The book will be of interest to economists economic historians and sociologists as well as those interested in industrial innovation

Coping with City Growth During the British Industrial Revolution Jeffrey G. Williamson, 2002-05-09 This book assesses Britain's handling of city growth during the First Industrial Revolution

Governments, Markets, and Growth John Zysman, 2018-05-31 The deterioration in the economic performance of the advanced industrial democracies during the 1970s provoked an intense debate about the role of government in economic adjustment and growth In *Governments Markets and Growth* John Zysman makes a significant contribution to our understanding of these critical international issues by demonstrating that there is a direct relationship between a nation's financial system and its government's ability to restart the growth engine Professor Zysman argues that there are three distinct types of financial systems each with different consequences for the political ties between financial markets industry and government Zysman tests his argument by analyzing and comparing the patterns of industrial adjustment in five advanced nations He contrasts the differing strategies of industrial adjustments primarily in France and Great Britain but also in Japan West Germany and the United States *Governments Markets and Growth* will be invaluable to

the international banking and business community a wide variety of government officials and students of political science economics and business administration *British Industrial Capitalism Since The Industrial Revolution* Roger

Davies,2022-04-11 This survey of the rise and decline of English watchmaking fills a gap in the historiography of British industry Clerkenwell in London was supplied with rough movements from Prescott 200 miles away in Lancashire Smaller watchmaking hubs later emerged in Coventry Liverpool and Birmingham The English industry led European watchmaking in the late eighteenth century in output and its lucrative export markets extended to the Ottoman Empire and China It also made marine chronometers the most complex of hand crafted pre industrial mechanisms crucially important to the later

hegemony of Britain's navy and merchant marine. Although Britain was the workshop of the world, its watchmaking industry declined. Why? First because cheap Swiss watches were smuggled into British markets. Later in the era of Free Trade they were joined by machine-made watches from factories in America, enabled by the successful application to watch production of the American system in Waltham, Massachusetts, after 1858. The Swiss watch industry adapted itself appropriately, expanded and reasserted its lead in the world's markets. English watchmaking did not; its trajectory foreshadowed and was later followed by other once prominent British industries. Clerkenwell retained its pre-industrial production methods. Other modernization attempts in Britain had limited success or failed.

Alfred Herbert Ltd and the British Machine Tool Industry, 1887-1983 Roger Lloyd-Jones, M.J. Lewis, 2017-09-29. At the beginning of the twentieth century Britain was amongst the world leaders in the production of machine tools, yet by the 1980s the industry was in terminal decline. Focusing on the example of Britain's largest machine tool maker, Alfred Herbert Ltd of Coventry, this study charts the wider fortunes of this vital part of the manufacturing sector. Taking a chronological approach, the book explores how during the late nineteenth century the industry developed a reputation for excellence throughout the world, before the challenges of two world wars necessitated drastic changes and reorganisations. Despite meeting these challenges and emerging with confidence into the post-war market place, the British machine tool industry never regained its pre-eminent position and increasingly lost ground to foreign competition. By using the example of Alfred Herbert Ltd to illuminate the broader economic and business history of the British machine tool industry, this study not only provides a valuable insight into British manufacturing but also contributes to the ongoing debates surrounding Britain's alleged decline as a manufacturing nation.

Myth, History and the Industrial Revolution D. C. Coleman, 1992-07-01. Tourists are today urged to visit the birthplace of the Industrial Revolution, packaged as part of a glorious heritage. Half a century and more ago the picture was very different. Then the Industrial Revolution was commonly treated as having been a social catastrophe which had brought a new barbarism to the country. Donald Coleman traces the history of the term Industrial Revolution and the uses to which it has been put. Originating in European radical Romanticism, popularised in English by Arnold Toynbee in the 1880s, it has achieved with its meaning transformed the status of potent myth in the nation's history. The book examines industrial revolutions, real and imaginary, illuminates some of the activities of businessmen engaged therein, considers attitudes towards the businessmen who have thus come to occupy the historical stage and discusses the academic study of business history, a subject hardly imaginable without the Industrial Revolution. In the course of investigating these inter-related topics, the volume as a whole offers valuable insights into the ways in which economic history has been written and the concepts which have been invented and deployed in an effort to understand a central event in British history. This book provides an excellent introduction to the subject.

History of Indian Economy Mr. Rohit Manglik, 2023-11-23. In this book we will study about the evolution of the Indian economy from ancient trade systems through colonial exploitation to post-independence planning and liberalization.

Business in Britain in the Twentieth Century Richard Coopey, Peter Lyth, 2009 This collection of fresh incisive scholarship by some of the leading business historians critically examines the nature of economic recovery in Britain in recent years. Covering the key issues for business history in this period the book confronts the traditional literature on conclusions of relative decline and monocausal simplistic explanations. It provides an impressive range of studies forming a platform for a new debate on the nature of British business in the 20th century. Themes include productivity management research and development marketing regional clusters and networks industrial policy the use of technology and gender. Sector studies include newer post war hopefuls and successes including aerospace IT retail banking overseas investment the creative industries. The book demonstrates that our understanding of the historic strengths and weaknesses of business in Britain and the shifting balance between sectors of the economy has until now been poorly understood and that British business history needs a fundamental reappraisal.
