Deconstruction As Analytic Philosophy:

Deconstruction as Analytic Philosophy Samuel C. Wheeler, 2000 These twelve essays treat the thought of deconstructive philosophers from the perspective of analytic philosophy and relate the works of such thinkers as Davidson Quine and Wittgenstein to the writings of Derrida and de Man **(Over)Interpreting Wittgenstein** A. Biletzki, 2012-09-14 Over Interpreting Wittgenstein will be read by philosophers investigating Wittgenstein and by scholars interpreters students and specialists in both analytic and continental philosophy It will intrigue readers interested in issues of interpretation and cultural studies This book tells the story as yet untold of Wittgenstein interpretation during the past eighty years It provides different interpretations chronologies developments and controversies It aims to discover the socio cultural rather than psychological motives and motivations behind the philosophical community's project of interpreting Wittgenstein As a cultural history of ideas it traces the parallelism between Wittgenstein interpretation and the move from metaphysics to language to postmodernism effected in the twentieth century **Redrawing the Lines**, 1989 **Deconstruction and Critical Theory** Peter V. Zima, 2002-06-01 This book surveys the main schools and theorists of deconstruction establishing their philosophical roots and tracing their intellectual development It analyses their contribution to the understanding of literature and ideology comparing their critical value and exploring the critical reaction to deconstruction and its limitations The text is designed for students who wish to understand how and why deconstruction has become the dominant tool of the humanities Deconstruction and Critical Theory marks a new stage in the reception history of Derrida's work and in the wider philosophical debate around deconstruction Zima's study makes a strikingly original contribution to our better understanding of deconstruction and its various philosophic sources Christopher Norris University of Wales at Cardiff Deconstruction And Critical Theory surveys the main schools and theorists of deconstruction establishes their philosophical roots traces their intellectual development analyses their contribution to the understanding of literature and ideology compares their critical value explores the critical reaction to deconstruction and its limitations This is the ideal text for students who wish to understand how and why deconstruction has become the dominant tool of the Humanities **Analytic Philosophy in Finland**, 2016-08-09 Finland is internationally known as one of the leading centers of twentieth century analytic philosophy This volume offers for the first time an overall survey of the Finnish analytic school The rise of this trend is illustrated by original articles of Edward Westermarck Eino Kaila Georg Henrik von Wright and Jaakko Hintikka Contributions of Finnish philosophers are then systematically discussed in the fields of logic philosophy of language philosophy of science history of philosophy ethics and social philosophy Metaphilosophical reflections on the nature of philosophy are highlighted by the Finnish dialogue between analytic philosophy phenomenology pragmatism and critical theory [Derrida on Being as Presence](#) David A. White, 2017-04-24 Jacques Derrida's extensive early writings devoted considerable attention to being as presence the reality underlying the history of metaphysics In Derrida on Being as Presence Questions and Quests David A

White develops the intricate conceptual structure of this notion by close exegetical readings drawn from these writings White discusses cardinal concepts in Derrida's revamping of theoretical considerations pertaining to language signification context negation iterability as these considerations depend on the structure of being as presence and also as they ground deconstructive reading White's appraisal raises questions invoking a range of problems He deploys these questions in conjunction with thematically related quests that arise given Derrida's conviction that the history of metaphysics as variations on being as presence has concealed and skewed vital elements of reality White inflects this critical apparatus concerning being as presence with texts drawn from that history e.g. by Plato Aristotle Bacon Hume Kant Whitehead The essay concludes with a speculative ensemble of provisional categories or zones of specificity Implementing these categories will ground the possibility that philosophy in general and metaphysics in particular can be pursued in ways which acknowledge the relevance of Derrida's thought when integrated with the philosophical enterprise as traditionally understood

Jacques Derrida: Live Theory James KA Smith, 2005-10-20 Jacques Derrida Live Theory is a new introduction to the work of this most influential of contemporary philosophers It covers Derrida's corpus in its entirety from his earliest work in phenomenology and the philosophy of language to his most recent work in ethics politics and religion It investigates Derrida's contribution to and impact upon such disciplines as philosophy literary theory cultural studies aesthetics and theology Throughout the key concepts that underpin Derrida's thought are thoroughly examined in particular the notion of the Other or alterity is employed to indicate a fundamental continuity from Derrida's earliest to his latest work The text emphasizes the importance of understanding Derrida's philosophical heritage as the key to understanding the interdisciplinary impact of his project In the wake of Derrida's death the book includes an interview that interrogates the very notion of live theory as a way into the core themes of deconstruction

Routledge Philosophy Guidebook to Derrida on Deconstruction Barry Stocker, 2006-04-18 Examining one of the most important and prolific figures in modern thought Barry Stocker offers a lucid introduction to key texts including Speech and Phenomena Of Grammatology and Writing and Difference

Deconstruction Jonathan D. Culler, 2003 It could be argued that deconstruction has to a considerable extent been formed by critical accounts of it This collection reprints a cross section of these important works charting the ways in which deconstruction is conceptualized and demonstrating the impact it has had on a wide range of traditions The essential pieces in this set include writings by Jacques Derrida Jonathan Culler Paul de Man Barbara Johnson and a wide range of key thinkers in areas as diverse as psychoanalysis law gender studies and architecture The major themes covered include Vol 1 Part I What is Deconstruction Part II Philosophy Vol 2 Part III Literary Criticism Part IV Feminism and Queer Theory Vol 3 Part V Psychoanalysis Part VI Religion Theology Part VII Architecture Vol 4 Part VIII Politics Part IX Ethics

Contest of Faculties (Routledge Revivals) Christopher Norris, 2009-12-15 This Routledge Revival first published in 1985 gives detailed attention to the bearing of literary theory on questions of truth meaning and reference On the one hand

deconstruction brings a vigilant awareness of the figural and narrative tropes that make up the discourse of philosophic reason. On the other it insists that argumentative rigour cannot be divorced from the kind of close reading that has come to characterize literary theory in its more advanced or speculative forms. This present day contest of faculties has large implications for philosophers and critics many of whom will welcome the reissue of such a clear headed statement of the impact of deconstruction.

Literary Theory After Davidson Reed Way Dasenbrock, 2010-11-01 *The Deconstructive Turn* (Routledge Revivals) Christopher Norris, 2010

Annotation: What might be the outcome for philosophy if its texts were subjected to the powerful techniques of rhetorical close reading developed by current deconstructionist literary critics? When first published in 1983, Christopher Norris' book was the first to explore such questions in the context of modern analytic and linguistic philosophy, opening up a new and challenging dimension of inter disciplinary study and creating a fresh and productive dialogue between philosophy and literary theory.

Redrawing the Lines Reed Way Dasenbrock, 1989

Redrawing the Lines was first published in 1989. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. Since 1970 literary theory has experienced a period of rich interaction with both Anglo American analytic and Continental philosophy, particularly deconstruction. Yet these two philosophical schools have regarded each other with hostility if at all as in the 1977 exchange between John Searle and Jacques Derrida over the work of J. L. Austin. Since then the two philosophical traditions have begun to interact as each has influenced literary theory and some suggest that they are not diametrically opposed. *Redrawing the Lines*, the first book to focus on that interaction, brings together ten essays by key figures who have worked to connect literary theory and philosophy and to reassess the relationship between analytic and Continental philosophy. The editor's introduction establishes the debate's historical context and his annotated bibliography directs the interested reader to virtually everything written on this issue. The contributors: Reed Way Dasenbrock, Henry Staten, Michael Fischer, Charles Altieri, Richard Shusterman, Samuel C. Wheeler III, Jules David Law, Steven Winspur, Christopher Norris, Richard Rorty, and Anthony J. Cascardi.

Reed Way Dasenbrock is associate professor of English at New Mexico State University. He is the author of *The Literary Vorticism of Ezra Pound* and Wyndham Lewis *Toward the Condition of Painting*.

The Philosophy of Derrida Mark Dooley, Liam Kavanagh, 2014-12-18

For more than forty years Jacques Derrida has attempted to unsettle and disturb the presumptions underlying many of our most fundamental philosophical, political, and ethical conventions. In *The Philosophy of Derrida*, Mark Dooley examines Derrida's large body of work to provide an overview of his core philosophical ideas and a balanced appraisal of their lasting impact. One of the author's primary aims is to make accessible Derrida's writings by discussing them in a vernacular that renders them less opaque and nebulous. Derrida's unusual writing style, which mixes literary and philosophical vocabularies, is shown to have hindered their interpretation and translation. Dooley situates Derrida squarely in the tradition of historicist hermeneutic and linguistic thought and Derrida's objectives and those of

deconstruction are rendered considerably more convincing While Derrida's works are ostensibly diverse Dooley reveals an underlying cohesion to his writings From his early work on Husserl Hegel and de Saussure to his most recent writings on justice hospitality and cosmopolitanism Derrida is shown to have been grappling with the vexed question of national cultural and personal identity and asking to what extent the notion of a pure identity has any real efficacy Viewed from this perspective Derrida appears less as a wanton iconoclast for whom deconstruction equals destruction but as a sincere and sensitive writer who encourages us to shed light on our historical constructions so as to reveal that there is much about ourselves that we do not know

Realism Discourse and Deconstruction Jonathan Joseph, John Michael Roberts, 2004-05-05

The book addresses such issues as the work of Derrida and deconstruction discourse theory Eurocentrism and poststructuralism

Philosophical Approaches to Communication Claude Mangion, 2011-02-01 A comprehensive introduction to the forms and various philosophical theories of communication this volume is composed of three sections focusing on the production of culturally relevant communication the interpretation of communicative messages and the effects of communication on both speaker and listener Each section draws on the work of key philosophers from Foucault to Derrida to Habermas and presents a detailed critical overview of the work in relation to the field of communication Exhaustively researched this book presents an up to date overview of thinking on communication theory in one inclusive volume

Edinburgh Companion to Poststructuralism Benoit Dillet, 2013-11-18 Written by experts in their field this Companion surveys the challenges and provocations raised by the major voices of poststructuralism Foucault Deleuze Derrida Cixous Lyotard Guattari Kristeva Irigaray Barthes and Baudrillard Thematically organised and clearly written it will guide students and researchers in philosophy literature art geography politics sociology law film and cultural studies around the nature and contemporary relevance of poststructuralism

Reshaping Philosophy: Michael Boylan's Narrative Fiction Wanda Teays, 2022-05-25 This volume offers original essays exploring what fictive narrative philosophy might mean in the research and teaching of philosophy The first part of the book presents theoretical essays that examine Boylan's recent books *Teaching Ethics with Three Philosophical Novels* and *Fictive Narrative Philosophy How Literature can Act as Philosophy* The second and third part offer essays on how Boylan executes his theory in the practice within his novels from his two series *De Anima* and *Arch* The book clearly shows the unique aspects of the fictive narrative philosophy approach First it makes story telling accessible to wide audiences Second story telling techniques invoke devices that can set out complicated existential problems to the reader that offer an additional approach to thorny problems through the presentation of lived experience Third the discussion of these devices is a way to explore philosophical problems in a way that many can profit from The book concludes with an essay in which Boylan responds to the critical challenges set out in Part One and the practical criticism set out in Parts Two and Three Boylan addresses the key claims made by his objectors and defends his position He engages with the authors in the way his theory is matched against his actual novels This is useful reading for

both philosophers and professors of literature teaching introductory as well as upper level courses in the fields of philosophy literature and criticism Fielding Derrida Joshua Kates,2008 How are we to interpret Jacques Derrida s writings now after so much commentary has been devoted to his thought and his own astonishing productivity has come to an end In this groundbreaking book Joshua Kates extends his earlier contextualizing of Derrida s work in relation to Husserl by arguing that we must begin from a frame different from that provided by Derrida himself His work must be inserted into already existing fields thus fielding Derrida By placing Derrida s texts in the context of broader fields such as interpretations of modernity and analytic philosophy of language Kates captures Derrida s stances with a new concreteness and an unprecedented scope forging links to vital debates across the humanities today Embodying Pragmatism Wojciech Małecki,2010 Embodying Pragmatism is the first monograph in English devoted to Richard Shusterman an internationally renowned philosopher and one of today s most innovative thinkers in pragmatism and aesthetics The book presents a comprehensive account of Shusterman s principal philosophical ideas concerning pragmatism aesthetics and literary theory including such themes as interpretation aesthetic experience popular art and human embodiment culminating in his proposal of a new discipline called somaesthetics As Shusterman s philosophical writings involve a dialogue with both analytic and continental traditions this monograph not only offers a critical vision of contemporary pragmatist thought but also situates Shusterman and pragmatism within the current state of theory
