

DEEPER THAN DARWIN

The Prospect for
Religion in the
Age of Evolution

"A beautifully written, deeply intelligent, and much-needed book....The community of believers is in his debt for taking the insights and challenges of contemporary science seriously and grappling urgently with how to articulate faith in this context." —*America*

Deeper Than Darwin The Prospect For Religion In The Age Of Evolution:

Deeper Than Darwin John Haught, 2018 In his acclaimed book *God After Darwin* John Haught argued that religious belief is wholly compatible with evolutionary biology Now in *Deeper Than Darwin* he advances his argument further by saying that religious belief is even more revealing about life than Darwinism Haught looks hard at the question of how after Darwin religions may plausibly claim to be bearers of truth and not just of meaning and adaptive consolation While he assumes the fundamental correctness of evolutionary biology he firmly rejects the non scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena Even though Darwinism is illuminating Haught argues it by no means tells us everything we need to know about life even in principle To find the deepest though certainly not the clearest understandings of life and the universe we may still profitably consult the religions of the world *Deeper Than Darwin* takes up where *God After Darwin* left off arguing that Darwin's vision is important and essentially correct but that we can still dig deeper in our understanding of what is going on in the life story Provided by publisher *Deeper Than Darwin* John F. Haught, 2005-10-01 In his book *God After Darwin* Haught argued that religious belief is wholly compatible with evolutionary biology Now he says that while Darwin's vision is essentially correct religious belief is even more revealing about life than Darwinism Looks at the question of how religions may plausibly claim to be bearers of truth not just of meaning While he assumes the fundamental correctness of evolutionary biology he firmly rejects the non scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena Darwinism is illuminating but it does not tell us everything we need to know about life To find the deepest understandings of life the universe we may still profitably consult the religions of the world

Darwinism and Natural Theology Andrew Robinson, 2012-03-15 Can Christianity be reconciled with Darwin's theory of evolution by natural selection What relevance do the biological sciences have to religious thought Does Christian theology have anything to offer when it comes to formulating scientific hypotheses These questions are among those explored in this collection of essays arising from a meeting of the UK Science and Religion Forum held in Cambridge to mark the bicentenary of Darwin's birth and the 150th anniversary of the publication of *The Origin of Species* The volume brings together contributions from a distinguished group of scholars at the forefront of the field of science and religion including Denis Alexander R J Berry John Hedley Brooke Sarah Coakley Celia Deane Drummond David Fergusson David Knight Christopher Southgate Neil Spurway and Kenneth Wilson The essays are organized around the theme of natural theology the attempt to draw theological conclusions from reflection on the natural world The essays cover historical philosophical and theological perspectives and explore some contemporary approaches to natural theology in the context of Darwinism **The Mystery of Evolutionary Mechanisms** Robert F. Shedinger, 2019-06-28 Is Darwinian evolution really the most successful scientific theory ever proposed or even the best idea anyone has ever had as Daniel Dennett once put it *The Mystery of Evolutionary Mechanisms* provides a comprehensive critical reading of the literature of evolutionary biology from Darwin to Dobzhansky

to Dawkins revealing this popular account of evolution to be a grand narrative of Darwinian triumph that greatly overstates the empirical validity of modern evolutionary theory The mechanisms driving the evolutionary process truly remain a mystery more than one hundred fifty years after Origin of Species a fact that can free religion scholars to think in more creative ways about the positive contributions religious reflection might make to our understanding of life s origin and diversity The Mystery of Evolutionary Mechanisms calls for an embrace of mystery understood not as an abdication of the scientific quest for truth but as a courageous and humble acknowledgment of the limits of human reason and an openness to a fundamentally religious orientation toward life *God, Humanity and the Cosmos - 3rd Edition* Christopher Southgate,2011-12-15 The Intelligent Design Debate and the Temptation of Scientism Erkki Vesa Rope Kojonen,2016-04-28 The controversy over Intelligent Design ID has now continued for over two decades with no signs of ending For its defenders ID is revolutionary new science and its opposition is merely ideological For its critics ID is both bad science and bad theology But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides A balanced and deep analysis of a controversial debate this volume argues that beliefs about the purposiveness or non purposiveness of nature should not be based merely on science Rather the philosophical and theological nature of such questions should be openly acknowledged

The Oxford Handbook of Religion and Science Philip Clayton,Zachary Simpson,2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader *Iron Sharpens Iron* Robert P. Vande Kappelle,2013-07-26 Iron Sharpens Iron is grounded in the conviction that humans have the capacity to transcend conventional spirituality to a genuine and wholesome faith that is dynamic rather than static future oriented rather than past oriented and owned rather than passively acquired Classroom tested this discussion guide is an ideal way for thoughtful Christians in individual and group settings to interact with timely topics Like its companion text Beyond Belief Science Faith and the Value of Unknowing 2012 this guide is written for those who affirm the value of lifelong spiritual growth Topics covered include the authority of scripture the uniqueness of Christ faith and reason religion and science biological evolution and morality cosmological evolution and the nature of God and the doctrines of salvation resurrection and the afterlife This guide encourages a high degree of interaction The discussion questions are engaging and appeal to various levels of intellectual and spiritual awareness Sessions follow a fourfold pattern a Getting Started provides an overview of each session b Gaining Momentum provides questions for discussion or further reflection c Going Deeper encourages participants to acquire further perspective and d The Essentials summarizes key points from each chapter of Beyond Belief Naturalism, Theism and the Cognitive Study of Religion Dr Aku Visala,2013-06-28 This book provides a critical philosophical analysis of the claim that contemporary cognitive approaches to religion undermine theistic beliefs Recent scientific work into the evolution and cognition of religion has been driven by and interpreted in terms of a certain kind of philosophical and

methodological naturalism The book argues that such naturalism is not necessary for the cognitive study of religion and develops an alternative philosophical and methodological framework This alternative framework opens the cognitive study of religion to theological and philosophical considerations and clarifies its relationship to other approaches to religious phenomena This unique contribution to discussions regarding the philosophical and theological implications of the cognitive study of religion summarizes the so far fragmentary discussion exposes its underlying assumptions and develops a novel framework for further discussion **Naturalism, Theism and the Cognitive Study of Religion** Aku Visala, 2016-04-22

L. Harper, 2005-06 Spiritual Information is a collection of one hundred essays that explore a portion of the vast interdisciplinary approaches to the study of science and religion Individually and together the essays show how the study of ourselves our planet and the universe helps us understand our place as spiritual beings within God's universe The book is a tribute to Sir John Templeton and his pioneering commitment toward new research that results in one hundredfold more spiritual information than humankind has ever possessed before It begins with essays that reflect on Sir John's principal domains of interest and expertise free enterprise based finance and accelerating spiritual progress Themes of the sections are Science Religion Dialogue Cosmology Physics and Astronomy Mathematics Musicology and Speculation Biological Evolution the Human Being Social Evolution the Human Mind and Heart Religion and Health The Nature of the Divine Theology and Philosophy Faith Traditions Sir John's leadership has enabled us to edge ever closer to the frontier where knowledge meets wisdom at the threshold of ultimate reality notes the editor in the preface to this volume As Spiritual Information presents an overview of how far we have come in the science and religion dialogue it also opens windows to the vast possibilities for additional research and further advances in spiritual information **Science and the Spirit** James K.

A. Smith, Amos Yong, 2010-08-26 What might be described as a Pentecostal worldview has become a powerful cultural phenomenon but it is often at odds with modernity and globalization Science and the Spirit confronts questions of spirituality in the face of contemporary science The essays in this volume illustrate how Pentecostalism can usefully engage with technology and scientific discovery and consider what might be distinctive about a Pentecostal dialogue with the sciences

The authors conclude that Pentecostals with their unique perspectives on spirituality can contribute new insights for a productive interaction between theology and science **The Nature of Things** Graham Buxton, Norman C. Habel, 2016-11-16

In 2015 a conference on Rediscovering the Spiritual in God's Creation was held at the Serafino winery complex in the McLaren Vale region of South Australia. The aim of the conference was not to seek consensus but to survey the landscape with a view to intentional responsible action in caring for God's creation. Delegates were challenged to recognize their own worldviews and to widen their horizons to encompass the enormity of the transcendence and immanence of God's presence in all creation. A group of leading international scholars and experts in the fields of science, ecology, theology and ethics participated in a multidisciplinary conversation on the spiritual in creation with the aim of discovering fresh horizons with regard to creation care, liturgy, justice and discipleship within the Christian community. The chapters in this volume reflect the diversity of perspectives summarized in The Serafino Declaration which was crafted towards the end of the conference. This declaration which opens the volume outlines a range of views relating to the presence of the spiritual in creation, views that are both traditional and radical. This volume highlights the current concern over ecological destruction and finds sources of inspiration in the deepest roots of our traditions and forms of spirituality to sustain efforts towards custodianship of the land and care for God's creation. Contributors: David Rhoads, Paul Santmire, Denis Edwards, Bob White, Heather Eaton, Ernst Conradie, Vicky Balabanski, Celia Deane Drummond, Mark Worthing, Emily Colgan, Dianne Rayson, Anne Gardner, Mark Liederbach, Patricia Fox, Anne Elvey, Mick Pope **From Eden to Interstellar Space** Sarah Anne Beattie, 2025-01-23

This book is a response to two questions. The first concerns how we can do better as human beings in addressing the broken relationships between humankind, the environment in which we live and the other species with which we coexist in an increasingly fragile world. The second concerns whether secular humanism can provide the answer or if there is an important contribution that Christian faith can offer to an understanding of the human condition that will empower effective transformational action. The book explores the possibility of developing an interpretive approach to biblical narrative that allows a biblical perspective of reality to provide an important complementary rather than competing supplement to developing scientific perspectives of reality. These are perspectives emerging from quantum mechanics and astrophysics that challenge both our conceptual ability and the limits of language in articulating mystery that in resisting physical explanation appears to demand new or different ways of thinking about ourselves and the world in which we live **For the Rock Record** Jill S. Schneiderman, Warren D. Allmon, 2009-04-06

Creationism began with the fossil record and there it shall end. Before Darwin the geological strata with their accompanying fossils formed the first geological theory of life on earth: creationism coupled to flood geology. It was Darwin who stood that theory on its head and showed that in fact these same fossils could be used to support his new theory of evolution by natural selection. Ever since Darwin, geology has unequivocally supported evolution and not creationism, and yet today Intelligent Design thrives in popular culture. Here at last we have a

definitive collection of world class geologists and paleontologists who systematically demonstrate precisely why geology destroys all design arguments and reveals instead a deep and rich history of life on earth A perfect companion to all science courses Michael Shermer publisher of Skeptic magazine and author of Why Darwin Matters An excellent contribution on a vital issue which concerns not only geologists but all who value any science Mark Isaak author of The Counter Creationism Handbook

Maximus the Confessor and Evolutionary Biology Andrew P. Jackson, 2024-11-04 This book brings Maximus the Confessor's logoi doctrine into dialogue with modern day evolutionary biology It explores the extent to which the logoi as described by Maximus exhibit features that are concordant with evolution before going on to consider more discordant aspects that cannot be ignored The author addresses the curious resonance between the logoi and evolution in a systematic way through a close reading of primary textual material allied with a deep understanding of both the classical Darwinian and extended evolutionary syntheses The study joins with other Maximian interpreters in attesting to the incarnational and theophanic nature of the logoi but seeks to extend this distinctively Eastern Christo cosmology into the problematic territory of biological evolution a territory historically dominated by Western scholarship The book will be of interest to scholars of religion and science as well as Patristics and the Eastern Orthodox theological traditions

The Ocean of God Roland Faber, 2019-06-29 The Ocean of God conveys the proposition that the future of religions if they will not want to contribute to the destruction of humanity will become transreligious Based on the assumption that the spiritual impulse of humanity cannot simply be eradicated religiosity will persist in transreligious forms as secularizations naturalizations and transhumanist dreams only envision such transformations but fall short in their ability to replace the force of spirituality to further civilized peace of human existence on Earth and its future in evolutionary ecological and cosmological dimensions In relating the contributions of religious pluralism to the concept of the unity of religions which have arisen in this new axial age for overcoming the checkered history of religions in furthering peace the program of a polyphilic pluralism with its transreligious discourse based on the insight of the fundamental relativity of religious truth and the special contributions of process philosophy and theology as well as the Bah universe of thought analyses and projects a new religiosity or spirit enabling religions to overcome their deepest motives of strife and warfare

Heart to Heart—The Journey Outward Robert P. Vande Kappelle, 2023-01-20 Whether religiously theists atheists agnostics or simply seekers each of us is on a journey of faith spiraling through stages seasons or phases of spirituality On this journey we discover that spirituality is more caught than taught and that faith enriched more by subtraction than by addition is more about unlearning than learning At the center of Jesus life and message stands the exhortation to receive and share divine love The two volumes of Heart to Heart excerpted from Dr Vande Kappelle's published writings examine the meaning and implications of the biblical Great Commandment to love God and others as oneself Whereas the first volume examines the spiritual journey inward this companion volume examines the journey outward Ultimately there is only one spiritual journey the journey Godward and

there is only one commandment Divine love is the key to everything Unloved people misbehave fail to love or fail to change Loved people aren't concerned with rules regulations or beliefs Rather because they are loved they take proper care of themselves and in so doing care for nature and others as extensions of themselves Heart to Heart is written for those who affirm the value of lifelong spiritual growth realize the limits of logic and embrace the paradoxes in life If you are willing to commit less than ten minutes a day over a seven month period you will undertake a spiritual journey of epic proportions guaranteed to transform you morally and spiritually In addition you will come to embrace Christianity as the transformative movement envisioned by Jesus for humanity a way of life grounded in compassion justice service humility and love of others

The Bible and Science Vincent Smiles, 2011-06-01 Confusing paradox surrounds the Bible Some look to it as the definition of reality and deny science others see science alone as the arbiter of truth and deny the Bible Both extremes are merely symptoms of a still wider debate on the place of ancient spiritual wisdom in a science dominated world Following the Reformation and Enlightenment the Western world gained great power but lost its spiritual bearings This book draws on numerous sources ancient and modern to examine what the missteps were that have brought us to a point of such confusion and in doing so argues cogently against the modern philosophy of scientific materialism With the aid of biblical stories and imagery it suggests how we might find our way back to balance where ancient wisdom and modern science can together shed light on humans and their encompassing reality Vincent Smiles is professor of theology at Saint John's University Collegeville Minnesota

Rawlsian Explorations in Religion and Applied Philosophy Daniel A. Dombrowski, 2015-08-26 To probe the underlying premises of a liberal political order John Rawls felt obliged to use a philosophical method that abstracted from many of the details of ordinary life But this very abstraction became a point of criticism as it left unclear the implications of his theory for public policies and life in the real political world Rawlsian Explorations in Religion and Applied Philosophy attempts to ferret out those implications filling the gap between Rawls's own empyrean heights and the really practical public policy proposals made by government planners lobbyists and legislators Among the topics examined are natural rights the morality of war the treatment of mentally deficient humans and nonhuman sentient creatures the controversies over legacy and affirmative action in college admissions and the place of religious belief in a democratic society The final chapter explores how Rawls's own religious beliefs as revealed in two works posthumously published in 2009 played into his formulation of his theory of justice
