Art Of Persuasion Political Communication In Italy From 1945 To The 1900s:

The Art of Persuasion Luciano Chelos (ed), Lucio. Sponza (ed), 2001 Writing for art is a concise introduction to the subject of ekphrasis and the first study to offer a useful general survey of the larger philosophical and theoretical questions arising from the encounter of literary texts and artworks Stephen Cheeke offers close readings of poems and prose from the nineteenth and twentieth centuries alongside a generous amount of illustrations covering a broad range of writing and theory about the relation of literary texts to the visual arts and extending the subject of ekphrasis to include literary works on photography as well as celebrated prose descriptions of artworks Creative Interventions Eugenio Bolongaro, 2020-06-12 Who are intellectuals What do they think their role and function in contemporary society is Are they on the endangered species list Is equating conservatism with conservation becoming their dominant survival strategy This book is a collection of essays that examines some of the changes in the activities role function and self perception of Italian intellectuals since World War II two major divides are considered to be the crisis of 1956 7 and the fall of the Berlin Wall The first section examines some of the most influential figures in the early decades the second the activities of contemporary intellectuals a third gives voice to some contemporary writers a fourth contains some comparative essays about the role of intellectuals in influential contemporary Western cultures and a final section is devoted to some cross disciplinary forays and reflections on the relevance and possible future directions of these inquiries *Cura del senso e critica sociale* AA. Identity C. Archetti, 2014-01-07 Is the media obsession with image leading to a degeneration of politics Are politicians more concerned with their appearances than with policy substance Through the evidence provided by over 50 interviews with politicians across the UK and Italy local councillors MPs and MEPs this book provides a very different picture of the world of politics than the one we often cynically imagine By relying on extensive excerpts from frank and colorful conversations with the interviewees the analysis develops a new multidisciplinary model to understand the mediatization of politics and the way the personal image of elected representatives is constructed in the age of interconnectedness *The British National Bibliography* Arthur James Wells, 2005 *A Box of Sand* Charles Stephenson, 2014-12-19 This is the first book in the English language to offer an analysis of a conflict that in so many ways raised the curtain on the Great War In September 1911 Italy declared war on the once mighty transcontinental Ottoman Empire but it was an Empire in decline The ambitious Italy decided to add to her growing African empire by attacking Ottoman ruled Tripolitania Libya The Italian action began the rapid fall of the Ottoman Empire which would end with its disintegration at the end of the First World War The day after Ottoman Turkey made peace with Italy in October 1912 the Balkan League attacked in the First Balkan War The Italo Ottoman War as a prelude to the unprecedented hostilities that would follow has so many firsts and pointers to the awful future the first three dimensional war with aerial reconnaissance and bombing and the first use of armored vehicles operating in concert with conventional ground and naval forces war fever whipped up by the Italian press military incompetence and stalemate lessons in how not to fight a guerrilla war mass death from disease and 10 000 more from reprisals and executions Thirty thousand men would die in a struggle for what may be described as little more than a scatolone di sabbia a box of sand As acclaimed historian Charles Stephenson portrays in this ground breaking study if there is an exemplar of the futility of war this is it Apart from the loss of life and the huge cost to Italy much higher than was originally envisaged the main outcome was to halve the Libyan population through emigration famine and casualties The Italo Ottoman War was a conflict overshadowed by the Great War but one which in many ways presaged the horrors to come *A Box of Sand* will be of great interest to students of military history and those with an interest in the history of North Africa and the development of technology in war **Imagining Terrorism** Pierpaolo Antonello, 2017-07-05 No other European country experienced the disruption of political and everyday life suffered by Italy in the so called years of lead 1969 c 1983 when there were more than 12 000 incidents of terrorist violence This experience affected all aspects of Italian cultural life shaping political judicial and everyday language as well as artistic representation of every kind In this innovative and broad ranging study experts from the fields of philosophy history media law cinema theatre and literary studies trace how the experience and legacies of terrorism have determined the form and content of Italian cultural production and shaped the country's way of thinking about such events **Umberto Eco** James L. of post Second World War reconstruction has recently become an important field of research around the world *Alternative Visions of Post War Reconstruction* is a provocative work that questions the orthodoxies of twentieth century design history This book provides a key critical statement on mid twentieth century urban design and city planning focused principally upon the period between the start of the Second World War to the mid sixties The various figures and currents covered here represent a largely overlooked field within the history of 20th century urbanism In this period while certain modernist practices assumed an institutional role for post war reconstruction and flourished into the mainstream such practices also faced opposition and criticism leading to the production of alternative visions and strategies Spanning from a historically informed modernism to the increasing presence of urban conservation the contributors examine these alternative approaches to the city and its architecture **L'Italia del Novecento: 1.
