of intuition to intellect of how the whole and its constituent qualities relate also is explored The forms of representation artists and art students have access to inexorably shape the content of their work The educational process too often has thwarted natural human abilities Art education however can and should have a crucial role in fostering these abilities DB

Philosophical Questions in Art Education Dorit Barchana-Lorand, 2025-08-21 This book examines the rationale of incorporating the arts in the school curriculum from a philosophical rather than pedagogical perspective Educational resources are frequently under scrutiny and education policy makers wish to maximize the use of public funds and children's time at school leaving the arts as a lower priority To understand the logic behind this Lorand revisits milestones in the history of the philosophy of art to address core questions in art education namely what are the challenges of teaching the arts And why teach the arts at all Lorand draws on the work of a broad range of philosophers including Dewey Eisner Greene Hume Plato Kant Langer Read and Schiller The book aims to show how attempts to justify art as a tool for societal and individual improvement fail in advocating art education Ultimately she claims that the arts should be taught because children have the right to receive art education That right stems from the unique nature of art

Art, Artists, and Art Education Kenneth Melvin Lansing, 1969 This unique book represents a blend of the philosophical and practical aspects of art education It reflects the author's belief that efficient responsible instruction in art depends upon the existence of a reasonable point of view about the nature and value of art and the nature of the artist and the student Consequently the first half of the text is devoted to developing aesthetic criteria in the author's words to discovering a sense of mystery and excitement that can be found in art education Using the nature of art and artists as the basis for determining practical methods of instruction Dr Lansing goes on to describe in behavioristic terms the objectives of art education suitable teaching processes and a recommended curriculum Specific artistic activities are described for each grade level from nursery school through junior high school Hence the classroom teacher does not have to guess about the appropriateness of a given activity for his grade Additional features of the text include one chapter devoted to new methods of evaluation and reporting to parents and another to the need for more effective research There is also a comprehensive chapter on supervision that covers curriculum planning personnel relationships and in service education managing equipment and supplies professional obligations and public relations The

text opens with a challenging introduction which realistically appraises not only the favorable aspects of teaching but its problems and frustrations as well dust jacket

Play and Creativity in Art Teaching George Szekely, 2015-03-02 In *Play and Creativity in Art Teaching* esteemed art educator George Szekely draws on his two classic volumes *Encouraging Creativity in Art Lessons* and *From Play to Art* to create a new book for new times The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art By observing children at play and using props and situations familiar to them teachers can build on children's energy and self-initiated discoveries to inspire school art that comes from the child's imagination The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists that art comes from within themselves and not from the art teacher *Play and Creativity in Art Teaching* offers plans for the study of children's play and for discovering creative art teaching as a way to bring play into the art room While it does not offer a teaching formula or a single set of techniques to be followed it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children

Why We Need Arts Education Howard Cannatella, 2015 This is a book that will be of interest to those who teach, know, care, theorise, administer, set policies and discuss the arts in education Each chapter in this book makes various references to actual arts teaching practices Teaching and learning examples figure prominently Concrete teaching incidents are covered throughout the book Various actual classroom teaching situations are given Highlighted at particular points are arts teaching practices that demonstrate how the arts drive up standards in education generally and why teaching expertise in the arts can be seen as central to this Teaching practices and theories in the arts overlap in applied ways Current teaching and curriculum issues are debated Teaching explanations expressing the actions, character and skills of an art teacher, the knowledge claims, the truth relationships, ideas and conceptions in student-focused, contingent ways are discussed Explored are learner-like student-teacher dialogues, everyday shared common experiences of art and the reverent pleasures and insights that correspondingly relate to how things are worked, felt and examined by students Familiar, ordinary, cherished, touching, sensitive and dignified comprehensions are portrayed In capacity-strengthening ways the book attends to the elevated, consensual, continuous, broad, united, narrow, enlarged, diverse, open, freed, lively, inventive, imaginative, deeper and richer horizons that exemplify how the arts in education as a common good contribute to society This text argues persuasively why we should be teaching arts education more comprehensively in a public system of education and how we should be doing it

Art, Artists and Pedagogy Christopher Naughton, Gert Biesta, David R. Cole, 2017-10-16 This volume has been brought together to generate new ideas and provoke discussion about what constitutes arts education in the twenty-first century both within the institution and beyond *Art, Artists and Pedagogy* is intended for educators who teach the arts from early childhood to tertiary-level artists

working in the community or those studying arts in education from undergraduate to Masters or PhD level From the outset this book is not only about arts in practice but also about what distinguishes the arts in education Exploring two different philosophies of education the book asks what the purpose of the arts is in education in the twenty first century With specific reference to the work of Gert Biesta questions are asked as to the relation of the arts to the world and what kind of society we may wish to envisage The second philosophical set of ideas comes from Deleuze and Guattari looking in more depth at how we configure art the artist and the role played by the state and global capital in deciding on what art education has become This book provides educators with new ways to engage with arts focusing specifically on art music dance drama and film studies At a time when many teachers are looking for a means to re assert the role of the arts in education this text provides many answers with reference to case studies and in depth arguments from some of the world s leading academics in the arts philosophy and education Art Education Maurice Barrett,1979
