It explores the imperatives underpinning educational reforms and identifies the role of schools in developing disseminating and sustaining changes in Singapore's educational context. It also includes international case studies that examine the dialectical relationships between structure, people and culture and demonstrate that cultivating ecologies involves leveraging affordances and resources across the education system to create new contexts, synergies and capacities. Further, it argues that educational innovations and reforms also need to consider tacit knowledge and conditions of transfer which may be ambiguous and challenging. Few books address the nuances and interactions of innovation and change across levels of the education ecology from the micro classroom, meso organisation, school, exo partners, macro policy and chrono time scales levels. The ecological perspective adopted in this book explores the dynamic tensions in order to understand the interplays of policy and school level influences that contextualize school innovations. By presenting multiple voices and views, it allows impediments and affordances of innovation diffusion to be discussed holistically, which is an integral caveat for nurturing a sustainable ecology that enables innovations.

Explorations in the anthropology of religion W. E. A. van Beek, J. H. Scherer, 2013-12-14. This Festschrift is dedicated to Prof. Dr. J. van Baal on the occasion of his retirement from the chair of cultural anthropology at the University of Utrecht. The essays presented here are written by fellow scholars in recognition of his outstanding contributions to the field of anthropology. In order to arrange the papers around a theme that has never ceased to fascinate van Baal, we have asked the contributors to concentrate on a religious subject. Within this broad area, no specific topics have been solicited and the authors, mainly fellow anthropologists and students of religion, have been able to pursue their own personal interests in the articles. Nevertheless, when the papers were collected, we found it possible to group them under three headings, each of which represents a facet of van Baal's enduring interests. Of course, some overlap is inevitable as it is in any categorisation of

heterogeneous items. The topics of the three sections by no means represent an exhaustive inventory of all fields van Baal has successfully explored. The focus on religion necessarily leaves out many problems van Baal has actively occupied himself with during his many-sided career. Thus the academic stance of the *Festschrift* in no way pays tribute to his prolonged concern with administrative
