A New Philosophy John G. Deville, 2016-02-25 John G Deville shows in his book that before him philosophers ignorance of the human brain prevented them from knowing anything about bio electromagnetism As a result they were using unproven postulates and ambiguous expressions to create theories full of questionable premises and conclusions That's why Ludwig Wittgenstein once said Philosophy leaves everything as it is In this book Deville has destroyed some 4 000 years of philosophy to convince the new world that philosophy is not the same any more He is the first philosopher to introduce the irrefutable concept of preconsciousness to show that neonates and very young children up to the age of about five years old are preconscious because they don't have the levels of consciousness required for conscious thoughts to occur in their cerebrum or the frontal lobe

My View of the World Erwin Schrödinger, 2008-11-27 A Nobel prize winner a great man and a great scientist Erwin Schrödinger has made his mark in physics but his eye scans a far wider horizon here are two stimulating and discursive essays which summarize his philosophical views on the nature of the world Schrödinger's world view derived from the Indian writings of the Vedanta is that there is only a single consciousness of which we are all different aspects He admits that this view is mystical and metaphysical and incapable of logical deduction But he also insists that this is true of the belief in an external world capable of influencing the mind and of being influenced by it Schrödinger's world view leads naturally to a philosophy of reverence for life

Mirror of Nature, Mirror of Self Dimitry Shevchenko, 2023 *Mirror of Nature Mirror of Self* considers theories of consciousness in Indian philosophical traditions through the metaphor of reflection in a mirror Just as a face appears where it is not in a mirror's reflection so do consciousness and its properties such as the sense of self subjectivity and experience In a dialogue with psychoanalytical theory and contemporary philosophy of mind the book develops a new model of consciousness and contributes to contemporary debates

The Innateness of Myth Ritske Rensma, 2011-10-27 Joseph Campbell 1904 1988 was one of the most well known and popular scholars of myth and comparative religion of the twentieth century His work however has never fully received the same amount of scholarly interest and critical reflection that some of his contemporaries have received In this book based on extensive research in the Joseph Campbell Archive in Santa Barbara Ritske Rensma shows that reflecting on C G Jung s influence on Campbell greatly furthers our understanding of these ideas and that once this goal is achieved it becomes obvious that Campbell was a scholar whose ideas are still of significance today Following Jung s lead Campbell put great emphasis on the innate structures of the mind an approach which pre echoes the current evolutionary turn in fields such as cognitive theory psychology psychiatry and neurobiology This study will therefore not just be of interest to students and scholars interested in psychological approaches to the study of religion as well as Jung and Campbell but also to those with an interest in recent developments in the above mentioned fields

Raj Yoga Dr. Lake Singh, 2018-08-21 Every mortal creature is fraught with the fear of death Even man thinks he shall disappear into the abyss of nothingness But the Godheads all beg to differ Krishna Jesus Buddha et al They unequivocally declared death as the staircase to heaven Raj yoga though confers upon man an even higher state of being the consummate path of moksha or oneness with the Creator which is what this sui generis or unprecedented text is all about WE ARE ON THE CUSP OF A SPIRITUAL BREAKTHROUGH HERE Evidently the Western world is familiar with only hatha yoga a series of dexterous postures and breathing exercises designed to promote mens sana in corpore sano a sound mind in a healthy body However there are other more laudable streams of yoga Among them is raj or the kingly mega yoga which espouses not only how one may win the heavens but also be in sync and harmony with the Creator at the exigency or verge of death In medical parlance we see a rather striking similarity between birth and death In birth scientists have determined that two specialized germ cells fuse to give rise to life As it happens at the beginning of life why not at the end also a process whereby the micro and macro souls precipitously merge and become one In that case then what will it profit a man if he gains the whole world but loses his own soul The author introduces here testimonials evidences and plausible yogic techniques that a devout practitioner may employ not only to save his soul but also transform fearsome death to an enlivened spiritual experience

The Power of Now by Eckhart Tolle - A 15-minute Instaread Summary Instaread Summaries, 2014-10-21 PLEASE NOTE This is a summary of the book and NOT the original book The Power of Now by Eckhart Tolle A 15 minute Instaread Summary Inside this Instaread Summary Overview of the entire book Introduction to the important people in the book Summary and analysis of all the chapters in the book Key Takeaways of the book A Reader's Perspective Preview of this summary Chapter 1 Enlightenment a feeling of awareness peace and joy comes from within a person not from outside sources Enlightenment is an end to suffering and a feeling of connection to a person's own true self and to the world Enlightenment is being aware of a person's own deepest self or Being People have difficulty experiencing Being because of their identification with their own minds Their own thoughts keep them from finding the stillness needed to experience Being When people identify with their thoughts it blocks their relationships with others nature and God Those who can observe themselves thinking realize that they are not their mind and that all things of importance such as beauty joy love and inner peace come from beyond the mind This state of consciousness is achieved when people feel their own presence beyond their thoughts emotions and physical bodies Another way to experience enlightenment is to focus all attention on the now the present moment The ego or false self barely notices the present moment To the ego only the past and the future are important Emotions are thoughts that are felt in the body To reach full consciousness people need to be

able to see their emotions as separate from themselves *Waking Up* Keith Witt, 2008-07-07 This book is a transmission from a gifted therapist His generosity and comprehensive sharing in this book can be a rich guide to anyone fascinated with their own and others development Marlene Z Roberts MA MFT is the cofounder of the Anapamu Counseling Center and is a psychotherapist hypnotherapist and credentialed teacher Psychotherapy is co creative art Therapists and clients create healing cultures Dr Witt takes us into the minds of therapists and into psychotherapy sessions where multiple perspectives and dozens of techniques come alive We feel the pleasures of helping individuals and couples wake up to greater joy health and intimacy

Schopenhauer's Encounter with Indian Thought Stephen Cross, 2013-06-30 Schopenhauer is widely recognized as the Western philosopher who has shown the greatest openness to Indian thought and whose own ideas approach most closely to it This book examines his encounter with important schools of Hindu and Buddhist philosophy and subjects the principal apparent affinities to a careful analysis Initial chapters describe Schopenhauer's encounter with Indian thought in the context of the intellectual climate of early nineteenth century Europe For the first time Indian texts and ideas were becoming available and the belief that they could bring about a second Renaissance an Oriental Renaissance was widespread Schopenhauer shared in this enthusiasm and for the rest of his life assiduously kept abreast of the new knowledge of India Principal sections of the book consider the two main pillars of Schopenhauer's system in relation to broadly comparable ideas found in the case of Hindu thought in Advaita Vedānta and within Buddhism in the Mādhyamika and Yogācāra schools Schopenhauer's doctrine of the world as representation or a flow of impressions appearing in the consciousness of living beings is first considered The convergence between this teaching and Indian idealism especially the doctrine of illusory appearance *māyā* has long been recognized Schopenhauer himself was aware of it emphasizing that it was the result not of influence but of a remarkable convergence between Eastern and Western thought This convergence is subjected to a much more detailed examination than has previously been carried out undertaken in the light of twentieth century Indology and recent studies of Schopenhauer The second main pillar of Schopenhauer's system the doctrine of the world as will is then examined and its relationship to Indian thought explored This section of the work breaks new ground in the study of Schopenhauer for although the similarity of his ethical and soteriological teaching to that of Indian religions particularly Buddhism has long been noted the underlying reasons for this have not been grasped It is demonstrated that they are to be found in hitherto unrecognized affinities of which Schopenhauer himself was largely unaware between the metaphysics of the will and Indian ideas relating to karmic impressions *vasāna* the store consciousness the causal body and *akti* as the force or energy that maintains the existence of the world Final chapters discuss the controversial and difficult question of the relation of the will to final reality in Schopenhauer's thought in the light of Indian conceptions and suggest that the two central pillars of his philosophy may be seen to a greater extent than previously supposed as a bridge by which the Eastern and Western traditions of philosophical thought may be brought into a closer and more creative relationship
