copies      **European Integration Since the 1920s** Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union      British Business in Post-Colonial Malaysia, 1957-70 Nicholas J. order They examine the economic repercussions of decolonization and its impact on international power structures its consequences for envisioning world order and the long shadow it continues to cast over new states and former colonial powers alike Concise and authoritative Decolonization is the essential introduction to this momentous chapter in history the aftershocks of which are still being felt today      **The British Empire** Philippa Levine,2013-11-04 This is a broad survey of the history of the British Empire from its beginnings to its demise It offers a comprehensive analysis not just of political events and territorial conquests but paints a picture of what life was like under colonial rule both for those who ruled and for those whose countries came under British authority There has been a lively debate in recent years about whether empires generally are good or bad things and the British Empire has been very much at the centre of that debate with a number of voices arguing that it was a kinder gentler Empire than its rivals This book speaks specifically to that debate and also to a second and equally vigorous debate about whether anyone in Britain actually cared about the possession of an Empire

Shigeru Akita,Gerold Krozewski,Shoichi Watanabe,2014-07-25 In Asia the 1950s were dominated by political decolonization and the emergence of the Cold War system and newly independent countries were able to utilize the transformed balance of power for their own economic development through economic and strategic aid programmes This book examines the interconnections between the transfer of power and state governance in Asia the emergence of the Cold War and the transfer of hegemony from the UK to the US by focusing specifically on the historical roles of international economic aid and the autonomous response from Asian nation states in the immediate post war context The Transformation of the International Order of Asia offers closely interwoven perspectives on international economic and political relations from the 1950s to the 1960s with specific focus on the Colombo Plan and related aid policies of the time It shows how the plan served different purposes Britain s aim to reduce India s wartime sterling balances in London the quest for India s economic independence

under Jawaharlal Nehru Japan's regional economic assertion and its endeavour to improve its international status Britain's publicity policy during the reorganization of British aid policies at a time of economic crisis and more broadly the West's desire to counter Soviet influence in Asia In doing so the chapters explore how international economic aid relations became reorganized in relation to the independent development of states in Asia during the period and crucially the role this transformation played in the emergence of a new international order in Asia Drawing on a wide range of international contemporary and archival source materials this book will be welcomed by students and scholars interested in Asian international and economic history politics and development studies

The International Order of Asia in the 1930s and 1950s Nicholas J. White, 2016-03-03 This book reconsiders the nature and formation of Asia's economic order during the 1930s and 1950s in light of the new historiographical developments in Britain and Japan Recently several Japanese economic historians have offered a new perspective on Asian history arguing that economic growth was fuelled by the phenomenon of intra Asian trade which began to grow rapidly around the turn of the 19th 20th centuries On the other side British imperial historians P J Cain and A G Hopkins have presented their own interpretation of gentlemanly capitalism in which they emphasize the leading role of the service sector rather than that of British industry in assessing the nature of the British presence overseas In order to assess and test these new perspectives this volume addresses three key issues The first is to reconsider the metropolitan peripheral relationship in Asia focusing particularly on the role of the sterling area and its implications for Asian economic development The second is to examine the formation of inter regional trade relations within Asia in the 1930s and their revival and transformation in the 1950s The final issue is the comparison of the international order of Asia of the 1930s with the 1950s and the degree to which the Second World War represented a break point in Asia's economic development Dealing with issues of trade economy nationalism and imperialism this book provides fresh insights into the development of Asia during the mid twentieth century Drawing on the latest scholarship it will prove invaluable to all who wish to better understand the position of countries such as Japan China India Singapore Malaysia and Korea within the wider international order

Negotiating the End of the British Empire in Africa, 1959-1964 Peter Docking, 2021-12-02 This book examines conferences and commissions held for British colonial territories in East and Central Africa in the early 1960s Until 1960 the British and colonial governments regularly employed hard methods of colonial management in East and Central Africa such as instituting states of emergency and imprisoning political leaders A series of events at the end of the 1950s made hard measures no longer feasible including criticism from the United Nations As a result softer measures became more prevalent and the use of constitutional conferences and commissions became an increasingly important tool for the British government in seeking to manage colonial affairs During the period 1960-64 a staggering sixteen conferences and ten constitutional commissions were held for British colonies in East and Central Africa This book is the first of its kind to provide a detailed overview of how the British sought to make use of these events to control and manage the pace of change

The author also demonstrates how commissions and conferences helped shape politics and African popular opinion in the early 1960s Whilst giving the British government temporary respite conferences and commissions ultimately accelerated the decolonisation process by transferring more power to African political parties and engendering softer perceptions on both sides Presenting both British and African perspectives this book offers an innovative exploration into the way that these episodes played an important part in the decolonisation of Africa It shows that far from being dry and technical events conferences and commissions were occasions of drama that tell us much about how the British government and those in Africa engaged with the last days of empire
