Hypercompetition Richard A. D'aveni, 2010-05-11 General Motors and IBM have been battered to their cores Jack Welch the chairman of General Electric called the frenzied competition of the 1980 s a white knuckle decade and said the 1990s would be worse In this pathbreaking book that will define this new age of hypercompetition Richard D Aveni reveals how competitive moves and countermoves escalate with such ferocity today that the traditional sources of competitive advantage can no longer be sustained To compete in this dynamic environment D Aveni argues that a company must fundamentally shift its strategic focus He constructs a brilliant operational model that shows how firms move up escalation ladders as advantage is continually created eroded destroyed and recreated through strategic maneuvering in four arenas of competition Using this Four Arena analysis D Aveni explains how competitors engage in a struggle for control by seeking leadership in the arenas of price and quality timing and know how stronghold creation invasion and deep pockets Winners set the pace in each of these four competitive battlegrounds Using hundreds of detailed examples from hypercompetitive industries such as computers software automobiles airlines pharmaceuticals toys and soft drinks D Avenie demonstrates how hypercompetitive firms succeed in dynamic markets by disrupting the status quo and creating a continuous series of temporary advantages They seize the initiative D Aveni explains by employing a set of strategies he calls the New 7 S s Superior Stakeholder Satisfaction Strategic Soothsaying Speed Surprise Shifting the Rules of Competition Signaling Strategic Intent and Simultaneous and Sequential Thrusts Paradoxically firms must destroy their competitive advantages to gain advantage D Aveni shows Long term success depends not on sustaining an advantage through a static long term strategy but instead on formulating a dynamic strategy for the creating destruction and recreation of short term advantages America must embrace the new reality of hypercompetition D Aveni concludes in a compelling analysis of the potential chilling effect of American antitrust laws on competitiveness This masterful book essentially an

operating manual of strategy and tactics for a new era will be required reading for managers planners consultants academics and students of hypercompetitive industries Deep Pockets Brendan Cooper,2023-04-06 A brilliant book brilliantly written You really do need to read it Adrian Chiles Mixing the sacred and the profane high culture and low culture the sublime and the ridiculous Deep Pockets is the book this game of unfathomable difficulty and infinite mystery well deserves Critic The game of snooker has a remarkable history From humble origins it blossomed spectacularly in the 1980s into the nation s most popular sport Top players became celebrities The papers were stuffed with snooker scandals It even conquered the pop charts In the twenty first century the game is still big news Along with millions of British fans a vast audience continues to grow across every corner of the world from Europe to the Middle East to China The global thirst for snooker has never been greater But strangely perhaps snooker s deeper meanings have rarely been explored It is a game that celebrates subtlety and mystery a slow undertaking in a fast paced world Elegant and profound snooker invites serious contemplation Deep Pockets is a study of this uncharted territory a love letter to snooker and an impassioned journey into its soul Because snooker in fact is more than a game It is a belief set a way of seeing an entire philosophical system In chapters that cover everything from time truth loss luck and more Deep Pockets explores how snooker can help us to trace the meaning of life itself Justifying Strict Liability Marco Cappelletti,2022 The imposition of strict liability in tort law is controversial and its theoretical foundations are the object of vigorous debate Why do or should we impose strict liability on employers for the torts committed by their employees or on a person for the harm caused by their children animals activities or things In responding to this type of questions legal actors rely on a wide variety of justifications Justifying Strict Liability explores in a comparative perspective the most significant arguments that are put forward to justify the imposition of strict liability in four legal systems two common law England and the United States and two civil law France and Italy These justifications include risk accident avoidance the deep pockets argument loss spreading victim protection reduction in administrative costs and individual responsibility By looking at how these arguments are used across the four legal systems this book considers a variety of patterns which characterise the reasoning on strict liability The book also assesses the justificatory weight of the arguments showing that these can assume varying significance in the four jurisdictions and that such variations reflect different views as to the values and goals which inspire strict liability and tort law more generally Overall the book seeks to improve our understanding of strict liability to shed light on the justifications for its imposition and to enhance our understanding of the different tort cultures featuring in the four legal systems studied *Has Anyone Seen My Reading Glasses?* Pat Paciello,2006-04-21 *Has Anyone Seen My Reading Glasses* offers a unique and fresh approach to the subject of Baby Boomer retirement First it s written by a Baby Boomer who is actually retired Second the book is long on humor and personal anecdotes and short on statistical analysis In the book Pat covers topics that are not normally seen in the table of contents of most retirement books such as Timesharing Cruising and the Women s perspective of Baby Boomer retirement

of the arts Abbing compares developments in the established arts with those in the popular arts and proceeds to outline key ways that the former can learn from the latter by lowering the cost of production fostering innovation and becoming less exclusive These assertions are contextualized with analysis of the separation between serious art and entertainment in the nineteenth century lending credence to the idea that government supported art worlds have promoted the exclusion of various social groups Abbing outlines how this is presently changing and why while the established arts have become less exclusive they are not yet for everybody
